Funds are contributed by non-Federal interests for expenditure on improvements of rivers and harbors. This includes cash contributions by terms of agreements with non-Federal interests for study, design, construction and maintenance of authorized Federal projects as well as other non-Federal contributions. Of the $227 million budget authority, it is proposed that $9 million will be used for required contributions for the General Investigations program, $200 million for the Construction, General program, and $1 million for the Flood Control, Mississippi River and Tributaries program. In addition, it is estimated that the cost of unauthorized work requested by non-Federal interests will be $16 million under Construction, General and $1 million under Operation and Maintenance, General.

Legislation is pending that would authorize the collection of fees based on .04 percent of the value of commercial cargo loaded or unloaded at U.S. ports. These fees will be deposited in this fund and used for the expenses necessary for the operation and maintenance of existing channel and harbor projects. The $203 million will be transferred to the Operation and Maintenance, General account.

ADMINISTRATIVE PROVISIONS

Appropriations in this title shall be available for expenses of attendance by military personnel at meetings in the manner authorized by 5 U.S.C. 4110, uniforms, and allowances therefor, as authorized by law (5 U.S.C. 5901-5902), and for printing, either during a recess or session of Congress, of survey reports authorized by law, and such survey reports as may be printed during a recess of Congress shall be printed, with illustrations, as documents of the next succeeding session of Congress; not to exceed $2,000 for official reception and representation expenses; and during the current fiscal year the revolving fund, Corps of Engineers, shall be available for purchase (not to exceed [175] *250* for replacement only) and hire of passenger motor vehicles.

[GENERAL PROVISIONS, CORPS OF ENGINEERS]

[SEC. 101. None of the funds appropriated in this title, except as specifically contained herein, shall be used to alter, modify, dismantle, or otherwise change any project which is partially constructed but not funded for construction in this title.]

[SEC. 102. Within available funds appropriated under "Operation and Maintenance, General", the Secretary of the Army may remove obstructions and ease bends at the Jacksonville Harbor navigation channel in the vicinity of Blount Island to allow for the free and safe movement of vessels.] *(Public Law 99-141, making appropriations for energy and water development, 1986.)*

The 1987 payment to the military retirement fund includes funds for the amortization of the unfunded liability for all retirement benefits earned by military personnel for service prior to 1985. The amortization schedule for the unfunded liability was determined by the DOD Retirement Board of Actuaries. Included in the unfunded liability are the consolidated requirements of the military departments to cover: (a) retired officers and enlisted personnel of the Army, Navy, Marine Corps, and Air Force; (b) retainer pay of enlisted personnel of the Fleet Reserve of the Navy and Marine Corps; and (c) survivors benefits.

These appropriations provide for a program of development and conservation of fish and wildlife and the development of recreational facilities on military reservations. Proceeds from the sale of fishing and hunting permits are used for these programs on the 42 Army, 20 Navy and Marine Corps, and 42 Air Force bases charging such fees. These programs are carried out through cooperative plans agreed upon by the local representatives of the Secretary of Defense, the Secretary of the Interior, and the appropriate agency of the State in which the reservation is located.

Grants for the disadvantaged.—

Grants to local educational agencies.—Funds made available under this activity enable local educational agencies to provide supplementary compensatory education services during the 1987-88 school year for disadvantaged elementary and secondary school students. Funds are allocated to local school districts on the basis of a statutory formula.

The administration has proposed legislation that authorizes a compensatory education voucher program. This proposal would allow parents of children

selected to receive chapter 1 services, to use a share of the Federal funds normally spent on compensatory education services, to obtain the educational services that best meet their children's educational needs.

State agency programs.—The programs within this activity make financial assistance available to State educational agencies for providing supplementary compensatory education services to migrant children, handicapped children in State operated programs, and neglected or delinquent children in State institutions. In each of the three State agency programs, funds are provided to the appropriate State agencies on the basis of an annual count of eligible children. For the State agency migrant program, legislation has been proposed to reduce the number of years that a child who no longer migrates is eligible for this program.

State administration.—This activity provides funds to State educational agencies to administer the programs authorized under chapter 1.

Evaluation and technical assistance.—Funds provide technical assistance to local school districts and State educational agencies and support activities to evaluate the program.

Reimbursable program.—Amounts in this activity consist of: payments made to the Department of Education as audit recoveries which the Secretary has granted back to the audited agency under the terms of section 456 of the General Education Provisions Act and funds appropriated in other accounts for consolidation grants to the insular areas.

Maintenance and operations.—Payments are made to school districts when enrollments and the availability of revenues from local sources have been adversely affected by Federal activities. Funds are provided to districts under section 3(a) for children who live and whose parents work on Federal property or are on active duty in the uniformed services. For 1987, funds available for section 3(a) payments would be at the 1986 enacted amount. Payments on behalf of 3(a) children (other than those residing in Federally-subsidized, low-rent housing) would be made according to the following schedule:

Percentage of 3(a) children in district:	Percentage of entitlement to be paid
50–100	100
35–49	95
20–34	90
15–19	75
10–14	60
Under 10	(*)

* Prorated share of remaining funds.

In 1987, payments would be made to about 1,040 school districts for 330,000 children under section 3(a). Section 2, which provides payments to certain districts having a partial loss of tax base, would be funded at $20 million.

Disaster assistance.—In 1987, $10 million would be available for assistance to school districts that have suffered damage to their facilities from a major disaster.

Construction.—Budget authority of $5 million is requested for 1987 for construction of school facilities in school districts that serve children who reside on Indian lands.

Improving school programs.—

State block grants.—States and outlying areas receive grants according to a statutory formula based on school-age population to improve the quality of elementary and secondary education for children in public and private schools.

Of the total allotted to each State, the State may reserve up to 20 percent for State use. It distributes the remainder to local educational agencies according to State-devised criteria that take into account public and private school enrollment and the number of children whose education imposes a higher than average cost.

Secretary's discretionary fund.—The Secretary supports programs of national or regional significance.

Magnet schools assistance.—Funds are provided to local educational agencies for use in operating magnet school programs that are part of approved desegregation plans. Currently, 44 school districts are receiving awards of up to $4,000,000. A new funding competition will be held in 1987.

Grants to local educational agencies and tribally controlled schools.—Formula grants are made to local educational agencies (LEAs) and tribal schools for supplemental elementary and secondary programs to meet the special educational and culturally related academic needs of Indian children. In 1985 about 1,100 grants were made to LEAs and certain tribal schools serving approximately 330,000 Indian students. Discretionary awards were made to tribally-controlled schools on or near reservations and to LEAs that have been in existence less than three years that serve substantial numbers of Indians. About 30 discretionary awards supported special projects at such schools and LEAs.

Special purpose funds.—

Projects for Indian children.—Grants are made to Indian tribes and organizations to support planning, pilot and demonstration projects, and educational service projects to improve the quality of educational programs for Indians.

Projects for Indian adults.—Competitive grants are made to Indian tribes, institutions, and organizations for programs to improve educational opportunities for Indian adults.

Higher education programs.—Awards are made to universities and to Indian tribes and organizations to train Indians for careers in education. Fellowships are awarded for Indian students in the fields of medicine, psychology, law, education, business administration, engineering, and natural resources.

Resource and evaluation centers.—Contracts are awarded to five centers to provide technical assistance and disseminate information to Indian education projects and applicants. Center staff conduct workshops, make site visits, and prepare and distribute printed materials.

Program administration.—Funds support the administrative expenses of the Office of Indian Education and the National Advisory Council on Indian Education, as well as planning and evaluation studies to provide information for policy decisions and program improvement.

In 1987, legislation will be proposed to amend the current Indian Education Act.

Proposed legislation would change the existing Indian education program to channel aid to local school districts through State educational agencies. A variety of activities, including remedial and compensatory instruction, guidance and counseling, and special programs for the handicapped, the gifted and talented, and preschool students would be authorized at the local level. Local educational agencies would be required to direct funds to students and services where the needs are greatest. Legislation would also authorize continued support of basic education programs for Indian adults.

State grants.—

State grant program.—This formula grant program assists States in providing a free appropriate public education and related services to all handicapped children. In order to participate in the program, States must provide services to handicapped children aged 6 through 17. Handicapped children aged 3 through 5, and 18 through 21 must also be served, except when such services would be inconsistent with State law or practice, or the order of any court. To be eligible for grants, each State is required to submit an acceptable State plan which requires the development and use of individualized education programs for each handicapped student, the establishment of procedural safeguards for all handicapped children and their parents, and the training of personnel for these special education programs.

Preschool incentive grants.—Grants are made to States based on the number of handicapped children aged 3 through 5 served. States may use funds to provide services to children from birth through age 5.

Special purpose funds.—

Special populations.—Grants and contracts are awarded for demonstrations, training, technical assistance and other purposes related to the education of severely handicapped (including deaf-blind) children, early childhood education, secondary and transitional services, and postsecondary education.

Research and technology.—Grants and contracts are awarded for special education research, development and evaluations, and the production of various media materials. Within the media materials area, special emphasis is placed on the production of captioned films and closed captioned television programming.

Training and information.—Grants and contracts are awarded for a variety of technical assistance and training activities including regional resource centers, training of special education personnel, and clearinghouses for information on handicapped educational resources and teacher recruitment.

Architectural barriers removal.—These funds for the removal of architectural barriers in schools will be awarded through State grants in 1986.

Vocational rehabilitation State grants.—The basic State grant program provides 80 percent Federal matching to State vocational rehabilitation agencies to assist physically and mentally handicapped individuals to become gainfully employed. Services provided include counseling, vocational evaluation, work adjustment, mental and physical restoration, education and vocational training, job placement, and post-employment services. Priority is given to serving those with the most severe disabilities.

The first table below presents estimates of the number of persons served and rehabilitated nationally. The 1986 estimates reflect resources requested for 1986 in the 1987 budget. The second table shows relative State performance in rehabilitating severely disabled persons. During 1986 the Department of Education will investigate various caseload and performance trends.

Special purpose funds.—

Client assistance.—Formula grants are made to States to provide assistance in informing and advising clients and applicants of benefits available under the Rehabilitation Act and, if requested, to pursue legal or administrative remedies to ensure the protection of the rights of individuals.

Innovation and expansion.—Formula grants are made to States for projects to expand vocational rehabilitation services to severely disabled persons through development of transition and supported employment programs.

Service and demonstration projects.—Grants are made for projects to expand services to disability groups who have been underserved in the past, to develop new and innovative approaches to meeting the needs of the severely disabled, and to provide disabled individuals special training and job opportunities in private industry.

Helen Keller Center.—The Center provides services to deaf-blind youths and adults and conducts research and training programs.

Independent living.—Project grants are awarded to support a network of nonresidential, community-based centers for individuals whose disabilities are so severe that they generally are ineligible for vocational rehabilitation. The centers provide services designed to enable these persons to live and function more independently.

Training.—Project grants are made to States and public or nonprofit agencies and organizations, including institutions of higher education, to increase the number of skilled personnel available for employment in rehabilitation settings.

National Institute for Handicapped Research.—The Institute carries out a comprehensive and coordinated program of rehabilitation research. Through grants and contracts, it supports research and training centers, rehabilitation engineering centers, research and demonstration projects, and information utilization projects. In the reimbursable program, the National Institute of Mental Health cosponsors research and training centers for rehabilitating persons disabled by mental illness.

Evaluation.—Studies are conducted to evaluate the impact and effectiveness of various programs authorized under the Rehabilitation Act.

PAYMENTS TO INSTITUTIONS FOR THE HANDICAPPED—Continued

This new account consolidates three prior accounts, each of which included a grant to a particular institution which serves handicapped students. The special shared relationship that each of these institutions enjoys with the Federal Government consists of congressional recognition of the institution in law and is reflected in the fact that the grants are the largest single source of institutional funds.

American Printing House for the Blind.—This institution provides educational materials to blind students below the college level. In 1985, Federal appropriations represented 45 percent of the institution's operating budget. Legislation has been proposed to eliminate the $10 thousand annual payment to the Printing House based on a 1879 trust fund. An offsetting increase of $10 thousand is included in the regular appropriation request.

National Technical Institute for the Deaf.—This institution is a national coeducational residential center that provides postsecondary technical education for deaf people to prepare them for successful employment. In 1985, Federal appropriations represented 85 percent of the institute's operating budget. The budget display shows separately the costs of educating victims of the rubella epidemic of 1964-65. Legislation will be proposed to create an endowment matching grant.

Gallaudet College.—This institution is a private, nonprofit educational institution which provides an undergraduate higher education program for deaf persons, a preparatory program for students who need such training to qualify them for college admission, a graduate program in fields of study related to deafness, and continuing education and public service programs appropriate to its postsecondary education mission. The budget display shows separately the costs of educating victims of the rubella epidemic of 1964-65.

Gallaudet also operates on campus the Model Secondary School for the Deaf, which serves deaf students of high school age, and the Kendall Demonstration Elementary School for younger children. In connection with their instructional programs, these schools also develop materials and methods for teaching deaf children.

In 1985, Federal appropriations represented 74 percent of the college's operating budget and 100 percent of the operating budgets of the related elementary and secondary schools. Legislation will be proposed to create an endowment matching grant.

Legislation will be proposed to create endowment matching grants at the National Technical Institute for the Deaf (NTID) and Gallaudet College. The grants will be similar to the one established at Howard University in 1985. These funds will provide further incentive to increase non-Federal support while decreasing the need for Federal funding in future years.

Legislation has been proposed to eliminate the $10 thousand annual payment based on the trust fund. An offsetting increase of $10 thousand is requested in the regular appropriation. Administration of the annual payment, which now amounts to less than one-tenth of 1 percent of the annual operating budget of this institution, is no longer cost-effective.

Vocational education—State programs.—

Basic grants.—This program provides State grants for vocational education expansion, innovation, and improvement and for providing greater access to vocational education for underserved populations. Under the 1987 budget proposal, States would be required to use the bulk of their funds to serve the handicapped, the disadvantaged, adults in need of training and retraining, single parents and homemakers, participants in programs designed to eliminate sex bias and stereotyping, and criminal offenders in correctional institutions.

State councils.—Councils are funded for the purpose of advising on and evaluating State vocational education programs. Each council is composed of 13 individuals, 7 of whom represent the private sector.

National programs.—

Research.—Funds are awarded on a competitive basis for research activities which contribute to improved access to vocational education for underserved populations and to improved vocational education in the Nation. Activities include a national center for research in vocational education, a national assessment of vocational education, and a program of discretionary research projects.

Data systems.—Funds are allocated annually to the Department of Labor for joint support of the National Occupational Information Coordinating Committee and 57 State occupational information coordinating committees. Funds also contribute to the support of the vocational education data system.

The Smith-Hughes Act of 1917 (Public Law 64-347), as amended, provides a permanent appropriation for vocational education basic grants and national programs.

Adult education.—Formula grants are made to States to eliminate functional illiteracy among the Nation's adults and to assist adults in obtaining a high school diploma or its equivalent. Funds may be used to increase the involvement of the private sector in the delivery of adult education services. Funds are also requested for the Secretary to support discretionary research, demonstration and evaluation activities.

NOTES

[1] The 1986 loan level is subject to sequestration under Public Law 99–177. The post-sequestration loan level constitutes a de facto limitation.

[2] Represents in all years institutional matching share of defaulted loans assigned to the Education Department. 1986 reflects funds transferred to Guaranteed student loans (−$17,675 thousand) for 1968 advances for guarantee agency reserve funds as well as assignments ($5,565 thousand).

This account finances several programs of aid to students in postsecondary education. For 1987, reauthorization legislation will be proposed.

Pell grants.—Undergraduate students establish eligibility for these grants through application to a federally managed system of assessment of need, including individual and parental ability to contribute. In 1986 the Secretary will exercise his statutory authority to reduce awards to ensure that school year 1986–87 program costs do not exceed the 1986 appropriations; the current estimate of the resulting "linear reduction" is $369 million.

Supplemental opportunity grants.—Funds are allocated by formula among States and distributed to participating schools which use them at their discretion to

General and special funds—Continued

award grants to undergraduates with demonstrated need.

Work study.—Funds are allocated by formula among States and distributed to participating schools. Schools must partially match the funds. The resulting amount is used to subsidize jobs with non-profit employers (including the schools themselves) for students with demonstrated need. Awards are made at the school's discretion.

Direct student loans.—Under the national direct student loan (NDSL) program, schools operate revolving loan funds capitalized in part with Federal contributions allocated among States by formula and distributed to participating schools. Loans are made at the school's discretion to students with demonstrated need. Most loans are financed by repayments and other income in the funds. The interest rate is 5 percent, with repayment generally beginning after leaving school. Certain deferments to delay repayment are available.

Funds requested under the NDSL loan cancellation authority reimburse school revolving funds for indebtedness cancelled as a result of the borrower engaging in certain military service or specified types of teaching.

State student incentive grants.—States receive formula grants which they match and use to provide grants to undergraduates based on a determination of need.

The following tables display aid funds available and number of aid awards, including aid under the guaranteed student loan (GSL) program, under the administration's reauthorization proposal and budget request. For work study and direct loans, the chart includes the effect of matching funds. Direct loan amounts are all loans from revolving funds, regardless of source of capital. Guaranteed loan amounts are loan capital, not the Federal costs of those loans.

Grant, work and loan programs would provide need-based aid to postsecondary students. A single need analysis system would apply to all programs and assume increased support from parents and increased student self-help. The system would adopt a more rigorous measure of independent student status. Only those with high school degrees or the equivalent would be eligible for aid. Schools would not receive administrative cost allowances.

Pell grants.—Funds would be requested for a proposed Pell Grant program to supplement the self-help efforts of needy students. The proposed program would provide for a maximum grant of the lesser of $2,100 or 60 percent of the cost of education, both less the expected family contribution. In addition, $250 million would be requested in 1987, with another $240 million projected in 1988, to eliminate the shortfall accumulated by the end of 1985.

Campus-based aid—work/grants.—Funds would be allocated among States to institutions of higher education for a combined grant and work-study award. Institutions could not use more than 50 percent of their allocations for grant aid. Federal funds would have to be matched by non-Federal funds; the non-Federal match would increase from 20% in 1987 to 50% in 1990.

Income-contingent student loans.—Under a restructuring of the current NDSL program, institutions would make student loans that are repayable on an income-contingent basis; that is, monthly repayment amounts would vary with post-school annual earnings. Maximum loan amounts would be increased at both the undergraduate and graduate levels; the lifetime borrowing limit would be increased as well. Interest would be charged on a borrower's outstanding loan balance, beginning at the time of first loan disbursement, and would be set for each calendar year at 3 percent above the average rate of 91-day Treasury bills sold during the calendar quarter ending the previous September 30.

The guaranteed student loan (GSL) program is designed to promote the availability of loans from banks and other lenders to students and their parents to help meet the costs of attending participating universities, colleges, and other postsecondary institutions after taking into consideration family financial resources and student self-help. This is accomplished through the provision of Federal reinsurance against borrower default as well as through substantial Federal subsidy payments. In general, the program is administered by State and private nonprofit guarantee agencies which serve as intermediate loan insurers, defaulted loan collectors, and providers of various services to lenders. Through July 1984, the Federal Government also provided direct loan insurance and, in such cases, is responsible for defaulted loan collection and providing assistance to lenders. Since direct loan guarantees are no longer being made, the costs of this activity are not separately displayed.

Two types of guaranteed loans are currently available through the program: Under the regular loan component, students may borrow highly subsidized loans; under the PLUS (Parent Loans to Undergraduate Students) loan component, certain students and parents can borrow less-subsidized loans. Each program has both annual and cumulative limits on loan amounts. All loans can be used only to meet educational expenses. Evidence of financial need is required for a student to receive a regular student loan when family adjusted gross income is over $30,000.

The Federal Government pays lenders a quarterly special allowance throughout the life of each loan. This allowance assures lenders a total yield equal to the current 91-day Treasury bill rate plus 3½ percent or the interest rate to the borrower, whichever is higher. The Government is also liable for up to 100 percent of costs related to borrower default, death, disability, and bankruptcy.

Under the regular loan component, the Federal Government pays the interest obligation (generally 8 percent on new loans) of eligible borrowers while they are in school and during grace and certain deferment periods. Federal interest benefit costs are offset by an origination fee of 5 percent of loan principal which is charged to borrowers.

Under the PLUS loan component, graduate students, independent undergraduate students, and parents of dependent undergraduate students may borrow to meet the student's educational expenses. Unlike the regular loan program, the borrower's interest obligation during in-school, grace, and deferment periods (12 percent) is not paid by the Federal Government.

Finally, the Federal Government once paid administrative cost allowances to guarantee agencies and provided them with reserve fund advances. No funds are requested for these activities.

Federal receipts primarily include collections on defaulted loans and reimbursements from guarantee agencies for their default collections.

Proposals to improve the design and operation of this program would substantially modify program activity and cost. Total loan volume insured under such proposals is expected to be $9,304 million in 1987, resulting in outstanding loans at the end of 1987 of $41,492 million. The following tables reflect the proposed program improvements.

Costs to the Federal Government related to a particular loan accrue throughout the period the loan is outstanding, which can be extended up to 15 years. Federal costs on regular loans are significantly reduced through the origination fees, used to offset interest subsidy costs, and would similarly be reduced under a proposed default guarantee fee, intended to reinforce insurance features of the program by having borrowers share more of the risk of default costs. Indeed, as the following table illustrates, net first year obligations may in fact be negative. Costs in the budget year, therefore, largely are determined by the cost of loans outstanding at the start of the year.

Increased efforts are being made to collect outstanding defaults and to reduce the incidence of default. These efforts include: Expanding collection activities by referring both insured and reinsured defaulted loans to private collection agencies, sharing information on defaulted loans with consumer credit bureaus, computer matches to locate defaulters, increased litigation, increased lender due diligence requirements, and closer monitoring of collection activity. A major initiative now underway involves the deduction from Federal tax refunds of defaulted loan amounts. This initiative is expected to result in repayments of $90 million in 1986 and $201 million in 1987. Outstanding defaults owed to the Federal Government in 1985–87 are as follows:

The 1986 appropriation is currently estimated to be insufficient by $65,044 thousand to finance mandatory 1986 program costs. Since these costs depend directly not on known costs but rather on forecasts of factors such as interest rates and borrower behavior, and because the estimated deficiency is relatively small, no supplemental appropriation is requested at this time. If it becomes clear later in 1986 that the current appropriation will not suffice for mandatory expenses, funds will be requested to cover unfinanced costs.

The guaranteed student loan (GSL) program under proposed legislation will promote the availability of loans to students and their parents to help meet the costs of postsecondary education. The proposed program will reduce Federal costs and unnecessary Federal subsidies, increase risk-sharing with borrowers, lenders, and guarantee agencies, decrease defaults, promote guarantee agency cost-sharing for adminstration costs, and improve program administration.

NOTES

The activity previously financed under Department of Education, Office of Postsecondary Education, Grants for construction of academic facilities in 1984 is presented in the schedules for this account in 1985 and 1986. Budget authority and outlays are distributed by account above.

The end of year obligated balances include $8,226 thousand contingently obligated under court order. These obligations were made as follows: 1983, $4,233 thousand; 1984, $1,342 thousand; 1985, $2,651 thousand.

For 1986, funds appropriated for the Federated States of Micronesia and the Marshall Islands are not available pursuant to section 514 of P.L. 99-178. Specific amounts were not available at the time this budget was prepared.

1. *Aid for institutional development.*—Proposed legislation would emphasize the developmental objective of the program and focus Federal resources on helping eligible institutions develop financial stability so that they no longer need annual Title III assistance. Eligibility requirements would be modified to promote more equal treatment of institutions, and to target funding to institutions lacking the financial base necessary for

them to continue providing educational services. The current $45,741,000 set-aside for historically Black colleges and universities would be maintained.

(a) Endowment grants.—The goal of the endowment grant program would be to build, over time, a $10 million endowment fund for each eligible institution. Variable matching grants would be established under the program to take into account the relative differences among institutions in ability to pay.

(b) Development grants.—The development grant program would offer two types of awards: small renewable one-to-three year non-matching grants and larger nonrenewable one-to-five year grants with escalating matching requirements in the out-years.

2. *Aid for disadvantaged students.*—Proposed legislation would introduce cost-sharing and graduation reforms, eliminate inappropriate activities, and streamline the administration of needed student support outreach activities.

(a) Postsecondary outreach.—Proposed legislation would consolidate the TRIO Upward Bound, Talent Search, and Educational Opportunity Centers programs, the Migrant High School Equivalency Program, and some Continuing Education outreach activities into a single outreach program.

(b) Special college services.—Proposed legislation would consolidate the TRIO Special Services and College Assistance Migrant programs into a single program. Grants would be authorized to provide the counseling and academic support needed by disadvantaged students once they have entered college.

3. *Program development*—(a) *Minority institutions science improvement.*—This program is designed to effect long-range improvement in science education at predominantly minority institutions. Legislation will be proposed to reauthorize this program.

(b) *Fund for the improvement of postsecondary education.*—This program supports locally developed projects which have potential for addressing problems and opportunities for improvement in postsecondary education. Legislation will be proposed to reauthorize this program.

Howard University is a private, nonprofit educational institution consisting of 17 schools and colleges. Federal funds are used to provide partial support for the academic program as well as for the teaching hospital facilities. In 1985, direct Federal appropriations represented 61 percent of the University's operating budget.

1264	Adjustments: Other adjustments, net	−1,900		
1290	Outstanding, end of year	355,957	338,731	321,538

Note.—Adjustments in 1985 represent reconciliations with inventory records (−$380 thousand) and write-downs for prepayment discounts (−$1,520 thousand).

Program operations.—Title VII, Part C, of the Higher Education Act of 1965 authorizes direct loans at 4 percent interest, repayable within 50 years, to colleges, universities, and higher education building agencies for the construction, reconstruction, or renovation of academic facilities. No new loan commitments have been made since 1981. The program authorization expires at the end of 1986, and no new loan commitments are planned for 1987 and beyond.

Financing.—Loan capital for this program has been provided both through appropriations and the sale of participation certificates which are backed by pools of existing higher education facilities loans held by the Federal Government.

Interest is payable to Treasury on the amount of appropriations paid out for loan capital and remaining outstanding, less the average undisbursed cash balance in the fund during the year. The interest rate certified by Treasury for payment from the account was 12.5 percent in 1985 and is expected to be about the same in 1986 and 1987.

Sales of participation certificates by the Government National Mortgage Association (GNMA) were provided for under the Participation Sales Act of 1966, and were authorized specifically for higher education facilities loans under appropriation acts in 1967 and 1968. The participation certificates outstanding held by this account total $108,049 thousand as of September 30, 1985, and are expected to remain at this level in 1986, while declining to $87,189 thousand in 1987.

Insufficiencies appropriations may be used to finance any deficit resulting from the interest rate payable on participation certificates being higher than the interest rate paid by institutions on pledged loans. The budget authority required for insufficiencies is computed as follows:

PARTICIPATION INSUFFICIENCIES

[In thousands of dollars]

	1985 actual	1986 estimate	1987 estimate
Interest accrued on participation certificates	6,508	6,508	5,991

Carried forward to subsequent period	2,748	5,555	1,000
Amount transferred for repayment of participation certificates			7,517
Budget authority required			

Note.—Excludes additional amounts required to fund interest payments due to Treasury.

The program appropriation, alo~~ng with~~ repayments on outstanding loans, interest revenue, and investment income will be used to pay operating expenses and to amortize the outstanding debt on participation certificates. It is anticipated that $20 million will be transferred to GNMA in 1987.

The budget provides $17 thousand to fund facilities management and property disposition expenses related to loan collection action in 1987. Expenses associated with loan servicing will be paid for with Salaries and expenses account funds.

A total of $1.9 million was collected in 1985 from institutions in default. The status of defaulted loans is shown in the table below:

1290	Outstanding, end of year	2,300,426	2,279,643	1,167,064

Note.—Adjustments in 1985 represent reconciliations with inventory records (−$186,692 thousand) and write-downs for prepayment discounts (−$31,860 thousand); adjustments in 1987 represent write-downs for discounts on loan asset sales.

Program operations.—Title IV of the Housing Act of 1950 authorizes direct loans at 3 percent interest to colleges, universities, certain other postsecondary schools, and eligible college housing agencies for the construction, renovation, or acquisition of student and faculty housing and related facilities. Such loans may be made for up to $3.5 million and must normally be repaid within 30 years. New loan commitments totaling $40 million were made in 1985, and $60 million is authorized for 1986. No new loan commitments are proposed for 1986 and beyond.

Financing.—Loan capital for this program has been provided primarily through Treasury borrowings and the sale of participation certificates which are backed by pools of existing college housing loans held by the Federal Government.

As of September 30, 1985, $2,625.3 million was borrowed. Interest, at a rate of 2.75 percent, is payable to Treasury on the total borrowings, less the average undisbursed cash balance in the fund during the year.

Sales of participation certificates by the Government National Mortgage Association (GNMA) were provided for under the Participation Sales Act of 1966, and were authorized specifically for college housing loans under appropriation acts in 1967 and 1968. The participation certificates outstanding held by this account total $451,504 thousand as of September 30, 1985, and are expected to remain at this level during 1986, while declining to $446,806 thousand in 1987.

Insufficiencies appropriations may be used to finance any deficit resulting from the interest rate payable on participation certificates being higher than the interest rate paid by institutions on pledged loans. The budget authority required for insufficiencies is computed as follows:

PARTICIPATION INSUFFICIENCIES

[In thousands of dollars]

	1985 actual	1986 estimate	1987 estimate
Interest accrued on participation certificates	28,138	28,138	28,021

Insufficiency	24,942	28,138	28,021
Financed by:			
Investment income from participation sales fund, net	−44,949	−50,930	−52,979
Amount financed from (−) or repaid to other funds	20,007	22,792	24,958
Budget authority required			

The estimated net operating income and income adjustments of −$504.6 million will bring the cumulative deficit to $724.5 million in 1987.

In 1987, the Secretary will begin sales of loans to the public. Available resources (loan repayments, interest revenue, loan sale proceeds, investment income, and other income in excess of operating expenses) will be used to redeem a portion of the agency's debt in outstanding Treasury borrowings, as is being done in 1986 and as was done in 1985. It is anticipated that $617 million will be repaid to Treasury in 1987; $41 million is anticipated to be repaid in 1986, while $62 million was repaid in 1985.

A total of $199.4 million was collected in principal repayments in 1985, including $129.4 million in discounted loan prepayments.

The budget provides $79 thousand to fund facilities management and property disposition expenses related to loan collection action in 1987. Expenses associated with auditing, facility inspections, and loan servicing will be paid for with Salaries and expenses account funds.

A total of $4 million was collected in 1985 from institutions in default. The status of defaulted loans is shown in the table below:

Research, statistics, dissemination, and improvement activities aid students, teachers, administrators, and decisionmakers at all levels of education.

Research centers focus on topics of national concern in education. Regional laboratories determine and help meet the educational R&D needs in specified geographic regions.

The National Assessment of Educational Progress surveys young Americans to provide reliable information about the nation's attainment in certain important skill areas. The Educational Resources Information Center system makes the education literature accessible through computerized abstracts and indexes.

Statistics are collected on educational institutions and on individuals to monitor trends in education. A coordinated program of statistical services is supported which provides assistance to States in developing comparable data bases and analyses of the implications of data.

Dissemination activities provide timely information to the public and educational practitioners. Additional individual projects are supported, as well as study groups and national leadership conferences.

NOTES

The activities financed in 1985 and 1986 under Department of Education, Departmental Management, Salaries and expenses, Department of Education, Departmental Management, Office for Civil Rights, and Department of Education, Departmental Management, Office of the Inspector General are presented in these schedules and are proposed to be financed in this account in 1987. Budget authority and outlays are distributed by account above.

The end of year obligated balances include $18,475 thousand contingently obligated under court order. These obligations were made as follows 1983, $9,504 thousand; 1984, $6,095 thousand; 1985, $2,876 thousand. In 1983, these obligations were distributed by account as follows Departmental Management, Salaries and expenses, $7,924 thousand; Departmental Management, Office for Civil Rights, $1,468 thousand; Departmental Management, Office of the Inspector General, $112 thousand. In 1984, these obligations were distributed by account as follows Departmental Management, Salaries and expenses, $3,331 thousand; Departmental Management, Office for Civil Rights, $2,694 thousand; Departmental Management, Office of the Inspector General, $70 thousand. In 1985, those obligations were distributed by account as follows Departmental Management, Salaries and expenses, $380 thousand; Departmental Management, Office for Civil Rights, $2,448 thousand; Departmental Management, Office of the Inspector General, $47 thousand.

The request reflects savings due to management initiatives resulting from the implementation of the President's management reform initiatives.

Postsecondary education.—The postsecondary education activity includes direct costs of administering student aid and other higher education programs.

Other education programs.—This activity includes direct costs of administering elementary and secondary education, bilingual education, vocational and adult education, handicapped education, and rehabilitation services programs. This activity also supports educational research and improvement activities.

Civil rights.—The Office for Civil Rights carries out enforcement programs under title VI of the Civil Rights Act of 1964 (racial and ethnic discrimination), title IX of the Education amendments of 1972 (sex discrimination), section 504 of the Rehabilitation Act of 1973 (discrimination against the handicapped), and the Age Discrimination Act of 1975.

Inspector General.—The Inspector General is responsible for the quality, coverage, and coordination of audit, investigation, and security functions relating to Federal education activities. The Inspector General has the authority to inquire into all activities of the Department including those performed under Federal education contracts, grants, or other agreements.

Executive direction.—This activity supports the centralized policy, management, and administrative functions carried out by the Department. These functions include overall policy development and guidance, strategic planning, development and support of legislative initiatives, budget formulation, program and management evaluation, legal services, congressional and public relations, intergovernmental affairs, financial management and accounting, and provision of administrative support services in such areas as ADP, personnel, and procurement.

Reimbursable program.—Beginning in 1986, reimbursements to this account include the costs of collecting defaulted student loans, primarily guaranteed student loans. The collections are made under contract with private agencies and the costs are financed from collections.

Spending in 1985 and 1986 derives from contributions from the public for the Mina Shaughnessy Scholars Program of the Fund for the Improvement of Postsecondary Education and for the National Advisory Council on Continuing Education Conference on adults in higher education.

No new contributions from any source are currently anticipated for 1986 or 1987.

GENERAL PROVISIONS

SEC. 301. None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 302. Funds appropriated in this Act to the American Printing House for the Blind, Howard University, the National Technical Institute for the Deaf, and Gallaudet College shall be subject to audit by the Secretary of Education.

SEC. 303. No part of the funds contained in this title may be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to force on account of race, creed or color the abolishment of any school so desegregated; or to force the transfer or assignment of any student attending any elementary or secondary school so desegregated to or from a particular school over the protest of his or her parents or parent.

SEC. 304. (a) No part of the funds contained in this title shall be used to force any school or school district which is desegregated as that term is defined in title IV of the Civil Rights Act of 1964, Public Law 88-352, to take any action to force the busing of students; to require the abolishment of any school so desegregated; or to force on account of race, creed or color the transfer of students to or from a particular school so desegregated as a condition precedent to obtaining Federal funds otherwise available to any State, school district or school.

(b) No funds appropriated in this Act may be used for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to overcome racial imbalance in any school or school system, or for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to carry out a plan of racial desegregation of any school or school system.

SEC. 305. None of the funds contained in this Act shall be used to require, directly or indirectly, the transportation of any student to a school other than the school which is nearest the student's home, except for a student requiring special education, to the school offering such special education, in order to comply with title VI of the Civil Rights Act of 1964. For the purpose of this section an indirect requirement of transportation of students includes the transportation of students to carry out a plan involving the reorganization of the grade structure of schools, the pairing of schools, or the clustering of schools, or any combination of grade restructuring, pairing or clustering. The prohibition described in this section does not include the establishment of magnet schools.

SEC. 306. No funds appropriated under this Act may be used to prevent the implementation of programs of voluntary prayer and meditation in the public schools.

SEC. 307. Section 402(c) of the Housing Act of 1950 is amended by striking out in clause (9) "October 1, [1985] *1986*" and inserting in its place "October 1, [1986] *1987*".

SEC. 308. None of the funds provided in this title shall be used to pay any recipient of a grant for the conduct of research an amount equal to the entire cost of such research. (Department of Education Appropriation Act, 1986.)

Naval reactors development.—This program provides for the design, development, and testing of improved naval nuclear propulsion plants and reactor cores having longer core life, increased reliability, improved performance, and simplified operating and maintenance requirements. These reactors are necessary to meet a variety of military requirements. During 1987 efforts will continue to improve existing submarine and surface ship reactors and plant components and to develop new advanced reactor concepts and propulsion plants. This program also continues test facility upgrading and provides equipment to support ongoing reactor design research and testing activities.

Weapons activities.—This program provides for the research, development, engineering, testing, and production of all U.S. nuclear weapons; maintenance of these weapons for their stockpile life, and retirement and disposal of nuclear weapons from the stockpile. In 1987, the weapons program will continue to provide new technology to maintain a modern nuclear force, along with the design and development of new weapon systems in response to defense requirements. This program also provides for the certification of safety, reliability, and performance of new weapon systems and surveillance of the existing stockpile. Increases are provided for continued production of weapon systems and for stockpile improvements consistent with the Presidential Nuclear Weapons Stockpile Memorandum. In addition, this program provides for facility construction, maintenance, and restoration for the weapons research and development, testing, and production activities.

Verification and control technology.—This program provides for research activities directed toward the advancement of verification technology related to nuclear treaties and arms control measures. In 1987, the program provides for continued technical and scientific efforts to support nuclear test limitation treaties and nuclear arms reduction negotiations. Other activities provide analytical support to export control requirements, nonproliferation policy, and weapon analysis issues. This program also provides capital equipment for nuclear detection technology efforts and analytical support activities.

Materials production.—This program provides nuclear materials to meet near-term national defense and nondefense requirements and sustain a base production program capable of meeting long-term nuclear materials production requirements consistent with the annual Presidential Nuclear Weapons Stockpile Memorandum and the annual Materials Management Plan. In 1987, this program will operate a reactor feed material production complex, five production reactors, chemical processing plants at three major sites, and support facilities integral to the operation of these facilities. The program will also conduct R&D efforts on long-range alternatives for production of nuclear materials. Activi-

ties will continue to increase production of nuclear materials including producing high purity plutonium for blending with fuel-grade plutonium to produce weapon-grade plutonium. A program to improve productivity at Savannah River, Richland, and Oak Ridge will be continued. In addition, environmental protection and physical security and safeguard matters will continue to be addressed at all materials production sites.

Defense waste and byproducts management.—This program provides for safe interim storage of nuclear wastes and utilization of byproducts generated primarily from nuclear materials production and naval propulsion; and for the development of alternative technologies and processes to support final disposal of defense nuclear waste. The 1987 program provides funds for continuation of the waste operations program including transfer of wastes to new tanks and long-term improvements, including construction of the Defense Waste Processing Facility at the Savannah River plant in South Carolina and preparation for operation of the Waste Isolation Pilot Plant near Carlsbad, New Mexico.

Nuclear safeguards and security.—This program provides for the development of measures for the protection of nuclear weapons in the agency's custody, special nuclear materials, classified materials and information, and agency property. In 1987, this program will continue development of procedures that preclude the unauthorized disclosure, theft, or loss of classified material; management of a research and development program to safeguard nuclear weapons and nuclear materials and protect agency facilities against sabotage; providing for assistance to site managers in designing effective safeguards systems; and support of international safeguards technology.

Security investigations.—This activity covers the costs of security investigations for personnel who, in performance of their official duties, must have access to restricted data, national security information or special nuclear material, or who occupy a designated critical sensitive position.

High energy physics.—Research in this program focuses on the fundamental constituents of matter, the fundamental forces in nature and the tranformations between matter and energy at the most elemental level. The program includes experimental and theoretical particle physics research and related advanced accelerator and detector technology R&D. The primary mode of experimental research involves the study of collisions of energetic particles using large particle accelerators or colliding beam facilities by means of advanced multiparticle detector systems and associated electronics. Research in 1987 will continue studies of known fundamental constituents of particles, initiate searches for new particle constituents, and continue to pursue a unified description of the four fundamental forces in nature.

The 1987 high energy physics budget request provides funding for the initial operation of the Tevatron I and Stanford Linear Collider (SLC); continuation of the Central Computing Facility project at Fermilab and the Alternating Gradient Synchrotron (AGS) Accumulator/Booster Ring at Brookhaven National Laboratory; and further advanced accelerator and detector R&D related to the next generation high energy particle accelerator. The operation of the Tevatron I will provide the capability for utilizing Fermilab's superconducting synchrotron as a 1000 GeV on 1000 GeV proton anti-proton collider, while Stanford Linear Accelerator Center's SLC will produce 50 GeV on 50 GeV electron-positron collisions. Both facilities will allow access into previously unexplored areas of high energy physics. The request also provides continuing support for effective participation by university based groups in experimental research including accelerator user group efforts and nonaccelerator experiments, and for theoretical research efforts. The 1987 high energy physics capital equipment request provides for meeting the highest priority needs associated with the detectors required to implement the research programs using the new capabilities being provided by the Tevatron I proton anti-proton collider at Fermilab and by the SLC electron-positron collider at SLAC.

Nuclear physics.—Research in this program strives to attain a deeper understanding of the interactions, properties, and structures of atomic nuclei and nuclear matter at a fundamental level through interdependent accelerator experiments and theoretical investigations of atomic nuclei. The program supports the operation of seven national accelerator facilities whose beams are available to all qualified scientists, and four dedicated university accelerator facilities.

The 1987 nuclear physics budget request provides for a heavy ion nuclear research and accelerator program at the Alternating Gradient Synchrotron at Brookhaven and for construction of the Continuous Electron Beam Accelerator Facility at Newport News, Virginia. Program emphasis in 1987 centers on the role that quarks play in the makeup and interactions of nuclei, nuclei as proving grounds for understanding the basic strong and electroweak forces of nature, possible existence of new forms of nuclear matter, and, the mechanisms by which colliding nuclei exchange mass, energy, and angular momentum

General science program direction.—Provides direction, management, and administrative support to all programs within general science.

The purpose of energy supply, research and development is to develop new energy technologies and improve existing energy technologies. Included in this mission are basic and applied research, with selected technology development.

This account provides funds for operating expenses, capital equipment and construction projects for the research and technological development of the various energy technologies under examination in the energy supply, research and development mission.

Solar and renewable energy.—The solar and renewable programs support research and development that will strengthen the technology base on which industry can draw in developing future new products and processes for the commercial market. The programs support activities ranging from basic research in universities and national laboratories to applied R&D and proof-of-concept projects in industrial firms.

Reductions in the renewable energy R&D programs are proposed in the 1987 budget consistent with budgetary constraints. In addition, a new innovative cooperative R&D approach will be carefully reviewed and expressions of interest will be solicited from the industry. Partnerships with industry cooperative R&D ventures to support longer-term high-risk applied technology development of generic or precompetitive nature can offer an effective method to increase leverage of Federal moneys and increase program impact. This is intended to promote more effective technology transfer and to allow broader research support within current fiscal constraints.

Solar energy technology.—The 1987 solar energy program will support generic and long-range research in a wide variety of alternative energy technologies, structured to provide a sound base from which industry can draw particular applications. The major areas being investigated, as in past years, are moderate and high-temperature solar heat, photovoltaics, biofuels, wind, and solar building technologies. The main research topics being pursued at universities and national laboratories within these application areas are materials sciences, aerodynamic/fluid-dynamic modeling, and thermodynamic cycles. Industry will be involved in applied research in these areas. In addition, funds are provided for technology transfer and international cooperative activities, generic resource assessments, and capital improvements at the Solar Energy Research Institute.

Hydropower and geothermal technology.—The 1987 geothermal and hydropower programs will support basic engineering research in hydrothermal and magma energy extraction technologies for geothermal energy and technical information and technology transfer regarding small-scale hydro. The program effort will also include research on geothermal resources such as engineering development in geopressured and hot dry rock resources.

Energy storage and distribution.—The 1987 electric energy systems program will support basic engineering work in EMP effects and new materials for efficient electrical power transmission, biomedical research on the effects of electric fields, utility reliability, and automation studies. The 1987 energy storage program will continue its generic research into electrochemistry for a variety of battery types, and in thermal and hydrogen chemical energy storage. The battery work includes research in electrochemical materials, sodium/sulphur battery development and metal-air cells.

Nuclear fission.—Major portions of the nuclear fission R&D program were consolidated and restructured to phase down the Advanced Reactor and Breeder Reactor programs and to shift efforts to meet space and military nuclear power requirements. Thus, the restructured program will serve national security interests while maintaining a technical and industrial base for any future decision to deploy advanced nuclear technologies in the commercial sector. The Advanced Light Water program will continue to work toward regulatory reform and plant standardization and, through cooperative programs with industry, toward breakthroughs in LWR safety and economic performance. The space and defense advanced nuclear power systems program will continue development work on space power system for use in U.S. space missions and in support of the Strategic Defense Initiatives Office and other military applications.

The remedial actions program includes efforts to treat or stabilize radioactive wastes and perform required decontamination and decommissioning at contaminated DOE and legislatively dictated non-government facilities and sites. The major program areas are the Formerly Utilized Sites Remedial Action program, the Grand Junction Remedial Action program, the Uranium Mill Tailings Remedial Action program for inactive uranium mill tailings sites, the Surplus Facilities program for DOE contaminated facilities declared surplus and resulting principally from civilian nuclear energy programs, such as decommissioning the Shippingport reactor, and the West Valley Demonstration project, which will demonstrate the solidification of high-level radioactive waste.

Environment, safety and health.—1987 will be the first full year of consolidation of oversight responsibilities for environment, safety, and health functions under the Assistant Secretary for Environment, Safety and Health. These functions constitute independent assurance of environmental protection safety and health protection throughout the Department. In 1987 an Environmental Survey of DOE facilities will be conducted to identify existing areas of environmental risk and prioritize and plan corrective actions. Technical Safety Appraisals of DOE's high- and moderate-hazard nuclear facilities will determine compliance with safety requirements, industry lessons learned, and licensed facility requirements, as appropriate. In addition to these primary activities, this program will perform Departmental coordination on environmental compliance issues; analyze environmental policy issues; maintain radiological emergency response resources; perform quality assurance activities; continue operational safety and health protection functions; and conduct National Environmental Policy Act (NEPA) assurance functions.

Biological and environmental research.—This program develops and conducts health and environmental research in areas related to energy technologies and supports the development of new medical applications of radiation for the treatment of human disease. Planned 1987 activities include programs in atmospheric processes as they relate to acid rain and carbon dioxide climatic effects; terrestrial and oceanographic processes; molecular, cellular and systemic studies on the biological effects of radiation, including radon emissions; nuclear medicine, structural biology, molecular epidemiology, and long-term biotechnology related projects.

Spill test facility.—The overall goal is to conduct user-sponsored spill tests in support of safety research associated with the handling, shipping and storage of liquefied gaseous fuels and other hazardous fluids. The 1987 efforts will be directed to assuring program continuity and facility responsiveness to user sponsored testing activities.

Magnetic fusion.—The goal of this program is to establish the scientific and technological base required for fusion energy. The 1987 budget request has been developed to take advantage of the technical position that has already been established in fusion research. It will allow a continuation of cost-effective progress toward the development of fusion power as a future energy option and supports effective utilization of international collaboration. The program emphasis is focused on the nearer-term benefits of increasing the understanding of plasma physics and other related scientific fields as well as the training of scientists and engineers. The longer-term program goal of fusion energy continues to

(INCLUDING TRANSFER OF FUNDS)—Continued

be pursued but at a pace more consistent with our national energy needs.

Supporting research and technical analysis.—The role of these programs is to expand the scientific and engineering base for future energy technology development and to provide independent objective evaluations of energy research activities. Support is also provided for university related research and manpower training including the use of facilities at the national laboratories for student research and education.

Basic energy sciences.—This program funds basic research in the physical, biological, and engineering sciences in support of both the nuclear and non-nuclear technology programs. The principal focus of the program is energy; however, a number of other important national goals are also supported including U.S. leadership in science and technology and the training of scientists and engineers. In 1987, work will continue in materials sciences, chemical sciences, nuclear sciences, advanced energy projects, biological energy research, and research in engineering systems, applied mathematics, and the geosciences. Research related to advanced materials development, combustion, chemistry of coal, catalysts, photochemistry, nondestructive evaluation techniques and support for existing as well as proposed new unique national user research facilities will be continued. In 1987, the construction of the Center for Advanced Materials at Lawrence Berkeley Laboratory, the upgrade of the National Synchrotron Light Source at Brookhaven National Laboratory, and the enhancement to the Stanford Synchrotron Radiation Laboratory at the Stanford Linear Accelerator Center will continue. In addition, construction funds are provided for general plant projects, accelerator improvements and modifications, the ion collision physics facility at Kansas State University, Neutron Scattering Experimental Hall at Los Alamos National Laboratory, and the 1-2 GeV Synchrotron at Lawrence Berkeley Laboratory.

University research instrumentation.—This program supports the purchase of state-of-the-art scientific instrumentation used in energy-related research areas such as geological sciences, materials characterization, catalysis, and health effects research.

University research support.—This program helps maintain strong scientific/technical research capabilities in support of the Department's long-range energy R&D mission in the university and private sector and the national laboratories. Specific activities supported include: university reactor fuel assistance; university laboratory cooperative research; energy manpower development; and related education and training activities.

Energy research analysis.—This activity involves the independent assessment of existing or proposed technological initiatives, including examination of the base of research that underlies energy supply and utilization technologies.

Multiprogram energy laboratories facilities support.—The goal of the multiprogram facilities program is to provide funds for rehabilitating and replacing deficient common-use utilities, roads, and buildings at the multiprogram laboratories and to provide support for environmental compliance activities at Oak Ridge National Laboratory. Following the completion of a major scoping study of environmental problems at ORNL in 1986, the environmental compliance program will fund several major environmental projects in 1987. These can be expected to correct deficiencies in the following categories: process waste systems, hazardous and toxic material management, and watershed and storm sewer discharge projects.

In-house energy management.—This program funds energy conservation retrofit projects at Department facilities. These projects are designed to improve the efficiency of DOE energy use and set an example for other Federal agencies and the private sector. Surveys are conducted to identify cost-effective candidate projects and projects are then selected on a competitive basis using as the primary criterion the greatest economic return.

Technical information/management program.—This program contributes to DOE's missions in advancing energy and nuclear defense technologies and protecting U.S. economic and military security through the effective management and control of the Department's scientific and technical knowledge which is contained in its information resources. Major objectives which are structured to meet the overall purpose are the effective management, control, and use of the results of DOE's multibillion dollar research program, and the acquisition and management of results of worldwide investment in energy R&D.

Plant engineering and design.—This program identifies and supports through the advanced funding of Architect-Engineering (A-E) services those proposed construction projects considered critical to timely accomplishment of energy activities. A-E services permit designated non-defense projects to proceed from conception.

Policy and management.—Provides executive direction, management assistance and administrative support to all programs within energy supply activities.

Uranium enrichment operating expenses.—The goal of this program is to meet domestic, foreign and United States Government requirements for uranium enrichment services (enrichment of uranium and uranium compounds in the isotope U-235) in the most economical, reliable, safe, secure and environmentally acceptable manner possible. This program is comprised of four subprograms: (a) gaseous diffusion operations and support; (b) Atomic Vapor Laser Isotope Separation (AVLIS); (c) Gas Centrifuge progam closeout activities; and; (d) program direction.

The gaseous diffusion operations and support program provides for all activities related to operation and maintenance of the gaseous diffusion enrichment plants located at Paducah, Kentucky, and Portsmouth, Ohio.

General and special funds—Continued

URANIUM SUPPLY AND ENRICHMENT ACTIVITIES—Continued

The gaseous diffusion plant at Oak Ridge will be maintained in a standby condition.

The AVLIS program provides for the development of a laser-based enrichment process. In 1987, the Department will take steps to transfer the responsibility for further development of AVLIS to the private sector.

The gas centrifuge closeout program provides for closeout of the advanced gas centrifuge enrichment process and for the termination of the Gas Centrifuge Enrichment Plant located at Portsmouth, Ohio.

In 1987, the Uranium Enrichment program will repay the Treasury $235,000,000 for prior Government investment in this activity.

The Fossil Energy programs support research and development that will strengthen the technology base on which industry can draw in developing future new products and processes for the commercial market. The programs support activities ranging from basic research in universities and national laboratories to applied R&D and proof-of-concept projects in industrial firms.

Reductions in the Fossil Energy R&D programs are proposed in the 1987 budget to eliminate Federal support of company-specific technology development and demonstration activities. The remaining funds are divided into two types of programs: technology base research conducted in the same manner as it has been at universities and national laboratories, and partnerships with industry cooperative R&D ventures to support longer-term high-risk applied technology development of a generic or pre-competitive nature. This is intended to promote more effective technology transfer and to allow broader research support within current fiscal constraints.

In 1987 the Fossil Energy program plans to initiate a new mechanism for conducting applied research R&D—cooperative venture R&D pools. This new delivery system should provide for increased cost sharing with industry as well as encouraging potential beneficiaries of the research to become direct participants from project inception.

Coal technology base.—The objectives of this program will be to continue generic, technology base and environmental research to provide an adequate scientific and engineering knowledge base to foster technological advances by the private sector. The 1987 research program provides for a continued, limited Federal role in support of longer-term high-risk R&D that generally supports technology development by the private sector. The majority of this work will be conducted through the Advanced Research and Technology Development program, with additional activity in the advanced research components of the Coal Liquefaction and Surface Gasification programs. Direct technology base funding is also provided for Control Technology and Coal Preparation coal chemistry and waste management research.

Petroleum, gas and shale.—The 1987 program supports research on the recovery of tar sands and light and heavy oils, fundamental chemistry of oil shale processes, environmental mitigation, the Arctic and offshore program and enhanced gas recovery.

Some activities funded in this category will be part of a cooperative venture R&D pool, particularly those associated with extraction technologies.

Program direction and management support.—This provides the funding for both Headquarters and field personnel and overhead expenses in Fossil Energy. In addition, it provides support for the day-to-day project management functions.

Federal Inspector for the Alaska natural gas pipeline.—Activities formerly included under the Office of the Federal Inspector for the Alaska natural gas pipeline are now funded in this line item, in accordance with the 1986 appropriation.

This program includes those activities necessary to operate, explore, conserve, develop, and produce the naval petroleum reserves at the maximum efficient rate and to conserve the oil shale reserves. This includes routine operation and maintenance, development and exploration drilling, environmental and conservation work, and construction and installation of on-reserve facilities and related systems required for the collection, storage, and distribution of produced petroleum and related products. The budget proposes that the oilfields at Elk Hills, near Bakersfield, CA, and at Teapot Dome near Casper, WY, will be sold competitively, to the highest bidder and that proceeds from the sale be credited to the Treasury as miscellaneous receipts.

The energy conservation programs support research and development that will strengthen the technology base on which industry can draw in developing future new products and processes for the commercial market. The programs support activities ranging from basic research in universities and national laboratories to applied R&D and proof-of-concept projects in industrial firms.

Reductions in the energy conservation R&D programs are proposed in the 1987 Budget consistent with budgetary constraints. In addition, a new innovative cooperative R&D approach will be carefully reviewed and expressions of interest will be solicited from industry. Partnerships with industry cooperative R&D ventures to support longer-term high-risk applied technology development of a generic or precompetitive nature can offer an effective method to leverage Federal moneys and increase program impact. This is intended to promote more effective technology transfer and to allow

General and special funds—Continued

ENERGY CONSERVATION—Continued

broader research support within current fiscal constraints.

Buildings and community systems.—The 1987 buildings and community systems program for universities and national labs will support generic research in building sub-systems, the Federal energy management program, and technology transfer activities to assist the private sector in adopting new energy-conserving technologies. No funds are provided for building standards and guidelines and appliance standards. Legislation will be introduced to eliminate these regulatory requirements which conflict with a free-market approach to providing conservation signals.

Industrial conservation will continue the research and development of generic technologies in waste energy reduction and improved process efficiency. These programs involve combustion technology, advanced heat exchangers and heat pumps, innovative concepts for the utilization of industrial waste materials, and the development of new energy efficient processes for the production of materials and products. These activities are conducted at universities, Federal laboratories, and industrial research laboratories and provide a broad technology base which contributes to more efficient industrial operations and more effective utilization of energy.

Transportation.—The 1987 transportation program for universities and national labs will support cross-cutting R&D in advanced high-temperature materials (primarily at the High-Temperature Materials Lab), and in alternative vehicle propulsion concepts (adiabatic diesel and technology transfer). The 1987 transportation R&D program will support work in areas such as alternative fuels, transportation systems utilization, electric and hybrid vehicles, and industry-based activities complementing the technology base activities in advanced materials and alternative vehicle propulsion. Due to budget constraints, legislation will be introduced to eliminate gas mileage guide requirements as the information is available to the consumer in automobile stickers.

Multisector.—The 1987 multisector program will support cross-cutting R&D at universities and national labs in such areas as combustion and thermal sciences, materials sciences, biocatalysis, and tribology. The multisector program also supports the Energy-Related Inventions Program which assists independent inventors.

State and local assistance program.—The 1987 State and local assistance program provides for the orderly close-out of the State energy conservation (EPCA), energy extension service, schools and hospitals, and weatherization assistance programs. Responsibility for providing these services most appropriately resides with the States. It is expected that funds will be made available to the States through the settlement of petroleum pricing violation cases, and these funds will help finance weatherization and other energy-related activities.

Policy and management.—Provides for overall management guidance and program evaluation for Energy Conservation programs to ensure effective program delivery.

Facilities.—No funds are requested for any facilities activities in 1987, because those underway will have been essentially completed during 1986.

The objective of this program is to decrease the vulnerability of the United States to disruptions in world petroleum markets by creating a crude oil stockpile to be used in the event such disruptions occur.

The account provides for petroleum reserve storage facility construction, ongoing operations and maintenance activities, planning studies, and program administration.

An indefinite moratorium on further development of the reserve is proposed beginning in 1986. The moratorium will be periodically reevaluated in light of changes in world oil markets and the U.S. Government fiscal situation.

Beginning in 1982 and continuing to the present, petroleum acquisition and transportation is funded from the SPR Petroleum Account pursuant to the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35).

This program supports energy information activities which are designed to provide timely, accurate and relevant energy information for use by the Administration, the Congress, and the general public.

National Energy Information System.—The activities funded in this program include the design, development and maintenance of information systems on petroleum, natural gas, coal, nuclear electricity, alternate fuel sources, and energy consumption. This includes collecting data and ensuring its accuracy; preparing limited short-term forecasts; and preparing reports on energy sources, end-uses, prices, supply and demand, and associated economic, international, and financial matters. This program also includes the operation of the Energy Information Administration (EIA) computer facility, telecommunications support, customer services, and ADP software support to in-house EIA personnel and others. In addition, the National Energy Information Center disseminates publications, analytic reports, information directives, and public use tapes, and responds to public inquiries. Finally, this activity provides survey and statistical design standards, documentation standards, and energy data public-use forms clearance and burden control services.

Policy and Management.—This program provides direction to EIA through the Office of the Administrator; provides funding for administrative services; and provides administrative support to EIA program offices in the area of planning, budgeting, contract administration, personnel, and administrative services.

Economic regulation.—The Economic Regulatory Administration (ERA) is responsible for pursuing and finalizing any remaining enforcement actions to assure that oil companies complied with petroleum regulations in effect prior to decontrol of oil in January 1981. Naturally, the funding level is reduced from prior years as enforcement cases are completed. In addition, ERA authorizes the import and export of natural gas and export of electricity, and licenses international electricity transmission facilities.

Hearings and appeals.—The Office of Hearings and Appeals issues all final orders of an adjudicatory nature other than those over which the Federal Energy Regulatory Commission has jurisdiction. It decides appeals of such orders, examines requests for exception relief, and administers refund proceedings involving consent order funds obtained as a result of petroleum enforcement actions.

The Federal Energy Regulatory Commission (FERC) is charged with regulating certain interstate aspects of the natural gas, hydroelectric, oil pipeline, and electric industries. Such regulation includes issuing licenses, approving rates, inspecting dams and enforcement activities and providing other services to regulated businesses. In 1987, these businesses will pay an estimated $78.8 million in fees and charges to cover the Commission's cost of providing licenses, inspections and other services. The estimated revenues for each program are provided as follows:

DISTRIBUTION OF REVENUE BY PROGRAM

(In thousands of dollars)

	1985 actual	*1986 est.*	*1987 est.*
Natural gas	5,723	13,124	30,745
Hydropower licensing	35,048	32,253	29,387
Oil pipeline	239	288	2,249
Electric power	1,751	3,805	16,373
Total	42,761	49,470	78,754

Natural gas regulation.—The Commission regulates 150 natural gas pipeline companies and more than 9,500 natural gas producers. Responsibilities include issuing certificates of public convenience and necessity for natural gas pipelines, determining rates for the transportation and sale of natural gas, and establishing curtailment and other provisions. Producer certificates and rates are also reviewed by the Commission.

Hydropower licensing regulation.—The Commission issues permits and licenses for hydroelectric projects, enforces the terms and conditions of the licenses, and performs dam safety inspections. There are currently 867 hydroelectric projects under license representing more than 1,218 hydroelectric developments which supply 13 percent of the electric energy generated in the United States. The Commission also performs investigations of headwater benefits that are derived from a Federally-owned or licensed headwater improvement for all Federal power marketing agencies except the Tennessee Valley Authority.

Oil pipeline regulation.—The Commission's responsibilities include the establishment of just and reasonable transportation rates. Approximately 150 common carrier oil pipeline companies, including the Trans Alaska Pipeline System (TAPS), are currently under the jurisdiction of the FERC. The valuation of these regulated companies approximates $21 billion. During 1985, the Commission established a new methodology for determining oil pipeline rates based on trended original cost. The deregulation of pipelines is being proposed in those instances where consumers' interests are best served by this approach.

Electric power regulation.—The Commission is responsible for determining rates for the interstate sale or transmission of wholesale electric energy for 214 electric utilities and for overseeing electric utility corporate transactions. The Commission also approved rates for all Federal power marketing agencies except TVA.

Public Law 99-190, making continuing appropriations for 1986, provided $400 million from funds in the Energy Security Reserve in the Department of the Treasury for a new Clean Coal Technology Program in the Department of Energy. This program was authorized under the Clean Coal Technology Reserve proviso of Public Law 98-473 to subsidize the construction and operation of facilities to demonstrate the potential commercial feasibility of such technologies.

Of the $400 million, $100 million is available for obligation beginning in 1986, $150 million in 1987, and $150 million in 1988. These amounts are reduced by .6 percent pursuant to section 325 of the Department of the Interior and Related Agencies Appropriations Act, 1986, as included in section 101(d) of Public Law 99-190.

Public Law 99-190 also reduces the amount of the Clean Coal Technology Reserve to $350 million. With the provision of funds to initiate the new program, the Reserve is being merged with the program account.

This interim program was established in 1980 for the purpose of expediting the development and production of alternative fuels.

When the Synthetic Fuels Corporation was declared to be operational in 1982, the uncommitted and unobligated funds remaining in the program were transferred to the Energy Security Reserve for use by the Synthetic Fuels Corporation with the exception of the Great Plains Gasification Project which remained under the jurisdiction of the Department of Energy. The Department repaid the Federal Financing Bank in 1985 for the Great Plains loan. A Supplemental will be sought to cover the note issued to the Treasury to repay the FFB debt.

The nuclear waste activities program consists of efforts related to the development, acquisition and operation of facilities for the disposal of civilian nuclear waste which is not destined for low level waste burial grounds. These activities are funded by appropriations from the nuclear waste fund which is paid for by the users of the disposal service.

The Alaska Power Administration (APA) is responsible for operation and maintenance and power marketing for the Eklutna and Snettisham hydroelectric projects in accordance with the authorizing legislation for each project.

The agency's normal activities will continue in 1987. The appropriation request, however, will be lower than the prior year because it is anticipated that $400,000 can be deferred and used in 1987.

Proprietary receipts for 1987 are expected to be $9,310,000 on energy sales of 338 million kilowatt-hours. This includes $737,000 of receipts from modified debt repayment criteria which provides for fixed schedules for the amortization of the unpaid debt.

Bonneville Power Administration (BPA) is the Federal electric power marketing agency in the Pacific Northwest. BPA markets hydroelectric power from 21 multipurpose water resource projects of the U.S. Army Corps of Engineers and 9 projects of the U.S. Bureau of Reclamation, plus some energy from non-Federal generating projects in the region. These generating resources and BPA's transmission system, planned by the end of 1987 to consist of an estimated 14,451 circuit miles of high-voltage transmission lines and 385 substations, are operated as an integrated power system with operating and financial results combined and reported as the Federal Columbia River Power System. BPA is the largest power wholesaler in the Northwest and provides about four-fifths of the region's electric power transmission capacity.

BPA is responsible for meeting the net firm power requirements of its requesting customers through a variety of means, including energy conservation programs, acquisition of renewable and other resources, and power exchanges with utilities both in and outside the region.

BPA will continue its operations in 1987 on the basis of its self-financing authority and the new borrowing authority provided by the Pacific Northwest Electric Power Planning and Cooperation Act (Pacific Northwest Power Act) (Public Law 96-501) for energy conservation, and renewable energy resources, and capital fish facilities. Authority to borrow available to the Bonneville Power Administration is available on a permanent, indefinite basis. This authority is limited only in that the amount of borrowing outstanding at any time cannot exceed $3,750,000,000.

Privatization.—Although funds are included in the budget for operating Bonneville in 1987, the Administration will actively seek to privatize this utility system. Utilities are not normally a Federal responsibil-

ity, and non-Federal owners can operate Bonneville as efficiently, or more efficiently, than the Federal government.

The Administration will pursue privatization through an open process. It will be guided by the following principles: (1) seek a fair return to the Federal taxpayers from the privatization of these assets, (2) recognize the benefits currently enjoyed by existing customers, and (3) recognize and provide appropriate protections for the personnel benefits of Federal employees.

Before implementation of privatization, the Administration will seek the views of, and promote interest among, concerned groups and individuals, including Congressional delegations, State and local officials, current customers, the financial community, and public power and private sector energy interests.

Budget programs—Resource planning, acquisition, and oversight.—Provides for the orderly planning, acquisition, and oversight of reliable, cost-effective, environmentally acceptable resources, including resources purchased prior to the Regional Pacific Northwest Power Act, needed to serve BPA's portion of the region's forecasted net electric load requirements that cannot be met through cost-effective conservation.

Residential Exchange.—Provides for extending the benefits of low-cost Federal Power to the residential and small farm customers of investor-owned and publicly-owned utilities, in accordance with the Pacific Northwest Power Act.

Energy conservation.—Provides for funding conservation measures, including home energy efficiency, commercial energy efficiency, street lighting, utility distribution system loss reduction, industrial technological transfers, passive solar energy applications, and conservation measures for new home and commercial building construction.

System planning and construction.—Provides for continuation of construction work on transmission lines substations and related facilities initiated in prior years, initiation of construction on system additions, and planning and research and development for a reliable, efficient and cost-effective regional transmission system. During 1987, BPA plans to construct and energize approximately 44 miles of line and 1 substation.

Operating Programs—System operation.—Provides for operating an estimated 14,429 miles of line and 387 substations of the BPA transmission system during 1987.

System maintenance.—Provides for maintaining the facilities and equipment of the BPA transmission system in 1987.

Power marketing.—Provides for forecasting regional demand; negotiating power sales and wheeling, billing, and servicing these contracts; reviewing and establishing wholesale power and wheeling rates; and encouraging public participation in the formation of BPA policies and programs.

Power scheduling.—Provides for the scheduling of power.

Fish and wildlife.—Provides for protection, mitigation and enhancement of fish and wildlife affected by hydroelectric facilities on the Columbia River and its tributaries, in accordance with the Pacific Northwest Power Act.

Planning Council.—Provides for activities of the Pacific Northwest Electric Power and Conservation Planning Council required by the Pacific Northwest Power Act.

Interest on borrowings.—Provides for payments to the U.S. Treasury for interest on borrowings to finance BPA's construction, energy conservation, and fish and wildlife programs under $3,750,000,000 borrowing authority provided by the Federal Columbia River Transmission System Act (FCRTSA) as amended by the Pacific Northwest Power Act and replenished by Public Law 98–50.

Associated project costs.—Provides for repayment of the operation and maintenance costs of the 30 U.S. Army Corps of Engineers and U.S. Bureau of Reclamation power generating projects, interest and amortization on the U.S. Bureau of Reclamation capital investment in power generating facilities and coordination agreement payments to the Federal Energy Regulatory Commission.

Reimbursable.—Provides for 28 percent of Hanford Generating Project operating expenses paid by two investor-owned utilities through trust fund arrangements. Also provides for services such as construction, operation and maintenance of transmission facilities when requested and financed by other entities.

Contingencies.—Although contingencies are not specifically funded, the need may arise to provide for purchase of power in low-water years; for repair and/or replacement of facilities affected by natural and manmade emergencies, including the resulting additional cost for contracting, construction, and operation and maintenance work; for unavoidable increased costs for the planned program due to necessary but unforeseen adjustments, including engineering and design changes, contractor and other claims and relocations, or for payment of a retrospective premium adjustment in excess nuclear property insurance policy, in the event one of the participating utilities has an accident with property damage in excess of $500 million.

Financing.—The FCRTSA provides for the use by BPA of all receipts, collections, and recoveries in cash from all sources, including the sale of bonds, to finance the annual budget programs of BPA. These receipts result primarily from the sale of power and wheeling. The FCRTSA also provides for authority to borrow from the U.S. Treasury at rates comparable to borrowings at open market rates for similar issues. As amended by the Regional Act and replenished by Public Law 98–50, it allows for $3,750,000,000 of borrowing to be outstanding at any time. Borrowing authority estimated for use in 1987 is $276,100,000.

In 1985 BPA made Treasury payments of $670.7 million and expects to make payments of $670.1 million in 1986 and $654.1 million in 1987. The 1987 payment will be distributed as follows: Corps and Bureau O&M and FERC payments ($95 million), interest on bonds and appropriations ($410.5 million), and amortization ($148.6 million).

The Administration is proposing legislation to modify the repayment criteria that would require an additional $139,000,000 in revenues in 1987.

Direct loans.—The limitation on direct loans is $20,000,000 in 1987.

Operating results.—Total revenues and receipts are forecast at approximately $2,967,800,000 in 1987. The modification of debt repayment criteria is shown under the Department's legislative program.

It should be noted that BPA's revenue forecasts are based on several critical assumptions about both the supply of and demand for Federal energy. Deviation from the assumed conditions may result in variation in actual revenues of several hundred million dollars from the forecast. Estimated retained income for 1987, based on BPA's current revenue and expense estimates, is $266,831,000, an increase of $51,482,000 from 1986.

The Department of Energy will propose legislation to modify the repayment criteria that applies to Bonneville Power Administration's outstanding $8 billion of Federal investment to be repaid to the U.S. Treasury. The proposed criteria would provide for fixed schedules for the amortization of that investment. Bonneville's revenues and receipts will be required to increase by $139,000,000 in 1987 as a result of the proposal.

The Southeastern Power Administration (SEPA) markets power generated at Corps of Engineers Hydroelectric generating plants in a 10-State area of the Southeast. Deliveries are made by means of transmission facilities owned by others. There are 22 projects now in operation. A schedule of kilowatt capacity of projects in operation or under construction follows:

Projects in operation	3,092,375
Project under construction: Russell B. Russell (pumping units)	300,000
Total	3,392,375

SEPA sells power at wholesale primarily to publicly and cooperatively owned electric distribution utilities using wheeling and pooling agreements with the region's large private utilities to provide firm power to its customers. SEPA does not own or operate any transmission facilities. Its long-term contracts provide for periodic electric rate adjustments to insure that the Federal Government recovers all costs of operation and all capital invested in power, with interest, in keeping with statutory requirements. The SEPA program includes the following activities:

System operation and maintenance.—Provision is made for negotiation and administration of power contracts, collection of revenues, development of wholesale power rates, the amortization of power investment, investigation and planning of proposed water resources projects, scheduling and dispatch of power generation, scheduling storage and release of water, administration of contractual operation requirements, and determination of methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources. Proprietary receipts deposited in the Treasury were $79,420,314 for 1985 and are estimated to be $108,685,000 for 1986. Proprietary receipts are expected to be $130,100,000 during 1987. This includes $12,772,000 of receipts from modified debt repayment criteria which provides for fixed schedules for the amortization of the unpaid debt.

Purchase power and wheeling.—Provision is made for the payment of wheeling fees and for the purchase of electricity in connection with disposal of power under contracts with utility companies.

A continuing fund of $50 thousand, maintained from receipts from the transmission and sale of electric power in the southeastern area, is available to defray expenses necessary to insure continuity of service (16 U.S.C. 825s-2).

OPERATION AND MAINTENANCE, SOUTHWESTERN POWER ADMINISTRATION

For necessary expenses of operation and maintenance of power transmission facilities and of marketing electric power and energy, and for construction and acquisition of transmission lines, substations and appurtenant facilities, and for administrative expenses connected therewith, in carrying out the provisions of section 5 of the Flood Control Act of 1944 (16 U.S.C. 825s), as applied to the southwestern power area, [$29,500,000] *$25,337,000*, to remain available until expended. *(Public Law 99-141, making appropriations for energy and water development, 1986.)*

The Southwestern Power Administration (SWPA) operates as a marketing agent for hydroelectric power produced at Corps of Engineers dams in a six-State area. It also operates and maintains some 1,390 miles of high voltage transmission lines, 26 substations and switching stations and 35 radio and microwave stations. SWPA sells its power at wholesale primarily to publicly and cooperatively owned electric distribution utilities. Its long-term contracts provide for periodic rate adjustments to insure that the Federal Government recovers all costs of operation and all capital invested in power, with interest, in keeping with statutory requirements.

SWPA also is responsible for scheduling and dispatching power, negotiating power sales contracts, and constructing facilities required to meet changing customer load requirements.

General and special funds—Continued

OPERATION AND MAINTENANCE, SOUTHWESTERN POWER ADMINISTRATION—Continued

Systems operation and maintenance.—Provision is made for investigating and planning proposed water resources projects, scheduling and dispatching power generation, scheduling storage and release of water, administering contractual operation requirements, and determining methods of operating generating plants individually and in coordination with others to obtain maximum utilization of resources. Provision also is made for maintenance of the transmission system and related facilities to assure reliable service, negotiation and administration of power contracts, collection of revenue, development of wholesale power rates and the amortization of the power investment. Estimated proprietary receipts which are deposited in the Treasury are $96,500,000 in 1985, and are estimated to be $93,400,000 in 1986. Proprietary receipts are expected to be $103,800,000 in 1987. This includes $9,200,000 of receipts from modified debt repayment criteria which provides for fixed schedules for the amortization of the unpaid debt.

Purchase power and wheeling.—Provision is made for the payment of wheeling fees and for the purchase of energy in connection with the marketing of power under contracts with utility companies.

Construction.—The construction program provides transmission, substation and switching facilities to transmit power generated at Corps of Engineers' hydroelectric projects in the Southwest. This program is coordinated with the Corps of Engineers' construction program and customer requirements in order that transmission and related facilities will be in place when these power projects are completed and available for marketing. This program also provides for the purchase of capital electrical equipment used for upgrading the established system to meet changing customer load requirements.

All operation and maintenance activities, with the exception of the gross expenses for the purchase of power and payment of transmission charges, are financed through direct appropriations. An appropriation for the purchase of power and payment of transmission expenses is necessary to cover monthly net expenditures for the thermal power and energy and transmission service provided to SWPA.

The Western Area Power Administration (Western) markets power in 15 western States from generating projects of the Bureau of Reclamation, Corps of Engineers and the International Boundary and Water Commission's powerplants in Texas. Western operates and maintains about 16,000 miles of high-voltage transmission lines and over 200 associated substation/switchyards and constructs transmission facilities, including new transmission lines, substations and essential additions and modifications to existing facilities.

Western sells power at wholesale to publicly and cooperatively owned electric distribution utilities. Its long-term contracts provide for periodic rate adjustments to ensure that the Federal Government recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

Systems operation and maintenance.—A total of 12 power systems will be operated and maintained to market power produced principally by the Bureau of Reclamation and Corps of Engineers. Additionally, revenue will be available from Boulder Canyon project operations for Western's power marketing and transmission expenses, without further appropriation, as provided in the Hoover Power Plant Act of 1985 (Public Law 98–381). Western will continue to participate in conservation and renewable energy programs in 1987.

Commercial power is sold to wholesale customers such as municipalities, cooperatives, irrigation districts, public utility districts, State and Federal government agencies, and private utilities. Receipts are deposited in the Reclamation fund, the General fund, the Colorado River Dam fund, and the Lower Colorado River Basin Development Fund.

Energy sales and revenues resulting from these Western power systems operations, excluding the Colorado River Storage project, the Navajo generating plant, and the Central Arizona project are as follows:

	1985 actual	*1986 estimate*	*1987 estimate*
Energy sales (millions of kilowatt hours)	$32,235	$28,577	$27,876
Revenues from energy sales (in thousands of dollars)	$399,405	$455,241	$489,242

Revenues will be largely unaffected by modified debt repayment criteria, proposed with the 1987 budget, to provide for fixed schedules for the amortization of the unpaid debt.

Purchase of power and wheeling.—The program provides for purchase of power, wheeling, and fuel conservation expenses. Financing of this program consists of $76,719,000 of new budget authority, $36,971,000 from prior year balances and $91,210,000 associated with net billing procedures and Bonneville Power Administration power transfers, for a total program cost of $204,900,000.

System construction.—Construction of transmission facilities is necessary to maintain system reliability and for marketing of electric power produced from generating plants of others. Funding is provided in 1987 for system interties, joint construction participation, replacement of deteriorated wood poles and damaged wood or steel structures, reconductoring and upgrading transmission lines to increase system capacity and reliability, construction of operation and maintenance facilities, and system security additions.

Reimbursable program.—This program involves services provided by Western to others under various types of reimbursable arrangements. In 1987, the reimbursable program primarily provides for construction and operation and maintenance services by Western for the Bureau of Reclamation and for construction activities associated with the California—Oregon Transmission project by Western for other non-Federal entities.

Western's operation and maintenance and power marketing expenses for the Colorado River storage project, the Colorado River Basin project and the Fort Peck project will be financed from power revenues collected by Western.

Western operates and maintains approximately 3,000 miles of transmission lines and over 40 substations associated with these projects. Wholesale power is provided to utilities over the interconnected high-voltage transmission systems. Long-term contracts provide for periodic rate adjustments to ensure that the Federal Government recovers all costs of operation and all capital invested in power with interest in keeping with statutory requirements.

Energy sales and revenues from power operations associated with the Colorado River storage project and the Colorado River Basin project are significantly reduced in 1986 and 1987 due to energy requirements for pumping purposes of the Central Arizona project.

The revenue from the Fort Peck project is integrated with Pick-Sloan Missouri Basin project revenue and is included in the construction, rehabilitation, operation and maintenance account.

Revenues will be largely unaffected by modified debt repayment criteria, proposed with the 1987 budget, to provide for fixed schedules for the amortization of the unpaid debt.

Colorado River storage project.—Western markets power and operates and maintains the power transmission facilities of units of the Colorado River storage project and the Seedskadee participating project. Provision is made for payment for purchase of electricity and wheeling fees to meet contractual obligations and fuel conservation.

Colorado River Basin project.—The 1987 program provides for Western's power marketing and operation and maintenance expenses for the Navajo project participation agreement and Central Arizona project. Financing will be from project power revenue.

Fort Peck project.—Revenue collected by Western is used to defray construction, operation and maintenance and power marketing expenses associated with the power generation and transmission facilities of the Fort Peck project, Corps of Engineers—Civil, and emergency expenses to ensure continuous operation. The Corps operates and maintains the power generating facilities, and Western operates and maintains the transmission system and performs power marketing functions.

Navy geothermal project at Fallon, NV.—The 1985 Energy and Water Development Act provides that revenues from the projects shall be available to the Secretary of Energy, without further appropriation, for payment of power generation and power marketing costs associated with the projects. Due to slippage in test generation, revenues are not anticipated to be available until 1990.

Departmental administration.—This account includes funds for a wide array of policy development and analysis activities, institutional and public liaison functions, and other program support requirements necessary to insure effective operation and management. Specific activities provided for are:

Policy, Planning and Analysis.—The Office of Policy, Planning and Analysis identifies major energy policy issues and develops an agenda for their resolution. It creates a foundation for better energy policy and programs through analysis and evaluation.

International Affairs.—This organization supports the formulation of international energy policy, analyses and assessments of the current world energy situation, international cooperation in energy matters, and the Department's participation in the Administration's nuclear nonproliferation program.

Management and Administration.—This office provides a wide range of institutional support services to the headquarters organizations and to the Department as a whole. Areas of responsibility include: organization and management systems; personnel management; contractor industrial relations; equal employment opportunity; automated data processing management and acquisition; telecommunications management; program/project construction and facility management; procurement and assistance management; and budget, accounting and finance; as well as performing and supplying administrative services.

Congressional, Intergovernmental and Public Affairs.—This office is responsible for coordinating and directing legislative liaison with the Congress and coordinating and managing the Department's information dissemination activities. It gathers information on issues under Departmental jurisdiction; counsels and advises DOE staff on relationships with the Congress; serves as liaison between relevant DOE elements and Congressional authorization and/or oversight committees and other Members; and coordinates the designation and scheduling of DOE witnesses to testify at hearings. For intergovernmental activities, the office provides guidance to ensure consistency in program activities with constituents and oversight on relations between Federal energy activities and external groups excluding those on an international level.

Operations Offices.—The operations offices perform a wide variety of functions in support of energy activities throughout the country. Among these functions are field procurement, engineering and construction management, health and safety monitoring, property management, labor relations and maintenance of personnel and financial systems.

General Counsel.—This office is responsible for providing legal services with respect to all energy activities except for those functions belonging exclusively to the Federal Energy Regulatory Commission, which is served by its own General Counsel and litigation arising from the Emergency Petroleum Allocation Act. Its responsibilities entail the provision of legal opinion, advice and services to administrative and program offices, and the conduct of both administrative and judicial litigation, as well as legal advice and support for enforcement activities. Further, the General Counsel appears before State and Federal agencies in defense of national energy policies and activities. The office is responsible for the coordination and clearance of proposed legislation affecting energy activities and testimony before Congress. The General Counsel is also responsible for oversight of intelligence activities; assuring consistency and legal sufficiency of all energy regulations; administering and monitoring standards of conduct requirements; and conducting the Patents program.

Inspector General.—The responsibilities of this office are to supervise, coordinate, and provide policy direction for audit and investigative activities relating to the promotion of economy and efficiency in the administration or the prevention or detection of fraud or abuse in programs and operations.

Office of the Secretary.—Directs and supervises the staff and provides policy guidance to line and staff organizations in the accomplishment of agency objectives.

Board of Contract Appeals.—Hears and resolves contractual disputes arising from the Administration's financial assistance programs, including guaranteed loans, loan agreements, grants and cooperative agreements.

Minority Economic Impact.—Is responsible for: (1) advising the Secretary on the effects of the Department's policies, regulations and actions on minorities and minority business enterprises; (2) conducting research to determine energy consumption and use patterns of minorities; (3) providing technical assistance to minority educational institutions and minority business enterprises to enable them to participate more fully in Departmental research activities; (4) providing loans to minority bank and thrift institutions under the minority bank development program. The office also is responsible for the White House Initiatives on Historically Black Colleges and Universities for the Department.

Cost of Work for Others.—This activity covers the cost of work performed under orders placed with the Department by non-DOE entities. Reimbursement for these costs is made through deposits of offsetting collections to this account.

ADMINISTRATIVE PROVISIONS, DEPARTMENT OF ENERGY

Appropriations under this Act for the current fiscal year shall be available for hire of passenger motor vehicles; hire, maintenance, and operation of aircraft; purchase, repair, and cleaning of uniforms; and reimbursement to the General Services Administration for security guard services.

From appropriations under this Act, transfers of sums may be made to other agencies of the Government for the performance of work for which the appropriation is made.

None of the funds made available to the Department of Energy under this Act shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs in an appropriations Act.

The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, private, or foreign[: *Provided*, That revenues and other moneys received by or for the account of the Department of Energy or otherwise generated by sale of products in connection with projects of the Department appropriated under this Act may be retained by the Secretary of Energy, to be available until expended, and used only for plant construction, operation, costs, and payments to cost-sharing entities as provided in appropriate cost-sharing contracts or agreements: *Provided further*, That the remainder of revenues after the making of such payments shall be covered into the Treasury as miscellaneous receipts: *Provided further*, That any contract, agreement or provision thereof entered into by the Secretary pursuant to this authority shall not be executed prior to the expiration of 30 calendar days (not including any day in which either House of Congress is not in session because of adjournment of more than three calendar days to a day certain) from the receipt by the Speaker of the House of Representatives and the President of the Senate of a full and comprehensive report on such project, including the facts and circumstances relied upon in support of the proposed project].

The Secretary of Energy may transfer to the Emergency Preparedness appropriation such funds as are necessary to meet any unforeseen emergency needs from any funds available to the Department of Energy from this Act.

[The reporting requirement established by the last paragraph under the heading "Department of Energy Alternative Fuels Production" in and Act making appropriations for the Department of the Interior and Related Agencies for the fiscal year ending September 30, 1980 (42 U.S.C. 5915 note; Public Law 96-126), is hereby repealed.] *(Department of the Interior and Related Agencies Appropriations Act, 1986, as included in Public Law 99-190.)*

GENERAL PROVISIONS—DEPARTMENT OF ENERGY

SEC. 301. Appropriations for the Department of Energy under this title for the current fiscal year shall be available for hire of passenger motor vehicles; hire, maintenance and operation of aircraft; purchase, repair and cleaning of uniforms; and reimbursement to the General Services Administration for security guard services. From these appropriations, transfers of sums may be made to other agencies of the United States Government for the performance of work for which this appropriation is made. None of the funds made available to the Department of Energy under this Act shall be used to implement or finance authorized price support or loan guarantee programs unless specific provision is made for such programs in an appropriation Act. The Secretary is authorized to accept lands, buildings, equipment, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, private, or foreign.

(TRANSFERS OF UNEXPENDED BALANCES)

SEC. 302. Not to exceed 5 per centum of any appropriations made available for the current fiscal year for Department of Energy activities funded in this Act may be transferred between such appropriations, but no such appropriation, except as otherwise provided, shall be increased or decreased by more than 5 per centum by any such transfers, and any such proposed transfers shall be submitted promptly to the Committees on Appropriations of the House and Senate.

SEC. 303. The unexpended balances of prior appropriations provided for activities covered in this Act may be transferred to appropriation accounts for such activities established pursuant to this title. Balances so transferred may be merged with funds in the applicable established accounts and thereafter may be accounted for as one fund for the same time period as originally enacted.

[SEC. 304. The expenditure of any appropriation under this Act for any consulting service through procurement contract pursuant to section 3109 of title 5, United States Code, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.]

[SEC. 305. None of the funds in the Department of Energy shall be used to pay the expenses of, or otherwise compensate, parties intervening in regulatory or adjudicatory proceedings funded in the Department of Energy.] *(Public Law 99-141, making appropriations for energy and water development, 1986.)*

TITLE V—GENERAL PROVISIONS

SEC. 501. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 502. None of the funds in this Act shall be used to pay the expenses of, or otherwise compensate, parties intervening in regulatory or adjudicatory proceedings funded in this Act.

SEC. 503. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

[SEC. 504. None of the funds appropriated in this Act shall be used to implement a program of retention contracts for senior employees of the Tennessee Valley Authority.]

[SEC. 505. Notwithstanding any other provision of this Act or any other provision of law, none of the funds made available under this Act or any other law shall be used for the purposes of conducting any studies relating or leading to the possibility of changing from the currently required "at cost" to a "market rate" or any other non-cost-based method for the pricing of hydroelectric power by the six Federal public power authorities, or other agencies or authorities of the Federal Government, except as may be specifically authorized by Act of Congress hereafter enacted.]

[SEC. 506. No funds appropriated in this Act may be used to pay the salary of the Administrator of a Power Marketing Administration or the Board of Directors of the Tennessee Valley Authority unless they award contracts for the procurement of extra high voltage power equipment manufactured in the United States when such agency determines that there are one or more domestic manufacturers offering a product which meets the technical requirements of such agency at a price not exceeding 125 per centum of the bid or offering price of the most competitive foreign bidder. Such agency shall determine the incremental costs associated with implementing this section and defer or offset such incremental costs against otherwise existing repayment obligations. This section shall not apply to any procurement initiated before its effective date or to the acquisition of spare parts.] *(Public Law 99-141, making appropriations for energy and water development, 1986.)*

DEPARTMENT OF HEALTH AND HUMAN SERVICES

FOOD AND DRUG ADMINISTRATION

Federal Funds

General and special funds:

[SALARIES AND] *PROGRAM* EXPENSES

For necessary expenses of the Food and Drug Administration; for rental of special purpose space in the District of Columbia or elsewhere; and for miscellaneous and emergency expenses of enforcement activities, authorized and approved by the Secretary and to be accounted for solely on the Secretary's certificate, not to exceed $25,000; $423,600,000, of which $1,450,000 shall remain available until expended for construction and renovation of facilities: Provided, That collections from user fees may be credited to appropriations available to the Food and Drug Administration, and shall remain available until expended. Provided further, That such amounts as the Secretary deems necessary may be transferred to "Priority Disease Control and Research Projects." Funds provided under this heading may be used for one-year contracts which are to be performed in two fiscal years so long as the total amount for such contracts is obligated in the year for which the funds are appropriated.

Note.—A regular 1986 appropriation for this account had not been enacted at the time this budget was prepared. A continuing resolution (Public Law 99-190) provides funds to the extent and in the manner provided for in the conference version of H.R. 3037, making appropriations for Agriculture, Rural Development, and Related Agencies, 1986.

The Food and Drug Administration (FDA) administers laws concerning misbranded and adulterated foods, drugs, human biologics, medical devices, cosmetics, and man-made sources of radiation.

Foods.—FDA reviews industry petitions for the safe use of food additives, conducts research, develops analytical methods to detect food and cosmetic adulteration, and defines good manufacturing and sanitary practices. FDA also inspects food and cosmetic processing and storage establishments, analyzes samples to verify that these products are safe and properly labeled and—when necessary—takes regulatory action to obtain compliance with the law.

Drugs.—FDA reviews research supporting the safety and efficacy of drugs prior to marketing, evaluates experience with marketed drugs and conducts research. FDA also inspects manufacturing firms, reviews labeling, analyzes samples, and—when necessary—takes regulatory action to enforce the legal requirements.

Devices and radiological products.—FDA ensures the safety and effectiveness of medical devices and eliminating unnecessary exposure to electronic product radiation through research, surveillance, performance standards and premarket approval of certain devices.

National Center for Toxicological Research.—FDA conducts research programs to analyze the biological effects of potentially toxic chemical substances.

Program management.—This activity supports executive and administrative functions.

Buildings and facilities.—This activity provides for construction and renovation of facilities.

Title VII, part C of the Public Health Service Act established a revolving fund from which health professions schools could borrow in order to provide loans to their students. Public Law 89-751, the Allied Health Professions Personnel Training Act of 1966, amended the Public Health Service Act to authorize the Federal Government to pay the difference between the interest paid by students to the schools and the interest payable by the schools to the Government National Mortgage Association (GNMA) and the Treasury.

The participation certificates outstanding, held by this fund, were $9,729,000 at the end of 1985 and are estimated to remain at that level in 1986 and 1987.

Title VI and subsequently title XVI of the Public Health Service Act established a loan and loan guarantee fund for medical facilities with a maximum amount allowable for the Government's liability. Direct loans were made available for public facilities and guaranteed loans for private, nonprofit facilities.

Funds under this authority were established in the amount of $50 million for use in fulfilling guarantees in event of default, $30 million as a revolving fund for direct loans and an amount for interest subsidy payments on guaranteed loans. Default and interest subsidy funds are replenished as necessary through the annual appropriation process.

About $900 million in direct and guaranteed loans will be outstanding in 1987.

This is a public enterprise revolving fund. Direct loans will be sold to the Federal Financing Bank to provide operating capital for the fund and loans thus sold will be guaranteed. In 1975, $35 million was appropriated to the Health Services Administration as cap-

ital for the revolving fund. In 1987 no new loans or loan guarantees will be made.

HEALTH CARE FINANCING ADMINISTRATION

Federal Funds

General and special funds:

Grants to States for Medicaid

For carrying out, except as otherwise provided, title XIX of the Social Security Act, [$17,918,000,000,] *amounts specified herein,* to remain available until expended.

For making payments to States (other than Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa) for fiscal year 1987 for medical assistance, $17,099,584,000: Provided, That no such State shall be entitled to payment for medical assistance costs incurred in fiscal year 1987 in excess of 109 per centum of the total amount the State expended for medical assistance under its State plan during fiscal year 1985 as determined on the basis of actual expenditure reports received by the Secretary as of January 31, 1986 and approved by the Secretary as of the start of fiscal year 1987.

General and special funds—Continued

GRANTS TO STATES FOR MEDICAID—Continued

For making payments to States (other than Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa) in cases of hardship, as determined under regulations of the Secretary, notwithstanding the 109 per centum limit described in the paragraph above, $300,000,000, which is the maximum amount the Secretary may obligate for these purposes.

For making payments to States (other than Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa) for administrative and training expenses for fiscal year 1987, $756,638,000: Provided, That no funds may be paid from this or any other appropriation to a State to reimburse expenditures claimed after October 1, 1986 under section 1903(a)(2), (3), (5), and (6) of the Social Security Act: Provided further, that notwithstanding title XIX of the Social Security Act, any use of funds appropriated under this Act by a State shall constitute that State's agreement to claim all future reimbursement for administrative costs under section 1903(a)(7) of the Act: Provided further, That in the case of any State (other than Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa) in which the ratio of total amounts of such administrative expenditures under its Medicaid State plan for fiscal year 1987 to the average monthly number of individuals receiving benefits under its State plan in that fiscal year (called "per recipient administrative costs") exceeds 175 per centum of the national median of all such ratios (such ratios being established by the Secretary of Health and Human Services on the basis of the best data available when the amount payable under section 1903 is determined, with subsequent adjustments made as necessary), no more than 25 per centum of the State's costs in excess of 175 per centum of the national median of such per recipient administrative costs may be included in the amount payable from this or any other appropriation.

For making payments to States (other than Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa) for medical assistance for the first quarter of fiscal year 1988, $6,745,000,000: Provided, That the maximum amount available for medical assistance expenditures to a State for the first quarter of fiscal year 1988 shall not exceed the State's first quarter grant award for fiscal year 1987, increased or decreased by a percentage estimated by the Secretary to be equal to the projected percentage increase or decrease (as the case may be) in the index of the medical care expenditure category of the Consumer Price Index for all urban consumers (U.S. City average) for the 12-month period ending September 30, 1988.

For making payments to States (other than Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa) for administrative and training expenses for the first quarter of fiscal year 1988, and subject to the same limitations as apply to amounts appropriated herein for the current fiscal year, $337,700,000.

For making payments to Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa for fiscal year 1987, $51,900,000.

For making payments to Puerto Rico, Guam, the Virgin Islands, the Northern Mariana Islands, and American Samoa for the first quarter of fiscal year 1988, $17,300,000.

[For making, after May 31, 1986, payments to States under title XIX of the Social Security Act, for the last quarter of fiscal year 1986 for unanticipated costs, incurred for the current fiscal year, such sums as may be necessary.]

Payment under title XIX may be made for any quarter beginning after June 30, [1985] *1986*, and before October 1, [1986] *1987*, with respect to any State plan or plan amendment in effect during any such quarter, if submitted in, or prior to such quarter and approved in that or any such subsequent quarter.

During the eighteen-month period beginning with the first month in which a refugee enters the United States, a refugee to whom cash or medical assistance is available under section 412(e) of the Immigration and Nationality Act shall be ineligible for assistance under title IV-A and XIX of the Social Security Act.

[For making payments to States under title XIX of the Social Security Act for the first quarter of fiscal year 1987, $6,500,000,000, to remain available until expended.] *(Department of Health and Human Services Appropriation Act, 1986; legislative action required.)*

Medicaid assists States in providing medical care to their low-income population by granting Federal matching payments under title XIX of the Social Security Act to States with approved plans. The 1987 appropriation request incorporates proposals to limit Medicaid excessive growth, and enhance States program flexibility.

PAYMENTS TO HEALTH CARE TRUST FUNDS

There are a number of legislative proposals that affect the Federal Hospital Insurance (HI) Trust Fund. These proposals would:

Establish copayments for home health visits;

Entitle individuals to Medicare coverage in the first full month they are 65;

Provide beneficiaries the option of choosing Medicare vouchers to purchase health insurance in the private market;

Rely on private insurance for disabled beneficiaries and those over age 69 who have access to coverage through their own or a spouse's employer, with Medicare as secondary payor;

Reform Medicare financing of indirect medical education to eliminate the inappropriate doubling of the standard, analytically based adjustment factor.

There are a number of legislative proposals that affect the Federal Supplementary Medical Insurance (SMI) Trust Fund. These proposals would:

Freeze clinical laboratory fee schedules for one year;

Increase the SMI deductible and index it to the Medicare economic index, and reinstitute cost-sharing for ambulatory surgical services;

Modestly increase the SMI premium and increase the SMI premium paid by third parties to 50 percent of program costs;

Entitle individuals to Medicare coverage in the first full month they are 65;

Rely on private insurance for disabled beneficiaries and those over age 69 who have access to coverage through their own or a spouse's employer, with Medicare as secondary payor; and

Give beneficiaries the option of choosing Medicare vouchers to purchase health insurance in the private market.

ASSISTANCE PAYMENTS PROGRAM

For carrying out, except as otherwise provided, titles I, IV-A and -D, X, XI, XIV, and XVI of the Social Security Act and the Act of July 5, 1960 (24 U.S.C., ch. 9), [$6,859,578,000] *$6,009,478,000*, to remain available until [expended.] *expended: Provided, That notwithstanding section 403(a)(3)(B) of the Social Security Act, not more than 75 per centum of amounts expended for Statewide mechanized claims processing and information retrieval systems for the administration of a State plan approved under Title IV-A of the Act shall be included in determining the amount payable to a State under section 403 from this or any other appropriation: Provided further, That in the case of any State (other than Puerto Rico, Guam, or the Virgin Islands) in which the ratio of total amounts expended for administration of its AFDC plan for fiscal year 1987 (other than amounts expended for Statewide mechanized claims processing and information retrieval systems under Section 402(a)(30) of the Act, and other than those amounts directly related (as determined by the Secretary) to activities under Section 402(a)(35) of the Act or other employment-related activities) to the average monthly number of its AFDC recipients in that fiscal year (called "per recipient administrative costs") exceeds 175 per centum of the national median of all such ratios (such ratios being established by the Secretary of Health and Human Services on the basis of the best data available when the amount payable is determined, with subsequent adjustments made as necessary), no more than 25 per centum of the State's costs in excess of 175 per centum of the national median of such per recipient administrative costs may be included in determining the amount payable from this or any other appropriation: Provided further, That States shall require all employable applicants and recipients for aid to families with dependent children to engage in the activities specified in section 402(a)(35) of the Social Security Act, and shall require all employable recipients to engage in employment activities such as those described in section 409 of the Act or section 20 of the Food Stamp Act, as a condition of receiving assistance: Provided further, That no amounts appropriated from this or any other appropriation shall be available for federal financial participation in the costs (on average) of assistance payments, in any State, to more than 75 per centum of the number of families required to participate, but not participating, in these employment-related activities: Provided further, That in calculating a family's eligibility and benefits, States shall exclude the needs of an employable caretaker relative with no dependent child under age sixteen: Provided further, That a minor who has never been married, and the dependent child for whom the minor is responsible, shall be eligible for aid under Title IV-A of the Social Security Act only if the minor is living in his parent's (or guardian's) place of residence, unless the State determines that a compelling basis (established in accordance with criteria of the Secretary), other than establishing eligibility for, or increasing the amount of, aid payable under that title, exists for the minor's living elsewhere, and in such a case, payment may be made to a concerned person on behalf of the minor and dependent child: Provided further, That during the eighteen-month period beginning with the first month in which a refugee enters the United States, a refugee to whom cash or medical assistance is available under Section 412(e) of the Immigration and Nationality Act shall be ineligible for assistance under Title IV-A and XIX of the Social Security Act: Provided further, That no State shall be entitled, for fiscal year 1987, to reimbursement, from amounts appropriated under this or any other Act, in excess of the amount resulting from applying the rate prescribed by section 403(a)(3)(C) of that Act and the above provisions with respect to expenditures under section 402(a)(19) or 445(f) of that Act.*

For making, after May 31 of the current fiscal year, payments to States under titles, I, IV-A and -D, X, XIV, and XVI of the Social Security Act, for the last three months of the current fiscal year, for unanticipated costs, incurred for the current fiscal year, such sums as may be [necessary.] *necessary, subject to the same limitations as apply to other amounts appropriated herein for the current fiscal year.*

For making payments to States under titles I, IV-A and -D, X, XIV, and XVI of the Social Security Act for the first quarter of fiscal year [1987] *1988, and subject to the same limitations as apply to amounts appropriated herein for the current fiscal year except that the reference to payments to families in excess of 75 per centum of those required to participate in employment-related activities shall be 50 per centum*, [$2,193,754,000] *$2,293,615,000*, to remain available until expended. *(Department of Health and Human Services Appropriations Act, 1986; legislative action required.)*

This appropriation makes grants to States for the Federal share of State expenditures for aid to families with dependent children (AFDC) and related activities.

Maintenance assistance.—Aid to families with dependent children and related programs provide funds for needy persons. Selected program statistics are shown below.

Research and evaluation.—Projects are supported to develop knowledge needed to evaluate and implement major policy and program changes in the assistance payments program.

Administrative expenses.—The administrative costs budgeted for the assistance payments program provide for Federal direction of the various grant programs that provide maintenance assistance to the needy.

The budget estimates for 1987 include savings from legislation to create new opportunities for work and work experience, reform Federal funding of State and local administrative and training costs, and improve targeting of AFDC benefits.

Included in the 1987 funding level for State and local administrative and training costs is $200,000 thousand budgeted for costs associated with proposed new work and work experience-related activities.

The Child Support Enforcement program assists States in assuring that absent parents meet their responsibility in providing support for their children. This goal is accomplished through locating absent parents, proving paternity, establishing child support obligations and enforcing their collection.

Child support payments made by absent parents on behalf of recipients of Aid to Families with Dependent Children (AFDC) go to the State or local child support enforcement agency for distribution. The Federal share of the child support collections is deducted from Federal payments to States for AFDC. These collections appear as an offset in the Assistance Payments appropriation. Collections on behalf of non-AFDC families are distributed directly by the States to those families.

State and local administrative costs.—Federal grants for State and local administration of the program are made to States having approved plans.

Grants to States for interstate enforcement.—Federal grants to States are made to develop and improve interstate child support enforcement.

Research and evaluation.—Projects are supported to improve State and local program administration.

Federal administrative costs.—The Federal Office of Child Support Enforcement provides services to State and local governments designed to increase collections.

Reimbursable administrative costs.—The Office of Child Support Enforcement operates the Federal Parent Locator Service. The Kidnapping Prevention Act of 1980 (Public Law 96-611) authorizes States to use the service to locate parents who have taken their children from the custody of the other parent without court permission.

Administration for children, youth, and families.—The proposed level will provide comprehensive Head Start services to approximately 448,250 children in full-year programs. Handicapped children will make up at least 10% of enrollment.

Grants to States and discretionary projects will improve identification, treatment, and prevention of child abuse and neglect. $23,250 thousand will support projects to meet the immediate needs of runaway and homeless youth and their families.

Child abuse State grants, child abuse discretionary activities, and family violence services grants will be consolidated into a new Family Crisis and Protective Services Program which will give States greater flexibility in addressing the related issues of child abuse and family violence.

Administration on aging.—Funds will support formula grants and discretionary projects to support services and meals for older persons, especially those with the greatest economic and social need.

Administration for developmental disabilities.—The proposed level will support grants to States to augment existing services for the developmentally disabled and to administer effective protection and advocacy systems. University affiliated facilities will also be supported.

Administration for Native Americans.—The proposed funding level will support grants to help Native American populations achieve social and economic self-sufficiency.

White House conferences on aging.—All funds for White House conferences have been appropriated and will remain available until expended.

Federal administration—Human development services.—The proposed level will fund administrative expenses to carry out Office of Human Development Services programs.

The work incentive (WIN) program was designed to encourage and assist individuals receiving support from the aid to families with dependent children (AFDC) program to achieve self-support through a program of employment, training, and support services. Training was administered by the Department of Labor; supportive services by the Department of Health and Human Services. State expenditures have been federally matched at the rate of 90%. Repeated studies, however, have shown that the WIN program is not cost effective. Therefore, the President's 1987 budget does not propose separate funding for WIN, and includes a proposal to rescind fourth quarter funding in 1986 and to phase out the WIN program using unexpended carryover funds. Instead, under the President's 1987 budget proposals, AFDC applicants and recipients will be required to participate in job search and other employment-related activity as a condition of AFDC eligibility. These new activities will be administered by the Department of Health and Human Services' Office of Family Assistance and separately funded at a matching rate of 50 percent. In addition, States can use Social Services Block Grant resources and Job Training Partnership Act resources for other work-related activity for AFDC recipients.

Grants to States.—Includes registration, appraisal and employability planning, job search, training, child care services, adjudication of the work test, and WIN demonstrations.

Program direction and evaluation.—This activity provides for the administration and evalution of the WIN program and WIN demonstrations. Resources for administration will be divided between the Departments of Labor and Health and Human Services in 1986.

GENERAL PROVISIONS

SEC. 201. None of the funds appropriated by this title for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any State which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 202. Funds appropriated in this Act for the *Alcohol, Drug Abuse, and Mental Health Administration and the* National Institutes of Health shall be used to support no fewer than [6,100 new and competing] *19,400* research projects *grants*.

SEC. 203. Appropriations [in this Act for the Health Resources and Services Administration, the National Institutes of Health, the Centers for Disease Control, the Alcohol, Drug Abuse, and Mental Health Administration, the Office of the Assistant Secretary for Health, the Health Care Financing Administration, and Departmental Management] shall be available for expenses for active commissioned officers in the Public Health Service Reserve Corps and for not to exceed two thousand four hundred [and fifty] commissioned officers in the Regular Corps; expenses incident to the dissemination of health information in foreign countries through exhibits and other appropriate means; advances of funds for compensation, travel, and subsistence expenses (or per diem in lieu thereof) for persons coming from abroad to participate in health or scientific activities of the Department pursuant to law; expenses of primary and secondary schooling of dependents in foreign countries, of Public Health Service commissioned officers stationed in foreign countries, at costs for any given area not in excess of those of the Department of Defense for the same area, when it is determined by the Secretary that the schools available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents, between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; expenses for medical care for civilian and commissioned employees of the Public Health Service and their dependents, assigned abroad on a permanent basis in accordance with such regulations as the Secretary may provide; rental or lease of living quarters (for periods not exceeding five years), and provision of heat, fuel, and light and maintenance, improvement, and repair of such quarters, and advance payments therefore, for civilian officers, and employees of the Public Health Service who are United States citizens and who have a permanent station in a foreign country; purchase, erection, and maintenance of temporary or portable structures; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section 207(f) or section 207(g) of the Public Health Service Act, at rates established by the Assistant Secretary for Health, or the Secretary where such action is required by statute, not to exceed the per diem rate equivalent to the rate for GS-18; not to exceed $9,500 for official reception and representation expenses related to any health agency of the Department when specifically approved by the Assistant Secretary for Health.

SEC. 204. None of the funds contained in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term.

SEC. 205. Funds advanced to the National Institutes of Health Management Fund from appropriations in this Act shall be available for the expenses of sharing medical care facilities and resources pursuant to section 327A of the Public Health Service Act.

SEC. 206. Funds appropriated in this title for the Social Security Administration and the Office of Child Support Enforcement shall be available for not to exceed $5,000 for official reception and representation expenses related to income maintenance or child support enforcement activities of the Department when specifically approved by the Commissioner of Social Security.

SEC. 207. Funds appropriated in this title for the Health Care Financing Administration shall be available for not to exceed $2,000 for official reception and representation expenses when specifically approved by the Administrator of the Health Care Financing Administration.

SEC. 208. No funds appropriated for the fiscal year ending September 30, [1986] *1987*, by this or any other Act, may be used to pay basic pay, special pays, basic allowance for subsistence and basic allowances for quarters of the commissioned corps of the Public Health Service described in section 204 of title 42, United States Code, at a level that exceeds 110 percent of the Executive Level I annual rate of basic pay: *Provided*, That amounts received from employees of the Department in payment for room and board may be credited to the appropriation accounts "Health Resources and Services", National Institutes of Health "Office of the Director", "Disease Control", and "Federal Subsidy for Saint Elizabeths Hospital": *Provided further, That funds appropriated by this Act or any other Act shall not be used for special, revised special, or continuation pay to any physician or dentist appointed to the Public Health Service Commissioned Corps during the current year whose primary duties are determined by the Secretary to be administrative or managerial: Provided further, That any physician or dentist who, through promotion or reassignment within the Corps, assumes as primary duties administrative or managerial responsibilities may, at the discretion of the Secretary, receive such special, revised special or continuation pay.*

SEC. 209. None of the funds appropriated in this title shall be used to transfer the general administration of programs authorized under the Native American Programs Act from the Department of Health and Human Services to the Department of the Interior.

SEC. 210. Funds provided in this Act may be used for one-year contracts which are to be performed in two fiscal years, so long as the total amount for such contracts is obligated in the year for which the funds are appropriated.

[SEC. 211. Pursuant to section 264 of title 42, United States Code, funds provided in this Act for research into the causes and transmission of the acquired immune deficiency syndrome disease may be used by the Surgeon General for closing or quarantining as a public health hazard any bathhouse or massage parlor which in his judgment pursuant to law can be determined to facilitate the transmission or spread of the AIDS epidemic].

SEC. 211. Funds appropriated by this Act may be used to pay bonuses, as authorized under 5 U.S.C. 5948, only to those persons who are licensed to practice medicine except that this provision shall not apply to individuals receiving such bonuses prior to January 1, 1987.

SEC. 212. Not to exceed one-half of one percent of appropriations made available for this fiscal year for the activities of the National Institutes of Health funded in this Act may be transferred to any other appropriation for the National Institutes of Health, but no such appropriation, except as otherwise provided, shall be increased or decreased by more than one per centum by any such transfers and Congress shall be notified promptly of any such transfer: Provided, That research grants or contracts funded by any appropriation made to any National Institute of Health or the Alcohol, Drug Abuse, and Mental Health Administration, shall be awarded only after consideration by the advisory body of the full cost of such a research grant or contract.

SEC. 213. Funds appropriated under this title shall not be available for increases to State and local governments' allocated overhead rates above the rates in effect on September 30, 1985.

SEC. 214. Notwithstanding 31 U.S.C. 1348, and for the purpose of insuring proper management of federally supported computer systems and data bases, funds appropriated by this Act are available for the purchase of dedicated telephone service between the private residences of employees assigned to computer centers funded under this Act, and the computer centers to which such employees are assigned.

SEC. 215. None of the funds appropriated by this title are available for grants to the Federated States of Micronesia and the Marshall Islands: Provided, That funds made available to Guam, American Samoa, the Virgin Islands, the Northern Mariana Islands, and the Republic of Palau shall be available only in amounts that such entities would have received had the Compact of Free Association not been enacted. (Department of Health and Human Services Appropriation Act, 1986.)

[SEC. 123. No penalty shall be applied nor any State or agency agreement terminated pursuant to sections 1512, 1515, or 1521 of the Public Health Service Act during fiscal year 1986, nor if appropriations under title XV of that Act are reauthorized by August 15, 1986, shall any agency be required to take action to anticipate termination of financial assistance under that title. Sums appropriated by the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriation Act, 1986, for the award of grants under section 1516 of the Public Health Service Act may be used for grants under that section to State agencies that were authorized to receive grants for fiscal year 1982 under section 935(b) of the Omnibus Budget Reconciliation Act of 1981: *Provided*, That no sums may be obligated under the authority of this sentence after the date upon which a law is enacted to extend the authority to appropriate amounts to carry out title XV of such Act.]

[SEC. 124. The total principal amount of Federal loan insurance available under section 728 of the Public Health Service Act during fiscal year 1986 shall be granted by the Secretary of Health and Human Services without regard to any apportionment or other similar limitation, unless such apportionment or limitation is explicitly established, after the enactment of this joint resolution, as an amendment to subpart I of title VII-C of that Act.] *(Public Law 99-190, making continuing appropriations for the fiscal year 1986.)*

Direct program.—The old-age and survivors insurance (OASI) program provides income to retired workers, their dependents, and survivors. The program is financed by payroll taxes paid by employers, employees, and self-employed individuals.

The contribution rates are applied to taxable earnings up to a specified maximum. The maximum was $37,800 in 1984, $39,600 in 1985, $42,000 in 1986 and is expected to increase to $43,500 in 1987.

Benefit payments.—Benefits are based on average taxable earnings, indexed for inflation.

Administration.—This activity reflects the costs of administering this program.

Payment to railroad retirement account.—Since 1951, more than $26 billion in annual payments from the OASI trust fund have helped finance the rail industry pension fund. The annual OASI payment includes funds for some benefits which are not, in turn, paid to railroad workers and their families.

Reimbursable program.—Advances are made from the OASI trust fund for the administrative expenses of the general fund programs and certain other services administered by SSA with full reimbursement to the trust fund (including interest when appropriate).

The disability insurance (DI) program protects individuals and families by providing income to insured disabled workers (and their dependents). This program is financed by payroll taxes paid by workers, employers, and self-employed individuals.

Benefit payments.—Disability insurance benefits are made to certain disabled individuals and their dependents. Automatic cost-of-living benefit increases are the same as for the OASI program.

Administration.—This activity reflects administrative and other nonbenefit expenses attributable to the DI program.

Payment to railroad retirement account.—Annual adjustments are made between the DI trust fund and the railroad retirement fund. This adjustment is computed on the same basis as the payment from the OASI trust fund which is described in the preceding section.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

This chapter presents the budget and program estimates for the Department of Housing and Urban Development. Most of the Department's programs are also discussed in Part 5 of the budget (the Federal program by function) under one of three headings: Commerce and housing credit (mortgage credit and deposit insurance); Community and regional development; and Income security (public assistance and other income supplements).

The major divisions of this chapter conform to the following Department activities:

Housing programs cover the Department's major housing subsidy programs except for those activities under the public housing and Indian housing programs. The mortgage insurance activities of the Federal Housing Administration, including loan management and property disposition activities, are also included under this heading. Other activities included under this heading are community disposal operations, the Office of Interstate Land Sales Registration, manufactured home inspection and monitoring, and the rental development grant program.

Public and Indian Housing programs cover public housing management and development activities (including modernization) and provision of Indian Housing assistance. Also included are credit and financing activities related to development and modernization.

Government National Mortgage Association (GNMA) covers the Department's programs to assist in the availability of mortgage credit and stabilize financing of selected types of mortgage loans. This heading also covers GNMA management and liquidating functions, the guarantee of mortgage-backed securities, and trustee activities in connection with participation certificates that are backed by loan obligations of various trustor agencies.

Community planning and development covers the Community development grant and Urban development action grant programs authorized by the Housing and Community Development Act of 1974, as amended. This organization is also responsible for the administration of the rental rehabilitation grant and the Urban homesteading programs as well as the Rehabilitation loan (section 312) program, terminated categorical community development programs, and the revolving fund for liquidating programs which includes the liquidation of the new communities fund.

Policy development and research includes the policy development, economic analysis, program evaluation, and research activities of the Department.

The subsidized housing programs schedule reflects both budget authority to enter into contracts for subsidized housing and a permanent indefinite appropriation for payments required to liquidate contracts under the various housing subsidized programs.

As part of the administration's effort to reduce the deficit a rescission of $4.4 billion of budget authority is being reflected for 1986. In addition, the Balanced Budget and Emergency Deficit Control Act of 1985 reduces 1986 amounts by $428.5 million. The budget also reflects a deferral into 1987 of $2,300.8 million of 1986 budget authority.

Total reservations in 1987 are estimated at $2,300.8 million. The $2,300.8 million will be used to fund incremental units, vouchers for opt-outs and Public Housing demolitions, and section 8 project based units required to provide assistance to projects already in the subsidized inventory and to protect the status of current tenants.

Indefinite appropriations will be available in 1986 and subsequent years to liquidate contractual obligations under the various subsidized housing programs as follows:

Lower income housing (section 8).—The budget proposes the reservation of 50,000 incremental section 8 vouchers as well as vouchers for section 8 opt-outs and public housing demolitions. In addition, 1987 activity will be directed toward maintaining the viability of the current subsidized inventory by providing 9,000 project based units and funding sufficient to meet necessary amendment requirements.

The program levels in 1986 and 1987 reflect the overall effort to control discretionary federal spending in order to reduce the deficit.

Public and Indian housing.—No new public housing or Indian housing units are proposed for commitment in 1987, and only 350 units of public housing will be reserved in 1986 in order to satisfy court-ordered requirements. Modernization activity in both 1986 and 1987 will be limited to emergency needs requirements ($225 million of capital costs each year). No new public and Indian housing units are proposed in 1987 and subsequent years since the section 8 voucher program is expected to provide more cost efficient assistance.

The 1987 budget includes $300.2 million of budget authority, $58.9 million for public and Indian housing amendments, $16.3 million for section 23 lease adjustments and $225 million for public and Indian housing modernization activities.

The 1987 budget also includes a major reform of the method of financing public and Indian housing construction and modernization activities which had been proposed as part of the 1986 budget. Traditionally, such activities have been financed by long term federal com-

mitments to make principal and interest payments in the private credit markets. Beginning in 1987, the administration plans to provide direct federal financing in the form of fully funded grants to Public Housing Agencies and Indian Housing Authorities. For more information on this change, refer to the description below of the impact of the proposed legislation.

Rental rehabilitation and development grants.—The Housing and Urban-Rural Recovery Act of 1983 authorized programs of assistance grants to States and localities to stimulate the rehabilitation of older multifamily units and the development of new construction units.

Housing vouchers have been made available to support the Rental Rehabilitation Grant Program in 1985.

The Rental Housing Development Grants and Rental Rehabilitation Grants programs are proposed to be terminated in 1987. The $150 million appropriated for these programs in 1986 is included in the $4.8 billion proposed for rescission in 1986.

Rent Supplement.—The program of reservations for the conversion of units from Rent Supplement to section 8 was completed in 1985. No new commitments for conversions or rescissions of recaptured authority are projected for 1986 and thereafter. However, recaptures will continue from the pipeline of units for which section 8 authority has been reserved, but which have not yet converted. A supplemental is being proposed in 1986 to cancel any recaptured rent supplement or rental housing assistance authority. Rent supplement assistance payments will continue to be made on behalf of qualified low-income tenants in approximately 29,000 units which are not expected to convert to section 8 after 1986.

Section 235.—The Housing and Urban-Rural Recovery Act of 1983 (Public Law 98-181) authorized a restructured section 235 program based on a 10-year interest reduction subsidy. A total of $150 million of budget authority was provided in the Second Supplemental Appropriations Act of 1984 (Public Law 98-396) to fund the program, and it is estimated that the unobligated balances will be reserved in 1986. In 1986, the rescission request proposes that recaptured budget authority for this program be subject to the same rescission and merger provisions as for other programs.

Section 236.—The Housing and Urban Development Act of 1968, as amended, authorizes the section 236 Rental Housing Assistance Program which subsidizes the monthly mortgage payment that an owner of a rental or cooperative project is required to make. This interest subsidy reduces rents for lower income tenants.

College housing grants.—No new applications for grants have been approved since the program was terminated in 1973. Payments are made pursuant to the existing contracts.

The budget proposes language that would terminate the Rental Housing Development Grants program and repeal authorizing language in section 17 of the United States Housing Act of 1937. In addition, language is being proposed to rescind authority provided in the 1986 HUD-Independent Agencies Appropriation Act (P.L. 99-160). Under the program, assistance is provided to States and units of local government to enable the development of rental housing.

The budget does not propose a 1987 appropriation for the Rental Rehabilitation Grants Program. Under this grant program, authorized by section 17 of the U.S. Housing Act of 1937, assistance has been provided to States and cities to enable the rehabilitation of rental properties in support of the section 8 voucher program. Language is proposed that would terminate the Rental Rehabilitation Grants program and repeal authorizing language in section 17 of the United States Housing Act of 1937.

This schedule reflects the impact on the annual contributions for Assisted Housing Program of the proposed change in the method of financing Public and Indian Housing construction and modernization activities. These changes would end reliance upon the private credit markets for financing and substitute direct financing by HUD. Associated with this reform proposal is the deobligation and rescission of unliquidated obligated balances of contract authority and budget authority heretofore used to support private market credit instruments for projects which have not been permanently financed.

The schedule also reflects savings associated with proposed improvements to subsidized tenant income verification procedures. The proposal would authorize and require Federal, State, and local government agencies to release social security or employer identification numbers to HUD or other administering agencies in order to verify tenant income using post-audit computer matching.

Additional authorizing language will be proposed to implement these changes.

Troubled projects operating subsidies are provided to financially troubled subsidized projects assisted under certain FHA insuring authorities. The subsidies are intended to prevent potential losses to the FHA fund resulting from project insolvency and to preserve these projects as a viable source of housing for low- and moderate-income tenants.

Funding is provided for essential repairs to correct deficiencies resulting from deferred maintenance. No appropriation is requested for 1987. However, an esti-

This demonstration program tested whether contracting directly with local public housing agencies and section 202 housing for the elderly or handicapped sponsors to supply congregate services is more effective than alternative Health and Human Services (HHS) and other social services programs. Congregate services can include meal services and other support services. These three- to five-year contracts commenced in 1980 and were evaluated over the life of the contracts. No additional resources are requested for 1987 since the demonstration program has been completed and the results of the demonstration were inclusive.

Section 620 of the National Manufactured Housing Construction and Safety Standards Act of 1974, as amended, authorizes enforcement of appropriate construction standards for the construction, design and performance of manufactured homes to assure their quality, durability and safety. All manufactured homes produced since the standards took effect on June 15, 1976 must comply with Federal construction and safety standards. The States are actively encouraged to participate in the program under compliance plans approved by HUD.

A fee is charged to the manufacturers for each manufactured home produced to cover the costs of the monitoring and enforcement activities by HUD contract agents. These fees are deposited in a special fund administered by the Department. Fee receipts are transferred to the Salaries and expenses account to defray the direct administrative expenses of the program.

The Interstate Land Sales Full Disclosure Act provides protection to the public with respect to purchases or leases of subdivision lots. Statements of record must be filed with the Secretary before subdivisions with 100 or more lots may be sold in interstate commerce, except when the subdivision is eligible for exemption.

The Secretary is authorized to charge a fee, to be paid by the developer when filing a statement of record. The fee receipts are permanently appropriated and have helped finance a portion of the direct administrative expenses incurred in program operations. During 1987, the schedule of fees will be changed to provide additional receipts to fully offset program costs. Legislation will be proposed to remove the current $1,000 fee limit on any one developer.

[1] Claims on current mortgages. In 1985 the outstanding balance of multifamily mortgages was increased by about $10.6 billion to reflect corrections in the reporting system.

The FHA fund consists of four separate funds. Financial data for each individual fund is maintained for control and reporting purposes.

The Mutual mortgage insurance fund provides for the Department's basic single family mortgage insurance program. It is a mutual fund where mortgagors, upon termination of their mortgages, share surplus premiums paid into the fund that are not required for operating expenses or losses.

The Cooperative management housing insurance fund, also a mutual fund, provides mortgage insurance for management-type cooperatives authorized by section 213 of the National Housing Act, as amended.

The General insurance fund provides for a large number of specialized mortgage insurance programs, including the insurance of loans for property improvements as well as for cooperatives, condominiums, housing for the elderly, land development, group practice medical facilities and nonprofit hospitals.

The Special risk insurance fund provides mortgage insurance on behalf of mortgagors eligible for interest reduction payments who otherwise would not be eligible for mortgage insurance. In addition, the fund provides insurance on mortgages covering experimental housing where strict adherence to State or local building regulations is not observed. Also provided is insurance for high-risk mortgagors who normally would not be eligible for mortgage insurance.

Expenses and losses connected with defaulted notes, assigned mortgages and acquired properties are charged to the appropriate insurance fund by the mortgage insurance program. During 1987, it is estimated that applications for single-family and multifamily mortgage insurance covering 709,300 units will be received and that mortgage insurance will be written covering 552,900 single-family and multifamily units. In addition, it is estimated that approximately 46,586 single-family and multifamily units will be acquired by the Department during 1987 and that 49,852 single-family and multifamily units will be sold. More detailed activity information follows in the "Program Highlights" table shown below.

Insurance reserves from operations reflect the interest earned on mortgage notes and the income and expenses applicable to acquired properties.

Insurance reserves from operations at the end of 1987 are estimated to be in a surplus position for the Mutual mortgage insurance and Cooperative management housing insurance funds, but in a deficit status of about $5.7 billion for the two other funds. The status of estimated insurance reserves from operations (retained income or deficit) through 1987 is as follows:

STATUS OF INSURANCE RESERVES FROM OPERATIONS

The Department has taken several steps to reduce the net loss on acquisition and sale of properties and notes. These include faster foreclosures of properties in default and faster sales of acquired properties to reduce holding costs. In 1987, the Department will offer to sell current purchases money mortgage and assigned mortgages notes from its portfolio. The mortgages will be sold without reinsurance and are expected to result in proceeds of $210 million.

For 1986, a new Temporary mortgage assistance payments program is being implemented that is designed to prevent precipitous foreclosure by helping insured homeowners who have experienced temporary financial reverses and cannot make their full monthly mortgage payments. This new program is viewed as a viable alternative to the Home mortgage assignment program currently being carried out by the Department and will assist in the effort to minimize insurance claims against the FHA fund.

Budget program.—The budget proposes an appropriation of $273 million to restore the net realized losses from the sale of property and notes covered by the General insurance and Special risk insurance funds.

Financing.—In 1985, $19.1 million of debentures were issued and $41.6 million were redeemed. There was $335.0 million repaid to the Treasury in 1985. It is estimated that $308 million will be repaid to the Treasury in 1986 and $580 million in 1987. Beginning in 1987, the up-front premium will be increased from 3.8 to 5 percent of the amount insured and will be payable by the purchaser at loan settlement. This budget also reflects the elimination of the law allowing financing of up-front premiums and closing costs as part of the mortgage, establishes a gross income limitation of $40 thousand for home purchases using FHA insurance, and removes the authority to insure second homes and investor loans.

Operating expenses.—Funds are paid directly into a consolidated account, Salaries and expenses, Department of Housing and Urban Development, for administrative expenses based on workload related to programs financed from the FHA fund.

The Housing for the elderly or handicapped fund was established pursuant to section 202 of the Housing Act of 1959, as amended. The fund provides direct loans to nonprofit organizations building and managing housing projects for lower income persons who are elderly or handicapped.

Projects must include an assured range of necessary services for the occupants of such projects. In addition, the section 8 lower income housing assistance payments program is used in conjunction with the section 202 program. Applications under the two programs are processed simultaneously. The budget proposes the cessation of new activity, and proposes instead to meet the housing needs of those served by the section 202 program using a housing voucher approach. Consequently, the requested 1987 loan limitation of $30.3 million will be available only for amendments to previously approved projects.

The program and financing schedule for this account summarizes the Federal government's obligations for this program. The amounts reflected in the following summary of administrative commitments reflect outstanding section 202 fund reservations, whereas, the obligations portion of the program and financing schedule reflects commitments which have reached the initial loan closing stage of processing.

The Nonprofit sponsor assistance fund provides interest-free loans to nonprofit organizations to plan housing projects to be financed under the Section 202 Housing for the elderly or handicapped program. To ensure a sufficient commitment by the sponsor to the proposed project, the fund will only finance up to 80% of the start-up costs through these "seed money" loans. Sponsors are required to demonstrate their financial capacity by providing 20% from their own funds which is repaid from the initial proceeds of the section 202 construction loan. Loans may not exceed $50,000. Consistent with the proposal to utilize vouchers instead of new construction subsidies, the budget does not request any new loan authority for non-profit sponsor assistance.

The Housing and Urban Development Act of 1968 authorized the Secretary to establish a revolving fund into which rental collections in excess of the established basic rents for units in section 236 subsidized projects would be deposited.

The Housing and Community Development Amendments of 1978 authorized the Secretary, subject to approval in appropriation acts, to transfer excess rent collections received after 1978 to the Troubled projects operating subsidy program. Prior to that time, collections were used for paying tax and utility increases in section 236 projects. The Housing and Community Development Act of 1980 amended the 1978 Act by authorizing the transfer of excess rent collections regardless of when collected.

Payments are provided to assist public housing agencies (PHAs) and Indian Housing Authorities (IHAs) to meet certain deficits in the operation of PHA-owned and IHA-owned low-income housing. These payments are in addition to the annual contributions for debt service provided by HUD.

The operating subsidy estimates for 1987 are based upon the Performance Funding System (PFS). The estimates continue to reflect increased tenant payments resulting from the impact of implementing various provisions included in the Housing and Urban Development Amendments of 1981 (Public Law 97-35). The estimates also reflect recent legislation changing the definition of adjusted tenant income (Public Law 98-181) and lower utility consumption estimates based on existing and anticipated energy conservation improvements. In addition, the estimates assume that 1987 expense levels will be held to the 1986 level.

The Low-Rent Public Housing Loan Fund is used to provide direct Federal loans to finance Public Housing Agency (PHA) and Indian Housing Authority (IHA) construction, acquisition, and modernization activities. These loans are made from available resources of this fund and from up to a current ceiling of $15.7 billion of borrowings from the Treasury. Payments to amortize fully the indebtedness (based upon tax-exempt interest rates) incurred by the PHAs and IHAs for these purposes are provided from the Subsidized housing programs account to liquidate contract authority under existing Annual Contributions Contracts (ACCs). Starting in 1985, these obligations are being liquidated through permanent, indefinite appropriations.

The administration has proposed and again is proposing to reform the financing of Public and Indian Housing development and modernization. This reform will not affect program levels, but will simplify the manner in which the programs are financed. The financing of these activities through the use of tax-exempt obligations for completed and on-going PHA and IHA development and modernization activities will not resume. Instead, the Department's financing needs for these programs will be met through Treasury borrowings, and the Department's separate financing operations will be consolidated into Treasury's general government financing operations.

Since the enactment of the 1984 Deficit Reduction Act, questions have been raised concerning the tax status of the PHA and IHA notes. As a result, between September 1984 and July 1985, the Department used Treasury borrowings to provide direct loans to PHAs and IHAs to redeem outstanding short-term notes as they mature and to finance development and modernization activities. Development and modernization activities continue to be funded with direct loans financed through Treasury borrowing. Therefore, to meet present and short-term future needs of the fund, the borrowing limitation has been increased by the President from $1.5 to $15.7 billion, as is authorized under section 4 of the U.S. Housing Act. A further increase to $16 billion may be necessary to satisfy the balance of loan fund requirements for 1986 should debt forgiveness not be enacted by mid-year. The 1985 Continuing Resolution (Public Law 98–473) overrode provisions in section 4 of the Housing Act by specifying that the Department was to extend loans to PHAs and IHAs at tax-exempt (instead of taxable) interest rates to be used to meet PHA and IHA project financing needs resulting from the suspension of note sales.

The Federal commitment to provide ACC payments has effectively constituted a full Federal guarantee of the outstanding principal financed in the private markets backed by the Treasury borrowing authority provided under section 4 of the U.S. Housing Act.

To implement the administration's reform proposal, legislation has been submitted which will involve the cancellation of (1) PHA and IHA direct loans, (2) Federal debt service obligations of ACCs for projects which have not reached permanent financing, and (3) Treasury debt incurred as a result of the direct loans extended by HUD to PHAs and IHAs to redeem notes and finance development and modernization activities committed through the end of 1986. This forgiveness of Treasury debt, will occur annually and unliquidated budget authority remaining from the subsidized housing payments appropriation will be deobligated and rescinded.

Short-term or temporary financing consists of direct loans to the PHAs/IHAs during early stages of development or modernization and, prior to 1986, federally guaranteed short-term notes issued by PHAs/IHAs (loans by private lenders). The status of temporary financing follows:

LOANS TO FEDERAL NATIONAL MORTGAGE ASSOCIATION

The Treasury is authorized to make up to $2.25 billion of loans to the Federal National Mortgage Association. Such loans were made in the first few months of the Association's existence as a private corporation while it arranged lines of credit with commercial banks. No loans have been made since that time and the loan authority will be used only in emergency situations.

The Association is required to manage and liquidate its initial mortgage portfolio and other mortgages, loans or obligations. Liquidation of the portfolio is accomplished through regular principal repayments according to their amortization schedules, by sales of mortgages when they can be absorbed by private investors without disruption of normal market conditions and through principal credits arising from prepayments and foreclosures.

The fund's initial portfolio consisted of mortgages on hand, or purchased under contracts made before November 1, 1954. Certain additional mortgages, loans, and other obligations may be acquired for this portfolio from the Secretary of Housing and Urban Development. Residential housing mortgages may also be acquired from any Federal instrumentality.

Budget program.—Congress approved appropriation language included in the 1985 Budget that: (1) forgave all outstanding Treasury borrowing issued under the Special Assistance Functions Fund and Emergency Mortgage Purchase Assistance Fund and (2) transferred all remaining assets and liabilities of these funds to the Management and Liquidating Functions Fund.

Mortgage purchases, representing deliveries from commitment contracts in prior years of the Special Assistance Functions Fund and the Emergency Mortgage Purchase Assistance Fund are estimated at $351 million in 1986 and $163 million in 1987 and sales of these mortgages are estimated at $947 million in 1986 and $735 million in 1987.

Financing.—These functions are financed principally by portfolio liquidations, and, in the sales of portfolio mortgages and participation certificates in mortgage pools.

Operating results.—Net loss of $158 million and $186 million is estimated for 1986 and 1987, respectively.

The Housing and Urban Development Act of 1968 authorized the Government National Mortgage Association (GNMA) to guarantee the timely payment of principal and interest on trust certificates or other securities issued by any financial institution approved for this purpose, and based on and backed by a trust or pool of FHA-insured, FmHA-insured, or VA-guaranteed mortgages.

GNMA guarantees the timely payment of principal and interest on the guaranteed securities. Actual losses for 1985 and estimated losses for 1986 and 1987 are presented below.

Budget program.—Program activity is summarized in the following table.

[In thousands of dollars]

	1985 actual	*1986 estimate*	*1987 estimate*
Commitments issued	54,597,400	60,463,480	55,356,880

Securities outstanding	201,025,661	234,680,568	265,458,085

Financing.—In addition to an application fee, guarantee fees and other charges are assessed issuers of guaranteed securities to cover costs incurred by GNMA in connection with the guarantees and to establish a reserve against possible future payments of claims under the guarantee. The budget reflects two proposed guarantee fee increases: (1) A proposed nine basis point increase (from six basis points to fifteen basis points) in guarantee fees for the basic MBS program to take effect in 1987 and (2) a proposed five basis point increase (from fifteen basis points to twenty basis points) in guarantee fees for the basic MBS program to take effect in 1988. These proposed fee increases are to gradually bring GNMA's fee structure closer to that charged by other private issuers of mortgage-backed securities who provide similar guarantees, and is part of a Government-wide effort to facilitate additional private sector activity in the secondary market for home mortgages. Fee increases are also being proposed for the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation.

Operating results.—Fee collections and other income are expected to exceed expenses by $332 million in 1987. This amount will be retained to cover future year expenses and as a reserve against losses that may be incurred on guarantees.

The National Housing Act, as amended, authorized the Association to create trusts to facilitate the financing of mortgages and other loan obligations owned by Government agencies. Under this authority, participations in the interest and principal collections on pooled loan obligations pledged by various trustor agencies were sold to private investors.

The budget schedules of the trustor agencies originally owning the loan obligations reflected sale of participation certificates as borrowing from the public. Collections on the pooled obligations are transferred to the Association and invested until distributed to the holders of participation certificates as required by the trust agreement. Collections are then redistributed to trustor agencies for payment of interest and retirement of certificates.

Whenever interest collections on pooled obligations, together with investment income, are insufficient to cover required interest payments and a share of administrative and other costs, the trustor agencies pay to the Association, as trustee, amounts equal to the insufficiencies. The costs of any such insufficiencies are covered by appropriations which appear in the accounts of the trustor agencies or by balances available in those accounts.

In the event the principal collections on pooled loans are not sufficient to meet scheduled retirements of participation certificates, the Association, as trustee, may either borrow from the Treasury or sell additional certificates to redeem those coming due. Alternatively, those trustor accounts with unobligated balances available may repurchase pooled loans to provide the cash required for scheduled redemptions.

Title V of the Energy Security Act of 1980 authorized the creation of the Solar Energy and Energy Conservation Bank to encourage energy conservation and the use of solar energy. It has provided funds to subsidize loans and grants for the installation of energy conservation and solar energy improvements in single and multifamily residences, and agricultural and commercial buildings.

In 1985, the Bank provided additional funds to the 52 States and territories participating in the program and awarded funds to three new participants. A total of $33.0 million was obligated to the States including the 1985 appropriation of $15 million, and $5.3 million of recaptured funds. No funds were appropriated for 1986, and it is anticipated that approximately $3.5 million in recaptured funds will be obligated to States during 1986. The remaining $5.9 million of obligations for 1986 represents a portion of the funds allocated in 1985, but not obligated until 1986, and administrative expenses. The authorization for the Solar Bank program expires on September 30, 1987 and no appropriation is requested for 1987.

Title I of the Housing and Community Development Act of 1974, as amended, authorizes the Secretary to make grants to units of general local government and States to fund local community development programs.

Funds are distributed to eligible entitlement applicants using the higher of two objective formulas. Funds must be allocated between entitlement cities and urban counties and States and small cities.

Legislation is being proposed to change the distribution of entitlement and nonentitlement funds in 1987 from 70/30 percent to 65/35 percent. This percentage distribution will allow States to undertake more of the community development activities currently carried out by the Farmers Home Administration. In addition, $500 million of the 1986 appropriation is proposed for deferral to 1987. This would provide a program level of $2.6 billion in each of 1986 and 1987. As part of this proposal, the administration is planning to reform the process through which CDBG grants are distributed to mitigate the effect of these reductions on communities with the greatest need.

Budget program.—An appropriation of $2,124.8 million is proposed for 1987. Outlays are estimated at $3,577 million in 1986 and $3,150 million in 1987.

[1] Loans guaranteed by HUD and disbursed by the FFB are shown as FFB direct loans in this schedule. However, the limitation enacted or proposed to be enacted in appropriations acts applies to the guaranteed loan commitments of the originating agency. The amounts of those guaranteed loan commitments reflected in this schedule and subject to such limits are $225,000 thousand in 1985, and $222,525 thousand in 1986.

Guarantees of loans disbursed by the Federal Financing Bank under section 108 of the Housing and Community Development Act of 1974, as amended, have been provided to permit eligible communities to finance acquisition of real property and rehabilitation of publicly owned real property, plus certain related expenses. No guarantee commitments are proposed for 1987, and leg-

[1] The 1986 loan level is subject to sequestration under Public Law 99-177. The post-sequestration loan level constitutes a de facto limitation.

[2] Net adjustment is due to refinancing delinquent loans.

Section 312 of the Housing Act of 1964, as amended, authorizes loans for the rehabilitation of residential and commercial properties. An estimated $85.0 million of new loans would occur in 1986, through the use of carryover balances, loan repayments, and other program income. However, the budget proposes that only $11 million of that amount be used for new loans and that the section 312 program be terminated in 1986.

Title I of the Housing Act of 1949, as amended (42 U.S.C. 1450 et seq.), authorized Federal capital grants and development loans to local public agencies for rehabilitation and redevelopment of slums and blighted areas.

Title I of the Housing and Community Development Act of 1974 (Public Law 93-383) terminated this program on January 1, 1975. No commitments for new grants or loans have been made since that date. Eligible activities of the terminated program may be funded, at the option of the grant recipient, under the Community development block grant program, authorized by the 1974 Act.

The assets and liabilities of the Urban Renewal program will be transferred to the Revolving Fund (Liquidating Programs) at the end of 1986, as authorized by the 1974 Act. Loan commitments previously made under this program are still outstanding and will continue until financial settlement of the projects involved is reached. The status of loan commitments outstanding at the end of each period is as follows:

[1] Represents prior year repayments in 1985 and transfer from Urban renewal programs in 1987.

The Revolving fund (liquidating programs) was established by the Independent Offices Appropriation Act of 1955 for the more efficient liquidation of assets acquired under a number of housing and urban development programs. The budget reflects the transfer of assets and liabilities of the Urban Renewal Program to the Revolving fund (liquidating programs) at the start of 1987, as authorized by the Housing and Community Development Act of 1974.

Financing.—In the past, certificates of participation in pools of public facility loans were sold. Funds were appropriated annually to cover the difference between interest due on the participation certificates and interest collections on the loans underlying the certificates.

The budget authority required for interest insufficiencies was transferred to the Revolving fund (liquidating programs) when public facility loan assets and liabilities were transferred to this account in 1975. The computation of budget authority required for public facility loans is shown in the following table:

The Housing and Urban Development Act of 1970 directs the Secretary to undertake programs of research, studies, testing, and demonstrations related to the HUD mission. These functions are carried out internally and through contracts with industry, nonprofit research organizations, and educational institutions, and through agreements with State and local governments and other Federal agencies.

In 1987, the Department will maintain its emphasis on improving the efficiency, effectiveness, and equity of HUD programs, and on identifying ways of achieving cost reductions.

The fair housing assistance program, authorized by title VIII of the Civil Rights Act of 1968, provides funding to State and local agencies and community housing resource boards to aid in eliminating housing discrimination.

The budget proposes financial assistance of $4.0 million for 110 agencies to assure prompt and effective processing of title VIII (Civil Rights Act of 1968) complaints. The budget also proposes funding of $1.0 million for 50 community housing resource boards which assist HUD, realtors and builders in designing, implementing, and monitoring voluntary affirmative marketing agreements and programs.

In 1987, this program will be revised as part of a comprehensive fair housing strategy which will also include the proposed "Fair Housing Initiatives Program." The reduced appropriation request for this program is dependent on the enactment of the new proposal which

This fund is the repository of gifts and bequests which the Secretary of Housing and Urban Development is authorized to accept and use for the purposes of aiding the work of the Department. The provision of section 7(k)(1) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(k)(1), authorizes the installment of a fund amount for the above purpose.

TITLE IV—GENERAL PROVISIONS

SEC. 401. Where appropriations in titles I and II of this Act are expendable for travel expenses and no specific limitation has been placed thereon, the expenditures for such travel expenses may not exceed the amounts set forth therefor in the budget estimates submitted for the appropriations: *Provided*, That this section shall not apply to travel performed by uncompensated officials of local boards and appeal boards of the Selective Service System; to travel performed directly in connection with care and treatment of medical beneficiaries of the Veterans Administration; to travel performed in connection with major disasters or emergencies declared or determined by the President under the provisions of the Disaster Relief Act of 1974; to site-related travel performed in connection with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980; to site-related travel under the Solid Waste Disposal Act, as amended; or to payments to interagency motor pools where separately set forth in the budget schedules: *Provided further*, That if appropriations in titles I and II exceed the amounts set forth in budget estimates initially submitted for such appropriations, the expenditures for travel may correspondingly exceed the amounts therefor set forth in the estimates in the same proportion.

SEC. 402. Appropriations and funds available for the administrative expenses of the Department of Housing and Urban Development and the Selective Service System shall be available in the current fiscal year for purchase of uniforms, or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); hire of passenger motor vehicles; and services as authorized by 5 U.S.C. 3109.

SEC. 403. Funds of the Department of Housing and Urban Development subject to the Government Corporation Control Act or section 402 of the Housing Act of 1950 shall be available, without regard to the limitations on administrative expenses, for legal services on a contract or fee basis, and for utilizing and making payment for services and facilities of Federal National Mortgage Association, Government National Mortgage Association, Federal Home Loan Mortgage Corporation, Federal Financing Bank, Federal Reserve banks or any member thereof, Federal home loan banks, and any insured bank within the meaning of the Federal Deposit Insurance Corporation Act, as amended (12 U.S.C. 1811-1831).

SEC. 404. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 405. No funds appropriated by this Act may be expended—

(1) pursuant to a certification of an officer or employee of the United States unless—

(A) such certification is accompanied by, or is part of, a voucher or abstract which describes the payee or payees and the items or services for which such expenditure is being made, or

(B) the expenditure of funds pursuant to such certification, and without such a voucher or abstract, is specifically authorized by law; and

(2) unless such expenditure is subject to audit by the General Accounting Office or is specifically exempt by law from such audit.

SEC. 406. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretary of the Department of Housing and Urban Development, who, under title 5, United States Code, section 101, is exempted from such limitation.

SEC. 407. None of the funds provided in this Act may be used for payment, through grants or contracts, to recipients that do not share in the cost of conducting research resulting from proposals not specifically solicited by the government: *Provided*, That the extent of cost sharing by the recipient shall reflect the mutuality of interest of the grantee or contractor and the Government in the research.

SEC. 408. None of the funds provided in this Act may be used, directly or through grants, to pay or to provide reimbursement for payment of the salary of a consultant (whether retained by the Federal Government or a grantee) at more than the daily equivalent of the maximum rate paid for GS-18, unless specifically authorized by law.

[SEC. 409. No part of any appropriation contained in this Act for personnel compensation and benefits shall be available for other object classifications set forth in the budget estimates submitted for the appropriations.**]**

SEC. **[**410**]** *409.* None of the funds in this Act shall be used to pay the expenses of, or otherwise compensate, non-Federal parties intervening in regulatory or adjudicatory proceedings. Nothing herein affects the authority of the Consumer Product Safety Commission pursuant to section 7 of the Consumer Product Safety Act (15 U.S.C. 2056 et seq.).

SEC. **[**411**]** *410.* Except as otherwise provided under existing law or under an existing Executive order issued pursuant to an existing law, the obligation or expenditure of any appropriation under this Act for contracts for any consulting service shall be limited to contracts which are (1) a matter of public record and available for public inspection, and (2) thereafter included in a publicly available list of all contracts entered into within twenty-four months prior to the date on which the list is made available to the public and of all contracts on which performance has not been completed by such date. The list required by the preceding sentence shall be updated quarterly and shall include a narrative description of the work to be performed under each such contract.

SEC. **[**412**]** *411.* Except as otherwise provided by law, no part of any appropriation contained in this Act shall be obligated or expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) for a contract for services unless such executive agency (1) has awarded and entered into such contract in full compliance with such Act and the regulations promulgated thereunder and (2) requires any report prepared pursuant to such contract, including plans, evaluations, studies, analyses and manuals, and any report prepared by the agency which is substantially derived from or substantially includes any report prepared pursuant to such contract, to contain information concerning (A) the contract pursuant to which the report was prepared and (B) the contractor who prepared the report pursuant to such contract.

[SEC. 413. No part of any appropriation contained in this Act shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.]

SEC. [414] *412.* Except as otherwise provided in section 406, none of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.

SEC. [415] *413.* None of the funds provided in this Act to any department or agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon. *(Department of Housing and Urban Development-Independent Agencies Appropriations Act, 1986.)*

Energy and minerals management.—Provides for leasing of Federal minerals onshore, for Federal mineral resource and economic evaluation, and for the supervision of minerals development activities on Federal and Indian lands, including oil and gas, coal, geothermal, oil shale, tar sands, phosphates, sodium and potash. Emphasis is also placed on surface management regulation and compliance for mining on public lands.

Lands and realty management.—Includes processing rights-of-way applications; processing land selections under the Alaska Native Claims Settlement Act and the Alaska Statehood Act; processing State indemnity selections, land exchanges, and other lands and realty cases; review and processing of public land withdrawals, and sale of lands under the terms of the Federal Land Policy and Management Act and other laws. BLM is also responsible for the system of public land records, some of which date back nearly 200 years.

Renewable resources management.—Provides for development, utilization, protection, preservation and sustained yield management of the natural resources on the public lands through such activities as forest management; range management; recreation management; soil, water, and air management; wildlife habitat management; and fire management.

Planning and data management.—Includes resource management and land use planning, and automated data management.

Cadastral survey.—Provides for identification of Federal land boundaries and legal property descriptions.

Firefighting and rehabilitation.—Provides for suppression of wildfires on or threatening the public lands; and rehabilitation of public land resources.

Technical services.—Provides for enforcement of laws and regulations governing the management, use, and protection of public lands; and for maintenance of buildings, roads, and trails.

Rattlesnake NRA and Wilderness Area.—Represents the monetary value of bidding rights issued under the authority of Public Law 96-476 and the estimated value of the quarterly adjustments to those rights required by section 7 of the Lee Metcalf Wilderness and Management Act of 1983. The bidding rights may be used as monetary credits against that portion of any coal lease bonus payments, rentals or royalties payable under the Mineral Leasing Act of 1920, as amended, and retained by the Federal Government, on any Federal coal lease won or otherwise held by the holder. The value of unused bidding rights increases at a rate set quarterly by the Secretary of the Treasury, pursuant to section 11 of the Debt Collection Act of 1982 (31 U.S.C. 3717).

Leasing of grazing lands.—State, county and privately owned grazing lands that are intermingled with public grazing lands are managed on a leased basis within the limits of receipts from such arrangements (43 U.S.C. 315m).

Payments to Oklahoma (royalties).—The State of Oklahoma is paid 37½% of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache tribal lands to be used for construction and maintenance of public roads and support of public schools (65 Stat. 252).

Payments to Coos and Douglas Counties, Oreg., from receipts, Coos Bay Wagon Road grant lands.—Out of receipts from the Coos Bay Wagon Road grant lands in Oregon, payments in lieu of taxes are made to Coos and Douglas Counties for schools, roads, highways, bridges, and port districts (53 Stat. 753–754).

Payments to counties, Oregon and California grant lands.—Fifty percent of the receipts of Oregon and California land-grant funds are paid to the counties in which the lands are situated, to be used as other county funds (39 Stat. 218; 50 Stat. 876). Starting in 1987, these payments will be based upon the "net receipts" remaining once the costs of the Oregon and California Grant Lands program have been deducted from total receipts.

Payments to States (proceeds of sales).—The States are paid 5% of the net proceeds from sale of public land and public land products (31 U.S.C. 1305).

Payments to States from grazing receipts, etc., public lands outside grazing districts.—The States are paid 50% of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

Payments to States from grazing receipts, etc., public lands within districts.—The States are paid 12½% of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.—The States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

Payments to Alaska, National Petroleum Reserve.—Alaska is paid 50% of the receipts derived from bonuses, royalties, and rentals resulting from the leasing of oil and gas in the National Petroleum Reserve in Alaska (94 Stat. 2964).

Payments to counties, national grasslands.—Of the revenues received from the use of national grasslands, 25% is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

Expenses, road maintenance deposits.—Users of certain roads under jurisdiction of the Bureau of Land Management make deposits for maintenance purposes, and moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and

California grant lands are available only for those lands (43 U.S.C. 1701 et seq.).

Payments to Nevada from receipts on land sales.—Public Law 96-586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (5%) and the county in which the land is located (10%).

Payments from proceeds, sale of water.—When lessees or operators drilling for oil and gas on public lands strike water, water wells may be developed by the Department from proceeds from sale of water from existing wells (30 U.S.C. 221-229).

The Minerals Management Service supervises exploration for and the development and production of oil, gas, and other minerals on the Outer Continental Shelf (OCS) lands and collects royalties, rentals, and bonuses due the Federal Government and Indian lessors from minerals produced on Federal, Indian and OCS lands.

Outer Continental Shelf (OCS) lands.—The program provides for: (1) performance of environmental assessments to insure compliance with the National Environmental Policy Act (NEPA); (2) conduct of lease offerings; (3) selection and evaluation of tracts offered for lease by competitive bidding; (4) assurance that the Federal Government receives fair market value for leased lands; and (5) regulation and supervision of energy and mineral exploration, development, and production operations on the OCS lands.

Royalty management.—The Royalty Management program provides accounting, auditing, and compliance activities for royalties, rentals, and bonuses due from minerals produced on Federal, Indian, allotted and OCS lands. The program includes an automated accounting system to ensure that all royalties are properly collected.

General administration.—General administrative expenses provide for management, executive direction and coordination, administrative support, Federal building space and general support services.

State regulatory program grants.—This program activity is to provide grants to States for the operation of permanent enforcement programs under the terms of the Act. As of September 30, 1985, 24 States with actual or planned coal mining facilities had approved State programs.

Federal regulatory programs.—This activity includes programs for Federal oversight of State permanent regulatory programs, for monitoring State inspection and enforcement, for the provision of technical assistance to States, for the assessment and collection of civil penalties imposed pursuant to the Act, and for the administration of the Federal regulatory program in States without approved permanent enforcement programs. In addition, it also includes funding for OSMRE to perform reclamation in cases where performance bonds have been forfeited and OSMRE is the regulatory authority.

General administration.—This activity includes: the Offices of the Director and Deputy Directors; the Headquarters staffs for Public Affairs, Equal Employment Opportunity, Congressional Liaison, Information Management Systems, and Regulatory Development and Issues Management; and the Divisions of Planning and Budget, Financial Management, Personnel, and Management Services. Also financed are certain categories of office-wide expenses most readily accommodated in a single budget line item. This activity represents only that portion of the total General Administration expenses which is attributable to the Regulation and Technology appropriation. The remainder has been requested from the Abandoned Mine Reclamation Fund.

ABANDONED MINE RECLAMATION FUND

For necessary expenses to carry out the provisions of title IV of the Surface Mining Control and Reclamation Act of 1977, Public Law 95-87, including the purchase of not more than 21 passenger motor vehicles, of which 15 shall be for replacement only, to remain available until expended, [$207,385,000] *$190,520,000,* to be derived from receipts of the Abandoned Mine Reclamation Fund: *Provided,* That pursuant to Public Law 97–365, the Department of the Interior is authorized to utilize up to 20 per centum from the recovery of the delinquent debt owed to the United States Government to pay for contracts to collect these debts: *Provided further,* That of the funds made available to the States to contract for reclamation projects authorized in section 406(a) of Public Law 95–87, administrative expenses may not exceed 15 per centum: *Provided further,* That none of these funds shall be used for a reclamation grant to any State if the State has not agreed to participate in a nationwide data system established by the Office of Surface Mining Reclamation and Enforcement through which all permit applications are reviewed and approvals withheld if the applicants (or those who control the applicants) applying for or receiving such permits have outstanding State or Federal air or water quality violations in accordance with section 510(c) of the Act of August 3, 1977 (30 U.S.C. 1260(c)), [including] *or* failure to abate cessation orders, outstanding civil penalties associated with such failure to abate cessation orders, or uncontested past due Abandoned Mine Land fees: *Provided further,* That the Secretary of the Interior may deny fifty percent of an Abandoned Mine Reclamation fund grant, available to a State pursuant to title IV of Public Law 95–87, when pursuant to the procedures set forth in section 521 of the Act, the Secretary determines that a State is systematically failing to adequately administer the enforcement provisions of the approved State regulatory program. Funds will be denied until such time as the State and the Office of Surface Mining Reclamation and Enforcement have agreed upon an explicit plan of action for correcting the enforcement deficiency. A State may enter into such agreement without admission of culpability. If a State enters into such agreement, the Secretary shall take no action pursuant to section 521(b) of the Act as long as the State is complying with the terms of the agreement: *Provided further,* That expenditure of moneys as authorized in section 402(g)(3) shall be on a priority basis with the first priority being protection of public health, safety, general welfare, and property from extreme danger of adverse effects of coal mining practices, as stated in section 403 of Public Law 95–87. *(30 U.S.C. 1201, 1231–43, 1302; Department of the Interior and Related Agencies Appropriations Act, 1986, as included in Public Law 99–190.)*

State reclamation program grants.—Each State with an approved reclamation program is entitled, subject to appropriation, to receive 50 percent of Abandoned Mine Reclamation Fund revenues derived from operating mines in that State. With grants, States assume primary responsibility for addressing problems such as subsidence, underground fires, open shafts and acid drainage in accordance with priorities set forth in the Act.

Federal reclamation programs.—This activity includes fee collection, and assistance to States in developing reclamation programs, abandoned mine lands reclamation projects undertaken directly by the Office of Surface Mining and the Rural Abandoned Mine Program (RAMP) administered by the Soil Conservation Service.

Small operator assistance payments.—This activity provides for payments for authorized services to eligible coal mine operators in preparing applications for mining permits under a permanent State or Federal regulatory program. These services include determining the probable hydrologic consequences of the proposed mining operation and analysis of test borings or core samplings.

General administration.—This activity includes the offices described for the General Administration activi-

BUREAU OF RECLAMATION

Appropriations to the Bureau are made from the general fund and special funds. The special funds are: (a) the Reclamation fund, largely derived from certain irrigation and power revenue; receipts from the sale, lease, and rental of public lands; and certain oil and mineral revenue; and (b) the Colorado River Dam fund, permanently available revenues of the Boulder Canyon project. The 1987 estimates are summarized by source as follows (in thousands of dollars):

Work in the Construction program is for the purpose of developing and managing water for irrigation, municipal and industrial use, salinity control, dam safety, and flood control in the 17 western States. Funding under this program provides for transfers to the Lower Colorado River Basin Development Fund and Upper Colorado River Basin fund. The Lower Colorado River Basin Development fund provides for the development and construction of the Central Arizona project. The Upper Colorado River Basin fund supports water supplies in the Upper Colorado River Basin area.

In 1987 construction will continue on 61 projects. Preconstruction activities will be underway on three projects, and work will begin on up to six new safety of dams projects and one new drainage and minor construction project.

Under the Small Reclamation Projects Act (43 U.S.C. 422a–422l), loans and/or grants can be made to non-Federal organizations for construction or rehabilitation and betterment of small water resource projects. Funds are provided to continue construction on 14 projects. This funding will provide improvements to existing irrigation distribution systems by rehabilitating pumping plants, canal and lateral structures, enlarging and extending drains and enable the purchase of maintenance equipment.

Under the Distribution Systems Loans Act (43 U.S.C. 421a–421d), loans can be made to organizations for the construction of irrigation and municipal or industrial water distribution systems on authorized Federal reclamation projects. Work will continue on one project in 1987.

This appropriation finances studies of potential projects for the conservation and utilization of water and related land resources and includes plan formulation investigations, general engineering and research activities and advance planning work.

Plan formulation investigations.—These include project investigations, individual units of the Colorado River Water Quality Improvement Program, and special investigations throughout the 17 Western States to formulate water resource development plans for river basins or specific projects.

General engineering and research.—Studies are directed toward developing new construction materials, better planning tools, and design and construction techniques. Included are studies of atmospheric water resources to increase precipitation by cloud seeding.

Advance planning.—This program provides for detailed studies of projects that are viable for implementation but require additional work toward finalizing a definite plan.

The general administrative expenses program provides for the executive direction and management of all reclamation activities, as performed by the Commissioner's offices in Washington, DC and Denver, CO, and six regional offices. The Denver Engineering and Research Center and regional offices charge individual projects or activities for direct beneficial services and related administrative and technical costs. These charges are covered under other appropriations.

Revenue from Boulder Canyon project operations is placed in this fund. Due to a recent change in law (Public Law 98-381), the fund is available without further appropriation for payment of expense of operation and maintenance of the project, for payment of interest on amounts advanced from the Treasury, and for annual payments of not more than $300 thousand each to Arizona and Nevada and for repayment of advances from the Treasury for construction or other purposes (43 U.S.C. 617a).

This fund is derived from repayments and other revenue from water resource development, together with certain receipts from sales, leases, and rentals of Federal lands in the 17 Western States, and is available for expenditure pursuant to authorization contained in appropriation acts.

SPECIAL FUNDS

Sums herein referred to as being derived from the reclamation fund[, the Colorado River Dam fund,] or the Colorado River development fund are appropriated from the special funds in the Treasury created by the Act of June 17, 1902 (43 U.S.C. 391)[, and the Act of December 21, 1928 (43 U.S.C. 617a),] and the Act of July 19, 1940 (43 U.S.C. 618a), respectively. Such sums shall be transferred, upon request of the Secretary, to be merged with and expended under the heads herein specified; and the unexpended balances of sums transferred for expenditure under the head "General Administrative Expenses" shall revert and be credited to the special fund from which derived. *(Public Law 99-141, making appropriations for energy and water development, 1986.)*

The Geological Survey provides basic scientific data and information concerning water, land, and mineral resources.

National mapping, geography, and surveys.—The national mapping program produces and makes available, in printed and digital format, cartographic and geographic base data, multipurpose and special-purpose maps. Map receipts are retained in a permanent account.

Geologic and mineral resource surveys and mapping.—The national program of onshore and offshore geologic research and investigations produces: (1) improved methods and instruments for mineral and energy assessments; (2) geologic, geophysical, and geochemical maps and analyses; (3) information on the chemistry and physics of the Earth, the climate, and the geologic processes by which it was formed and is being modified; (4) information on geologic hazards; and (5) information for use by other Federal and State agencies in the management of public lands and in national policy determinations.

Water resources investigations.—The national program of water resources investigations has the objective of appraising the Nation's water resources and insuring that the data necessary to develop and manage them efficiently and effectively are available when needed. The program produces data and analyses to support decisions on water planning, water management, energy development and enhancement of the quality of the environment.

General administration.—General administrative expenses provide for management, executive direction and coordination, and administrative support.

Facilities.—This activity finances the operation and maintenance facilities management and special support services for the operation of the national center headquarters and field centers.

Reimbursements from non-Federal sources are from States and municipalities for cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from friendly countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission related work performed at the request of the financing agency.

Minerals research.—

Health and safety technology.—This program provides technology that will reduce occupational illnesses, accidents, and disasters associated with mining. Health research addresses instrumentation and control technology to reduce levels of respirable dust and other harmful physical and chemical agents, such as noise and toxic gases found in mine air. Safety hazard reduction research investigates and develops means to help minimize ground control accidents; to reduce industrial hazards; to prevent mine disasters; to control explosives and blasting; and to analyze mining systems.

Mining technology.—The program investigates mining techniques which improve domestic mineral recovery from coal, metal and nonmetal mines, and technology to reduce the adverse environmental effects associated with mining and mineral processing activities. The program places special emphasis on improving techniques for mining domestic low-grade deposits of strategic and critical minerals.

Minerals and materials research.—Research is conducted to develop basic information on fundamental scientific and engineering principles of minerals processing that will support and enhance the mineral industry's efforts to improve productivity, increase energy efficiency and be more environmentally acceptable, and also to investigate new or alternative techniques which increase production of strategic, critical, and other essential minerals from low-grade or complex domestic ores.

Minerals information and analysis.—

Minerals information.—This program provides a reliable data base for analysis of national minerals problems by collecting, interpreting, and disseminating worldwide information relating to the production,

consumption, and availability of nonfuel minerals. The program maintains information on the production and consumption of approximately 100 mineral commodities, and also on the minerals and related industries of about 160 countries.

Mineral data analysis.—Indepth economic, technical, and policy studies that address the worldwide supply and demand for nonfuel minerals are conducted in this program. The Minerals Availability System, a computerized data base system, develops and utilizes methodologies for evaluation of mineral deposits based on quantifiable technical, economic, and social data. The program also includes mineral land assessments on certain Bureau of Land Management (BLM) and U.S. Forest Service lands, carried out jointly with the U.S. Geological Survey.

Mineral institutes.—Minerals research and engineering programs supported through public and private resources conducted at 31 colleges and universities.

General administration.—The program supports executive direction, financial and management services for the Bureau of Mines.

The Helium Act Amendments of 1960, Public Law 86-777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities. The program includes production, conservation, sale, and distribution of helium and involves the management of helium program facilities and resources to:

(a) Provide helium to meet current demands of all Federal agencies.

(b) Provide helium to meet the foreseeable future helium requirements of essential Government programs.

(c) Conduct investigations and evaluations to improve the helium program.

Habitat resources.—The Service conducts investigations, provides technical and planning assistance, makes recommendations on land and water resource development projects sponsored, licensed or assisted by the Federal Government, and conducts research on environmental contaminent effects on fish and wildlife.

Wildlife resources.—The Service manages the national wildlife refuge system of 432 units, 152 waterfowl production areas, and 58 wildlife management areas, on about 90.6 million acres; directs and coordinates national migratory bird programs; enforces Federal game laws and regulations; and conducts research to improve wildlife management.

Fishery resources.—The Service focuses on interstate and international fisheries such as anadromous species, fisheries of the Great Lakes, interstate river and reservoir systems, and fisheries on Service lands.

Endangered species.—The goal of this program is to prevent species from becoming extinct and, where possible, to return them to the point where they are neither endangered nor threatened.

General administration.—To carry out the above programs, the Service also provides general administrative support.

Federal aid in fish restoration and management.—Beginning in 1986, this activity is funded under the "Sport fish restoration account," Fish and Wildlife Service, Department of the Interior.

Federal aid in wildlife restoration.—States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds equal to the 11 percent excise tax on sporting arms and ammunition, the 10 percent excise tax on handguns, and the 11 percent tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

Proceeds from sales, water resources development projects.—Receipts collected from the sale of products from refuges on which other agencies have primary jurisdiction pay the costs of producing these products and for managing wildlife habitat.

The National Park System contains 337 areas and 79.4 million acres of land in 49 States, the District of Columbia, Puerto Rico, U.S. Virgin Islands, Guam, and the Northern Marianas. These areas have been established to protect and preserve the cultural and natural heritage of the United States and its territories. This appropriation funds the operation of individual units of the National Park System as well as planning and administrative support for the entire system.

NATIONAL PARK SERVICE—Continued

General and special funds—Continued

CONSTRUCTION—Continued

Construction.—This activity provides for: (1) rehabilitation and restoration of historic and cultural resources; (2) rehabilitation of operational structures such as visitor use and maintenance facilities, trails, and utility systems; (3) construction of new visitor use and operational facilities where the need exists; and (4) rehabilitation and construction of park roads and bridges, funded from the Federal Lands Highways program in the Department of Transportation.

Emergency and unscheduled projects.—To continue visitor services and preserve resources, minor emergency reconstruction and repair projects are performed.

Planning.—Under this activity, the National Park Service conducts environmental, architectural and engineering studies, as well as planning and design activities.

Education.—The Bureau of Indian Affairs operates schools and supports tribally operated schools.

The Bureau provides financial assistance to Indian students for higher education studies, supports some tribally operated post-secondary institutions, and offers continuing education programs in many communities.

Indian services.—This activity includes municipal-type government services for Indian communities, along with assistance to tribes in self-government and self-determination projects.

Economic development and employment program.—Economic development is encouraged and assisted through programs of technical and financial aid to Indian individuals and organizations. Indian tribal organizations and individuals are assisted with securing and managing loans. Individual Indians are assisted by vocational training and employment placement. Roads are maintained to provide for the movement of people and goods as needed by Indian communities.

Natural resources development.—This activity provides for the conservation, development and use of Indian land, water, and related resources.

Trust responsibilities.—This activity provides for the protection of Indian rights and property, and the management of assets held in trust for Indian tribes and individuals.

Facilities management.—This activity provides for the maintenance and operation of Bureau facilities and the provision for GSA owned or leased facilities.

General administration.—These functions include executive direction, administrative services, safety management, employee compensation payments, construction management, and education program management.

Tribe/agency operations.—This activity supports a stable and continuing program that is subject to local priorities rather than national programmatic priorities. Tribes/agency operations include funding for local service programs which are planned and operated at the Tribe/agency level and some programs which are consolidated at the area office level but offer direct service to tribes and individuals.

The fund was established pursuant to the Indian Financing Act of 1974. The purpose of the fund is to support a program of guaranteeing or insuring loans made by commercial lending institutions to Indians and to tribes and other Indian organizations for economic development purposes. An interest subsidy is paid from the fund on loans guaranteed or insured to reduce the Indian borrower's rate of interest. The purpose of this program is to provide an incentive to the private lending sector to make loans to Indians which would not otherwise be made.

Under the terms of the 1947 Trustee Agreement between the United States and the Security Council of the United Nations, the United States exercises full jurisdiction over the Trust Territory and is obligated to promote the political, economic, and educational advancement of the inhabitants. These responsibilities are carried out through the Department of the Interior.

The United States seeks to terminate the trusteeship and, to accomplish this, has signed a Compact of Free Association with the governments of the Marshall Islands, Palau, and the Federated States of Micronesia. The Compact for the Marshall Islands and the Federated States of Micronesia has been enacted into law by the United States Congress and is discussed in the "Compact of Free Association" account.

The peoples of the Marshall Islands and the Federated States of Micronesia have approved the Compact of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 constituted the necessary authorizing legislation to make annual payments to the two states during the next fifteen years totalling $2.3 billion. This assistance will aid in their successful development as sovereign states. A 1986 supplemental proposal requests a permanent appropriation for grants to the two governments required by the Compact.

[OFFICE OF THE SECRETARY] *SALARIES AND EXPENSES*

For necessary expenses of the Office of the Secretary of the Interior, [$43,411,000] *$42,816,000*, of which not to exceed $10,000 may be for official reception and representation expenses[: *Provided*, That notwithstanding any other provision of law, of the funds provided under this heading, not to exceed $300,000 shall be used to pay or repay the costs of development of alternative winter stock water supplies by water users who have been deprived of winter stock water from the main channel of Willow Creek, Idaho, below Ririe Dam and Reservoir because of the operation of the dam and reservoir *(hereinafter in this account referred to as claimants)*].

[Any payment to a claimant made under this section shall constitute full settlement and satisfaction of all claims such claimant may have against the United States relating to the loss of winter stock water from Willow Creek, Idaho. The provisions of this section shall not apply to any claim settled prior to the date of enactment of this Act.]

[The Secretary shall make a payment to a claimant only if—

(1) the claimant notifies the Secretary of his claim within six months after the date of enactment of this Act;

(2) the claimant provides an affidavit proving, to the satisfaction of the Secretary, his use of winter stock water from Willow Creek prior to December 31, 1979; and

(3) the claimant executes a waiver and release, in a manner satisfactory to the Secretary, of any and all claims against the United States relating to the loss of winter stock water from Willow Creek, Idaho. Such waiver and release shall be recorded in the county where the claimant's land is located.]

[Any claimant who has developed an alternate winter stock water supply since December 31, 1979, shall be eligible for a payment of an amount equal to the actual construction costs incurred by such claimant in the development of such supply, as determined by the Secretary.]

[Any claimant who has not developed an alternate winter stock water supply as of the date of enactment of this Act, shall be eligible for a payment of an amount equal to the funds necessary for the development of such supply, as determined by the Secretary. The Secretary's determination shall be based on the size and configuration of the claimant's land and on the size and type of the claimant's livestock operation.]

[Costs and expenses incurred by a claimant in the operation and maintenance of his alternate winter stock water supply shall not be reimbursable.] *(43 U.S.C. 1451, 1457; Department of the Interior and Related Agencies Appropriations Act, 1986, as included in Public Law 99-190.)*

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 101. Appropriations made in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 102. The Secretary may authorize the expenditure or transfer of any no year appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior; for the emergency rehabilitation of burned-over lands under its jurisdiction; for emergency actions related to potential or actual earthquakes, floods or volcanoes; for emergency reclamation projects under section 410 of Public Law 95-87; and shall transfer, from any no year funds available to the Office of Surface Mining Reclamation and Enforcement, such funds as may be necessary to permit assumption of regulatory authority in the event a primacy State is not carrying out the regulatory provisions of the Surface Mining Act: *Provided*, That appropriations made in this title for fire suppression purposes shall be available for the payment of obligations incurred during the preceding fiscal year, and for reimbursement to other Federal agencies for destruction of vehicles, aircraft, or other equipment in connection with their use for fire suppression purposes, such reimbursement to be credited to appropriations currently available at the time of receipt thereof**[**: *Provided further*, That funds transferred pursuant to this section must be replenished by a supplemental appropriation which must be requested as promptly as possible**]**.

SEC. 103. Appropriations made in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by sections 1535 and 1536 of title 31, U.S.C.: *Provided*, That reimbursements for costs and supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 104. Appropriations made to the Department of the Interior in this title shall be available for services as authorized by 5 U.S.C. 3109, when authorized by the Secretary, in total amount not to exceed $300,000; hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchase of reprints; payment for telephone service in private residences in the field, when authorized under regulations approved by the Secretary; **[**and**]** the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members**[**: *Provided*, That no funds available to the Department of the Interior are available for any expenses of the Great Hall of Commerce.**]**; *and such amounts as may be necessary shall be available to compensate private debt collection agencies under contract with the Secretary as provided for in the Debt Collection Act of 1982, as amended by Public Law 98-167.*

SEC. 105. Appropriations available to the Department of the Interior for salaries and expenses shall be available for uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902 and D.C. Code 4-204).

SEC. 106. Appropriations made in this title shall be available for obligation in connection with contracts issued by the General Services Administration for services or rentals for periods not in excess of twelve months beginning at any time during the fiscal year.

[SEC. 107. No funds provided in this title may be expended by the Department of the Interior for the preparation for, or conduct of, preleasing and leasing activities (including but not limited to: calls for information, tract selection, notices of sale, receipt of bids and award of leases) of lands within:

(a) An area of the Outer Continental Shelf, as defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)), located in the Atlantic Ocean, bounded by the following line: from the intersection of the seaward limit of the Commonwealth of Massachusetts territorial sea and the 71 degree west longitude line south along that longitude line to its intersection with the line which passes between blocks 598 and 642 on Outer Continental Shelf protraction diagram NK 19-10; then along that line in an easterly direction to its intersection with the line between blocks 600 and 601 of protraction diagram NK 19-11; then in a northerly direction along that line to the intersection with the 60 meter isobath between blocks 204 and 205 of protraction diagram NK 19-11; then along the 60 meter isobath, starting in a roughly southeasterly direction; then turning northeast and north until such isobath intersects the maritime boundary between Canada and the United States of America, then north northeasterly along this boundary until this line intersects the 60 meter isobath at the northern edge of block 851 of protraction diagram NK 19-6; then along a line that lies between blocks 851 and 807 of protraction diagram NK 19-6 in a westerly direction to the first point of intersection with the seaward limit of the Commonwealth of Massachusetts territorial sea; then southwesterly along the seaward limit of the territorial sea to the point of beginning at the intersection of the seaward limit of the territorial sea and the 71 degree west longitude line.

(b) The following blocks are excluded from the described area: In protraction diagram NK 19-10, blocks numbered 474 through 478, 516 through 524, 560 through 568, and 604 through 612; in protraction diagram NK 19-6, blocks numbered 969 through 971; in protraction diagram NK 19-5, blocks numbered 1005 through 1008; and in protraction diagram NK 19-8, blocks numbered 37 through 40, 80 through 84, 124 through 127, and 168 through 169.

(c) The following blocks are included in the described area: In protraction diagram NK 19-11, blocks numbered 633 through 644, 677 through 686, 721 through 724, 765 through 767, 809 through 810, and 853; in protraction diagram NK 19-9, blocks numbered 106, 150, 194, 238, 239, and 283; and in protraction diagram NK 19-6, blocks numbered 854, 899, 929, 943, 944, and 987.

(d) Blocks in and at the head of submarine canyons: An area of the Outer Continental Shelf, as defined in section 2(a) of the Outer Continental Shelf Lands Act (45 U.S.C. 1331(a)), located in the Atlantic Ocean off the coastline of the Commonwealth of Massachusetts, lying at the head of, or within the submarine canyons known as Atlantis Canyon, Veatch Canyon, Hydrographer Canyon, Welker Canyon, Oceanographer Canyon, Gilbert Canyon, Lydonia Canyon, Alvin Canyon, Powell Canyon, and Munson Canyon, and consisting of the following blocks, respectively:

(1) On Outer Continental Shelf protraction diagram NJ 19-1; blocks 36, 37, 38, 42-44, 80-82, 86-88, 124, 125, 130-132, 168, 169, 174-176, 212, 213.

(2) On Outer Continental Shelf protraction diagram NJ 19-2; blocks 8, 9, 17-19, 51-52, 53, 54, 61-63, 95-98, 139, 140.

(3) On Outer Continental Shelf protraction diagram NK 19-10; blocks 916, 917, 921, 922, 960, 961, 965, 966, 1003-1005, 1009, 1011.

(4) On Outer Continental Shelf protraction diagram NK 19-11; blocks 521, 522, 565, 566, 609, 610, 653-655, 697-700, 734, 735, 741-744, 769, 778-781, 785-788, 813, 814, 822-826, 829-831, 857, 858, 866-869, 873-875, 901, 902, 910-913, 917, 945-947, 955, 956, 979, 980, 989-991, 999.

(5) On Outer Continental Shelf protraction diagram NK 19-12; blocks 155, 156, 198, 199, 280-282, 324-326, 369-371, 401, 413-416, 442-446, 450, 451, 489-490, 494, 495, 530, 531, 533-540, 574, 575, 577-583, 618, 619, 621-623, 626, 627, 662, 663, 665-667, 671, 672, 706, 707, 710, 711, 750, 751, 754, 755, 794, 795, 798, 799.

(e) Nothing in this section shall prohibit the lease of that portion of any blocks described in subsection (d) above which lies outside the geographical boundaries of the submarine canyons and submarine canyon heads described in subsection (d) above: *Provided*, That for purposes of this subsection, the geographical boundaries of the submarine canyons and submarine canyon heads shall be those recognized by the National Oceanographic and Atmospheric Administration, Department of Commerce, on the date of enactment of this Act.

(f) Nothing in this section shall prohibit the Secretary of the Interior from granting contracts for scientific study, the results of which could be used in making future leasing decisions in the planning area and in preparing environmental impact statements as required by the National Environmental Policy Act.

(g) References made to blocks, protraction diagrams, and isobaths are to such blocks, protraction diagrams, and isobaths as they appear on the map entitled Outer Continental Shelf of the North Atlantic from 39° to 45° North Latitude (Map No. MMS-10), prepared by the United States Department of the Interior, Minerals Management Service, Atlantic OCS Region.]

SEC. [108] *107.* None of the funds appropriated or otherwise made available pursuant to this Act shall be obligated or expended to finance changing the name of the mountain located 63 degrees, 04 minutes, 15 seconds west, presently named and referred to as Mount McKinley.

SEC. [109] *108.* Notwithstanding any other provision of law, appropriations in this title shall be available to provide insurance on official motor vehicles, aircraft, and boats operated by the Department of the Interior in Canada and Mexico.

[SEC. 110. No funds provided in this title may be used to detail any employee to an organization unless such detail is in accordance with Office of Personnel Management regulations.]

[SEC. 111. The Secretary of the Interior is hereby directed to make every effort during the balance of fiscal year 1986 to resolve the outstanding conflicts with respect to the future leasing and protection of lands on the California outer continental shelf for oil and gas exploration and development. To this end, the Secretary shall submit to the Congress once every 60 days following the date of enactment of this Act until the end of fiscal year 1986 a report summarizing the progress of negotiations carried out to resolve these outstanding conflicts. Such negotiations shall be conducted by the Secretary and the following Members of Congress to be designated by the Speaker of the House of Representatives and the Majority Leader of the Senate:

(1) The Chairmen and ranking minority members of the following committees and subcommittees of the Congress having jurisdiction over these issues:

(A) The Subcommittee on the Interior of the Committee on Appropriations of the House of Representatives.

(B) The Subcommittee on Energy and the Environment of the Committee on Interior and Insular Affairs of the House of Representatives.

(C) The Subcommittee on the Panama Canal and Outer Continental Shelf of the Committee on Merchant Marine and Fisheries of the House of Representatives.

(D) The Subcommittee on the Interior of the Committee on Appropriations of the Senate.

(E) The Committee on Energy and Natural Resources of the Senate.

(2) Two United States Senators from California.

(3) Seven members of the California delegation to the House of Representatives.]

[SEC. 112. None of the funds provided by this Act shall be expended by the Secretary of the Interior to promulgate final regulations concerning paleontological research on Federal lands until the Secretary has received the National Academy of Sciences' report concerning the permitting and post-permitting regulations concerning paleontological research and until the Secretary has, within 30 days, submitted a report to the appropriate committees of the Congress comparing the National Academy of Sciences' report with the proposed regulations of the Department of the Interior.] *(Department of the Interior* *and Related Agencies Appropriations Act, 1986, as included in Public Law 99-190.)*

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 201. Appropriations in this title shall be available for expenditure or transfer (within each bureau or office), with the approval of the Secretary, for the emergency reconstruction, replacement, or repair of aircraft, buildings, utilities, or other facilities or equipment damaged or destroyed by fire, flood, storm, or other unavoidable causes: *Provided*, That no funds shall be made available under this authority until funds specifically made available to the Department of the Interior for emergencies shall have been exhausted.

SEC. 202. The Secretary may authorize the expenditure or transfer (within each bureau or office) of any appropriation in this title, in addition to the amounts included in the budget programs of the several agencies, for the suppression or emergency prevention of forest or range fires on or threatening lands under jurisdiction of the Department of the Interior.

SEC. 203. Appropriations in this title shall be available for operation of warehouses, garages, shops, and similar facilities, wherever consolidation of activities will contribute to efficiency, or economy, and said appropriations shall be reimbursed for services rendered to any other activity in the same manner as authorized by the Act of June 30, 1932 (31 U.S.C. 1535 and 1536): *Provided*, That reimbursements for costs of supplies, materials, equipment, and for services rendered may be credited to the appropriation current at the time such reimbursements are received.

SEC. 204. Appropriations in this title shall be available for hire, maintenance, and operation of aircraft; hire of passenger motor vehicles; purchases of reprints; payment for telephone services in private residences in the field, when authorized under regulations approved by the Secretary; and the payment of dues, when authorized by the Secretary, for library membership in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

[SEC. 205. (a) Within 30 days after enactment of this Act, there shall be established in the Treasury of the United States a working capital fund to assist in the management of certain support activities of the Bureau of Reclamation (hereafter referred to as the "Bureau"), Department of the Interior. The fund shall be available without fiscal year limitation for expenses necessary for furnishing materials, supplies, equipment, work, and services in support of Bureau programs, and, as authorized by law, to agencies of the Federal Government and others. Such expenses may include the acquisition, replacement, and operation of a central computer and related automatic data processing equipment; engineering services; payroll and other management services; acquisition and replacement of equipment and facilities, including the purchase, lease, or rent of motor vehicles and aircraft within any limitations set forth in appropriations made to carry out the functions of the Bureau and such other activities as may be approved by the Director, Office of Management and Budget.]

[(b) The fund shall be credited with appropriations made for the purpose of providing or increasing capital. There are authorized to be transferred to the fund (at fair and reasonable values at the time of transfer) the inventories, equipment, receivables, and other assets, less the liabilities, related to the functions to be financed by the fund as determined by the Secretary of the Interior.]

[(c) The fund shall be credited with appropriations and other funds of the Bureau, and other agencies of the Department of the Interior, other Federal agencies, and other sources, for providing materials, supplies, equipment, work, and services as authorized by law. Such payments may be made in advance or upon performance.]

[(d) Charges to users will be at rates approximately equal to the costs of furnishing the materials, supplies, equipment, facilities, and services (including such items as depreciation of equipment and accrued annual leave).]

[(e) There are hereby authorized to be appropriated such sums as are necessary to carry out the purposes of this section.]

[(f) Funds that are not necessary to carry out the activities to be financed by the fund, as determined by the Secretary, shall be covered into miscellaneous receipts of the Treasury.] *(Public Law 99-141, making appropriations for energy and water development, 1986).*

TITLE III—GENERAL PROVISIONS

SEC. 301. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive Order issued pursuant to existing law.

SEC. 302. No part of any appropriation under this Act shall be available to the Secretaries of the Interior and Agriculture for use for any sale hereafter made of unprocessed timber from Federal lands west of the 100th meridian in the contiguous 48 States which will be exported from the United States, or which will be used as a substitute for timber from private lands which is exported by the purchaser: *Provided*, That this limitation shall not apply to specific quantities of grades and species of timber which said Secretaries determine are surplus to domestic lumber and plywood manufacturing needs.

[SEC. 303. No part of any appropriation under this Act shall be available to the Secretary of the Interior or the Secretary of Agriculture for the leasing of oil and natural gas by noncompetition bidding on publicly owned lands within the boundaries of the Shawnee National Forest, Illinois: *Provided*, That nothing herein is intended to inhibit or otherwise affect the sale, lease, or right to access to minerals owned by private individuals.]

SEC. [304] *303.* No part of any appropriation contained in this Act shall be available for any activity or the publication or distribution of literature that in any way tends to promote public support or opposition to any legislative proposal on which congressional action is not complete.

SEC. [305] *304.* No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. [306] *305.* None of the funds provided in this Act to any department or agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such department or agency.

SEC. [307] *306.* Except for lands described by sections 105 and 106 of Public Law 96-560, section 103 of Public Law 96-550, section 5(d)(1) of Public Law 96-312, and except for land in the States of Alaska, and lands in the national forest system released to management for any use the Secretary of Agriculture deems appropriate through the land management planning process by any statement or other Act of Congress designating components of the National Wilderness Preservation System now in effect or hereinafter enacted, and except to carry out the obligations and responsibilities of the Secretary of the Interior under section 17(k)(1) (A) and (B) of the Mineral Leasing Act of 1920 (30 U.S.C. 226), none of the funds provided in this Act shall be obligated for any aspect of the processing or issuance of permits or leases pertaining to exploration for or development of coal, oil, gas, oil shale, phosphate, potassium, sulphur, gilsonite, or geothermal resources on Federal lands within any component of the National Wilderness Preservation System or within any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning in Executive Communication 1504, Ninety-sixth Congress (House Document numbered 96-119); or within any lands designated by Congress as wilderness study areas or within Bureau of Land Management wilderness study areas: *Provided*, That nothing in this section shall prohibit the expenditure of funds for any aspect of the processing or issuance of permits pertaining to exploration for or development of the mineral resources described in this section, within any component of the National Wilderness Preservation System now in effect or hereinafter enacted, any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning, within any lands designated by Congress as wilderness study areas, or Bureau of Land Management wilderness study areas, under valid existing rights, or leases validly issued in accordance with all applicable Federal, State, and local laws or valid mineral rights in existence prior to October 1, 1982: *Provided further*, That funds provided in this Act may be used by the Secretary of Agriculture in any area of National Forest lands or the Secretary of the Interior to issue under their existing authority in any area of National Forest or public lands withdrawn pursuant to this Act such permits as may be necessary to conduct prospecting, seismic surveys, and core sampling conducted by helicopter or other means not requiring construction of roads or improvement of existing roads or ways, for the purpose of gathering information about and inventorying energy, mineral, and other resource values of such area, if such activity is carried out in a manner compatible with the preservation of the wilderness environment: *Provided further*, That seismic activities involving the use of explosives shall not be permitted in designated wilderness areas: *Provided further*, That funds provided in this Act may be used by the

Secretary of the Interior to augment recurring surveys of the mineral values of wilderness areas pursuant to section 4(d)(2) of the Wilderness Act and acquire information on other national forest and public land areas withdrawn pursuant to this Act, by conducting in conjunction with the Secretary of Energy, the National Laboratories, or other Federal agencies, as appropriate, such mineral inventories of areas withdrawn pursuant to this Act as he deems appropriate. These inventories shall be conducted in a manner compatible with the preservation of the wilderness environment through the use of methods including core sampling conducted by helicopter; geophysical techniques such as induced polarization, synthetic aperture radar, magnetic and gravity surveys; geochemical techniques including stream sediment reconnaissance and x-ray diffraction analysis; land satellites; or any other methods he deems appropriate. The Secretary of the Interior is hereby authorized to conduct inventories or segments of inventories, such as data analysis activities, by contract with private entities deemed by him to be qualified to engage in such activities whenever he has determined that such contracts would decrease Federal expenditures and would produce comparable or superior results: *Provided further*, That in carrying out any such inventory or surveys, where National Forest System lands are involved, the Secretary of the Interior shall consult with the Secretary of Agriculture concerning any activities affecting surface resources: *Provided further*, That funds provided in this Act may be used by the Secretary of the Interior to issue oil and gas leases for the subsurface of any lands designated by Congress as wilderness study areas, that are immediately adjacent to producing oil and gas fields or areas that are prospectively valuable. Such leases shall allow no surface occupancy and may be entered only by directional drilling from outside the wilderness study area or other nonsurface disturbing methods.

Sec. [308] *307.* None of the funds provided in this Act shall be used to evaluate, consider, process, or award oil, gas, or geothermal leases on Federal lands in the Mount Baker-Snoqualmie National Forest, State of Washington, within the hydrographic boundaries of the Cedar River municipal watershed upstream of river mile 21.6, the Green River municipal watershed upstream of river mile 61.0, the North Fork of the Tolt River proposed municipal watershed upstream of river mile 11.7, and the South Fork Tolt River municipal watershed upstream of river mile 8.4.

[Sec. 309. No assessments may be levied against any program, budget activity, subactivity, or project funded by this Act unless such assessments and the basis therefor are presented to the Committees on Appropriations and are approved by such committees.]

[Sec. 310. Employment funded by this Act shall not be subject to any personnel ceiling or other personnel restriction for permanent or other than permanent employment except as provided by law.]

Sec. [311] *308.* Notwithstanding any other provisions of law, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Energy, and the Secretary of the Smithsonian [Institution,] *Institution* are authorized to enter into contracts with State and local governmental entities, including local fire districts, for procurement of services in the presuppression, detection, and suppression of fires on any units within their jurisdiction.

Sec. [312] *309.* None of the funds provided by this Act to the United States Fish and Wildlife Service may be obligated or expended to plan for, conduct, or supervise deer hunting on the Loxahatchee National Wildlife Refuge.

[Sec. 313. No funds appropriated by this Act shall be available for the implementation or enforcement of any rule or regulation of the United States Fish and Wildlife Service, Department of the Interior, requiring the use of steel shot in connection with the hunting of waterfowl in any State of the United States unless the appropriate State regulatory authority approves such implementation.]

Sec. [314] *310.* None of the funds provided in this Act may be used to establish new grizzly bear populations in any unit of the National Park System or the National Forest System where no verified grizzly bear population currently exists. None of the funds provided in this Act may be used for augmentation in occupied areas of grizzly bear habitat unless an augmentation plan has been developed and made available for public review and comment in full compliance with the National Environmental Policy Act by all participating federal agencies: *Provided*, That it is not intended to prohibit the preparation of proposals to augment existing grizzly bear populations in occupied grizzly bear habitat: *Provided further*, That such augmentation may be conducted only with funds specifically identified for such purpose in an agency budget justification [and subsequently approved in a report accompanying an appropriation bill making appropriations for that agency,] or with funds provided for through reprogramming procedures: *Provided further*, That notwithstanding any other provision of law, agencies included in this Act are authorized to reimburse permittees for such reasonable expenses as may be incurred as a result of moving permitted animals from one location to another, as may be required by the permitting agency, in order to prevent harassment and attacks by grizzly bears. Such expenses are to be determined by the agency responsible for the permitted action.

[Sec. 315. Nothwithstanding any other provision of law, section 8336(j)(3)(A) of title 5, United States Code is amended by striking "5 years" and inserting in lieu thereof "10 years".]

[Sec. 316. Section 317 of title III of the Act of December 30, 1982 (96 Stat. 1966), is amended by deleting the words "but before December 31, 1985".]

[Sec. 317. Funds available to the Department of the Interior and the Forest Service in fiscal year 1986 for the purpose of contracting for services that require the utilization of privately owned aircraft for the carriage of cargo or freight shall be used only to contract for aircraft that are certified as air-worthy by the Administrator of the Federal Aviation Administration as standard category aircraft under 14 CFR 21.183 unless the Secretary of the contracting department determines that such aircraft are not reasonably available to conduct such services.]

Sec. [318] *311.* None of the funds made available to the Department of the Interior or the Forest Service during fiscal year [1986] *1987* by this or any other Act may be used to implement the proposed jurisdictional interchange program until enactment of legislation which authorizes the jurisdictional interchange.

Sec. [319] *312.* Notwithstanding any other provision of law, any lease for those Federal lands within the Gallatin and Flathead National Forests which were affected by case CV-82-42-BU of the United States District Court for the District of Montana, Butte Division, for which the Secretary has directed or assented to the suspension of operations and production pursuant to section 39 of the Act of February 25, 1920 (30 U.S.C. 184) shall be excepted from the limits on aggregate acreage set out in that Act: *Provided*, That any person, association or corporation receiving relief under this section shall bring its aggregate acreage into compliance with the provisions of the Act of February 25, 1920 (30 U.S.C. 184) within six months from the date the suspension of operation and production ends.

[Sec. 320. The provisions of section 2(a)(2)(A) of the Mineral Lands Leasing Act of 1920 (41 Stat. 437), as amended by section 3 of the Federal Coal Leasing Amendments Act of 1976 (90 Stat. 1083) shall not take effect until December 31, 1986.]

[Sec. 321. (a) None of the funds available to the Bureau of Indian Affairs for the construction of housing on lands acquired pursuant to section 11 of Public Law 93-531, as amended, shall be expended until a report is submitted to the House and Senate Committees on Appropriations detailing the proposed uses of such funds on the lands acquired pursuant to section 11 of Public Law 93-531.

(b) In addition to plans for housing, the report shall include a description of other services intended to be provided including, but not limited to, water, sewers, roads, schools, and health facilities. If such services are not to be provided the report shall describe alternative services available. The report shall further identify the proposed sites to which households will be relocated, including the distance from the Joint Use Area to such sites. This report shall be submitted no later than February 15, 1986, by the Navajo and Hopi Indian Relocation Commission and shall include the views of the Secretary of the Interior on the provision of housing and roads on the new lands.]

[Sec. 322. Notwithstanding any other provision of law, the limitation placed on the Secretary of the Interior by the last sentence of section 319 of "An Act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1985, and for other purposes", as enacted into law by Public Law 98-473 (98 Stat. 1837), shall remain in effect until Congress determines otherwise.]

[Sec. 323. The Secretary of the Interior, acting through the Bureau of Indian Affairs and in consultation and cooperation with the Secretary of Health and Human Services and the Secretary of Education, shall develop and begin implementation of a program which provides instruction in health promotion and disease prevention to juvenile Indians enrolled in schools operated by, or on behalf of, the Bureau of Indian Affairs.]

[SEC. 324. Public Law 96-388, as amended (36 U.S.C. 1401 et seq.), is further amended as follows:

(1) The first sentence of section 36 U.S.C. 1401 is amended to read: "There is hereby established as an independent Federal establishment the United States Holocaust Memorial Council (hereinafter in this chapter referred to as the 'Council').";

(2) 36 U.S.C. 1407 is amended by adding the word "invest," after the word "administer," in the first sentence, and by adding the following new sentence as the penultimate sentence: "Funds donated to and accepted by the Council pursuant to this section are not to be regarded as appropriated funds and are not subject to any requirements or restrictions applicable to appropriated funds,"; and

(3) By adding the following new sections at the end of 36 U.S.C. 1408:

"Report to the Congress.

The Executive Director shall make a full report annually to the Congress of his stewardship of the authority to construct, operate, and maintain the Holocaust Museum, including an accounting of all financial transactions involving donated funds.

Audit by the Comptroller General; access to records.

Financial transactions of the Council, including those involving donated funds, shall be audited by the Comptroller General as requested by the Congress, in accordance with generally accepted auditing standards. In conducting any audit pursuant to this section, appropriate representatives of the Comptroller General shall have access to all books, accounts, financial records, reports, files and other papers, items or property in use by the Council, as necessary to facilitate such audit, and such representatives shall be afforded full facilities for verifying transactions with the balances.".]

[SEC. 325. Each amount of budget authority provided in this Act, or made available in the Energy Security Reserve for the Clean Coal Technology Program, for payments not required by law, is hereby reduced by 0.6 per centum: *Provided*, That such reductions shall be applied ratably to each account, program, activity, and project provided for in this Act.] *(Department of the Interior and Related Agencies Appropriations Act, 1986, as included in Public Law 99-190.)*

The United States Parole Commission makes decisions to grant or deny parole to Federal prisoners serving sentences of one year and a day or more, sets conditions of parole, supervises parolees and mandatory releasees, recommits parolees in the event of violations of the conditions of supervision, and determines the termination of supervision in accordance with the Parole Commission and Reorganization Act of 1976.

In 1987, this program will meet the statutory limitations by granting or denying parole within the legal time requirements to all Federal prisoners who are eligible for parole consideration. In addition to this basic function, the Commission will seek to improve the rehabilitation process by monitoring an effective parole supervision program through the U.S. probation officers. Finally, the Commission conducts ongoing research programs and administers its responsibilities under the labor and pension laws.

Independent counsel.—Funding for an independent counsel is provided from the general legal activities appropriation whenever possible violations of Federal law are alleged against senior administration officials pursuant to the provisions of 28 U.S.C. 591, et seq. In 1985, allegations were made concerning the nominee for the Office of Attorney General, and an independent counsel was appointed to investigate the matter.

Legal activities office automation.—This account establishes in 1987, a centralized fund for the development and acquisition of office automation systems for the various legal divisions and U.S. Attorneys offices.

U.S. Attorneys.—The U.S. Attorneys are being funded from the general legal activities appropriation beginning in 1987. The U.S. Attorneys are responsible for the prosecution of criminal offenses against the United States, the representation of the Government of civil actions in which the United States is concerned, and the initiation of proceedings for the collection of fines, penalties, and forfeitures owed to the United States. The 1987 estimates provide for defense of an increasing number of monetary claims against the United States as well as expansion of drug law prosecutions.

Enforcement of antitrust and kindred laws.—The Antitrust Division administers and enforces the antitrust and related statutes. The principal statutes involved are: (1) section 1 of the Sherman Act, which prohibits combinations and conspiracies among competitors to set prices collusively or otherwise to restrain trade; (2) section 2 of the Sherman Act, which prohibits combinations and attempts to monopolize interstate trade; (3) section 7 of the Clayton Act, which prohibits corporate mergers and acquisitions that tend to lessen competition substantially or tend to monopolize; and (4) various statutory provisions that require regulatory agencies to consider the preservation of competition in the determination of public interest factors.

This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts, and the maintenance of competitive conditions.

The administration has proposed legislation to sunset the Interstate Commerce Commission and complete deregulation of the Motor Carrier, Freight Forwarder, and Water Carrier industries. Remaining rail-related activities would transfer to the Departments of Justice and Transportation. The Justice Department would assume responsibility for reviewing applications for rail-related mergers, consolidations and acquisitions.

The Federal Government is represented in each of the 94 judicial districts by a U.S. Marshal. The primary mission of the U.S. Marshals Service is responsibility for the protection of the Federal judiciary, protection of witnesses, execution of warrants and court orders, and custody and transportation of unsentenced prisoners. It is the principal support force in the Federal judicial system and an integral part of the Federal law enforcement community. Beginning in 1987, the expenses of protected witnesses and their dependents will be funded from this appropriation.

Reimbursable program.—Federal funds in 1987 are derived primarily from the U.S. Air Force for Intercontinental Ballistic Missile transportation security services provided by the U.S. Marshals Service, as well as the Bureau of Prisons for the transportation of sentenced prisoners, and the Department of State for security details at the United Nations. Non-Federal funds

General and special funds—Continued

SALARIES AND EXPENSES, UNITED STATES MARSHALS SERVICE—Continued

are derived from State and local governments for witness protection and for the transportation of prisoners pursuant to State writs.

Care of U.S. prisoners in non-Federal institutions.—Under this program, the U.S. Marshals Service contracts with State and local jails to board Federal prisoners and detainees for short periods of time. These periods of detention occur before and during a trial and while awaiting transfer to Federal institutions after conviction. Approximately 93,500 prisoners will be boarded in approximately 835 jails at an average cost of $38.38 per offender day in 1987.

Cooperative agreement program.—Agreements are negotiated with State and local governments for renovating, constructing, and equipping facilities that detain Federal prisoners.

Fees and expenses are paid to witnesses who appear on behalf of the Government in cases in which the United States is a party. Costs incurred are affected by factors over which the Department of Justice exercises little control. The U.S. attorneys and the Department's six legal divisions are served by this appropriation.

Fact witnesses.—Payment for attendance fees, per diem and travel is provided for witnesses who testify as to events or facts about which they have personal knowledge.

Protection of witnesses.—Beginning in 1987, the expenses of protected witnesses will be funded from the U.S. Marshals Service appropriation.

Expert witnesses.—Provides for the payment of fees and expenses associated with the preparation and presentation of testimony by technical and scientific experts in legal proceedings involving the United States.

Mental competency examinations.—This program provides payments to psychiatrists and physicians for court-ordered examinations of the mental competency of persons accused of offenses against the United States.

General and special funds—Continued

Fees and Expenses of Witnesses—Continued

Reports and court testimony relating to the examinations are included in these fees.

Victim compensation fund.—Established in 1985 to pay restitution, or in the case of death, compensation for the death, to any victim of a crime that causes or threatens death or serious bodily injury and that is committed by a protected witness.

Prevention and conciliation of community disputes.—The Community Relations Service (CRS) provides assistance to communities in resolving disputes, disagreements, and difficulties arising from discriminatory practices based on race, color, or national origin which impair the rights of citizens or which disrupt or threaten to disrupt peaceful relations among citizens.

The 1987 request will provide CRS with resources to continue to focus on racial disputes in the areas of law enforcement, immigration, corrections, education, employment, housing, community development, and Indian rights, among others. In 1987, CRS also anticipates continuing response to conflicts involving Indo-Chinese refugees as well as the Ku Klux Klan. CRS will continue to monitor and will help communities to forestall threats of urban civil disorder.

Reception, processing and care of Cubans and Haitians.—This activity provides for the reception, processing, resettlement, health and mental care, and other services of Cuban and Haitian entrants who entered the United States in 1980 and each year thereafter and who subsequently have been detained by the Immigration and Naturalization Service for their undocumented or unauthorized entry into the United States.

The overall objectives of the Federal Bureau of Investigation (FBI) are to have a significant impact toward reducing criminal activity, to investigate civil matters in which the Federal Government has an interest, and to provide information to the executive branch relating to national security.

These objectives result in the FBI's being actively involved in a wide range of investigations, including traditional law enforcement investigations (bank robbery, kidnaping, fugitive, bank embezzlement, etc.), investigations involving more modern phenomena (organized crime, white-collar crime, civil rights violations, antitrust violations, etc.), and investigations of hostile intelligence activities within the United States. The Drug Enforcement Administration (DEA) reports to the Director of the FBI and the FBI has concurrent jurisdiction with DEA over Federal drug violations.

The activities through which the mission is accomplished and workload data are as follows:

Criminal, security, and other investigations.—This activity includes all field investigations of the Federal Bureau of Investigation. These investigations are conducted by FBI Special Agents in 59 field offices and more than 406 resident agencies located throughout the United States and Puerto Rico. National priority investigations include white-collar crime, organized crime, terrorism and foreign counterintelligence. Other investigative areas are civil rights, fugitive, general government crimes, personal crimes, civil and general property crimes, applicant, and other investigations.

The FBI is reimbursed by other Federal agencies for certain investigative activities such as preemployment background inquiries and name checks.

This activity also includes resources devoted to national program supervision, coordination, and management of FBI investigations.

	1985 actual	*1986 estimate*	*1987 estimate*
Investigative matters	288,871	300,763	304,262
Arrests	8,545	8,597	8,774
Convictions	11,616	11,703	11,880

Investigative support.—Investigative support consists of training, forensic laboratories, attachés in foreign countries, investigative records and communications, ADP and telecommunications, and technical field support and equipment. An investment of $12 million is planned for the application of artificial intelligence techniques in the form of knowledge-based expert systems to selected top priority investigative programs such as labor racketeering, narcotics intelligence, and counterterrorism. The FBI will continue implementation of its long range automation strategy which calls for a fully integrated distributed data architecture. A

capital investment of $18.2 million is planned to allow the FBI to continue the FM radio digital voice privacy initiative in support of FBI operations.

Name checks processed	1,885,607	1,500,000	1,500,000

State and local assistance.—The FBI supports State and local law enforcement by providing training, laboratory, identification, and informational services. Emphasis is being placed on the training of State and local police instructors to enable their agencies to become more self-sufficient and, thereby, allow the FBI to concentrate its resources on high priority initiatives. Training is conducted at various locations within the United States but most courses are conducted at the FBI National Academy in Quantico, VA. Beginning in 1987, State and local officials will be charged for the cost of food, lodging and travel in connection with training at the National Academy.

The FBI's National Crime Information Center (NCIC) and Uniform Crime Reporting (UCR) program provide criminal justice information to Federal, state and local law enforcement agencies without charge. The NCIC system contains over 18 million records relating to wanted and missing persons, stolen property, and criminal histories. The UCR program collects data from nearly 16,000 law enforcement agencies and provides this information to criminal justice agencies and researchers, the academic community, and others.

The FBI's Identification Division is the national repository for fingerprint identification data. In 1987, approximately 7.5 million fingerprint cards will be processed. Processing of noncriminal fingerprint checks for State and local agencies and banking institutions is on a reimbursable basis.

Program direction.—This activity includes the management, administrative support, legal, planning, evaluation, inspection, and financial functions of the FBI. Some workload measures include press releases, assistance to media, FBI publications disseminated, title III applications, undercover operations proposals, civil actions, field office audits and position classification matters.

The mission of the Drug Enforcement Administration (DEA) is to control abuse of narcotics and dangerous drugs by restricting the aggregate supply of those drugs. At the Federal level, DEA is the lead drug law enforcement agency. DEA accomplishes its objectives through coordination with State, local, and other Federal officials in drug enforcement activities; development and maintenance of drug intelligence systems; regulation of legitimate controlled substances activities; and enforcement coordination and intelligence-gathering activities with foreign government agencies.

Cooperation among Federal law enforcement agencies is extensive, especially within the 13 organized crime drug enforcement (OCDE) task forces. DEA's involvement is integral to this nationwide coordinated enforcement strategy. When coupled with the expansion of DEA/FBI cooperative efforts, overall drug enforcement capabilities have been significantly strengthened in recent years.

The means by which DEA performs its mission are summarized by the following activities;

Domestic enforcement.—This activity aims to eliminate or immobilize major drug trafficking organizations and thereby reduce the domestic supply of illicit drugs. In 1987, additional resources are targeted at investigative efforts in the areas of cocaine, heroin, and dangerous drugs. The measures below indicate the level of activity performed by this program.

	1985 actual	*1986 estimate*	*1987 estimate*
DEA initiated arrests	6,178	6,475	6,675
Other Federal referral arrests	1,344	1,400	1,535
DEA cooperative arrests	2,940	3,110	3,120
Clandestine labs seized	329	350	400
DEA/OCDE arrests	1,980	2,100	2,380
Assets seized ($ millions)	$198	$218	$250

Foreign cooperative investigations.—This activity encompasses efforts to reduce at the source, illicit opium production, heroin, illicitly produced and diverted legitimate dangerous drugs, cocaine and marihuana destined for the United States, and the collection and dissemination of intelligence. The measures below indicate the level of activity performed by this program.

	1985 actual	*1986 estimate*	*1987 estimate*
Foreign cooperative arrests	1,120	1.300	1,500
Intelligence reports	105	105	105
Special field intelligence programs	58	58	58

Diversion control.—By authority of the Controlled Substances Act and the Comprehensive Crime Control Act (CCCA) of 1984 (Public Law 98-473), this activity addresses the problem of the diversion of controlled substances from the legitimate channels in which they are manufactured, distributed, and dispensed. The measures below indicate the level of activity performed by this program:

State and local assistance.—This activity encompasses cooperative law enforcement activities with State, county, and local authorities. Included are training programs; laboratory analysis and expert testimony; and Federal/State and local task forces. Beginning in 1987, State and local officials will be charged for the cost of food and lodging while attending DEA training. Workload measures are provided below:

	1985 actual	*1986 estimate*	*1987 estimate*
Task force initiated arrests	3,172	3,200	3,250
Laboratory exhibits analyzed	10,766	11,710	11,800

Intelligence.—This activity encompasses the collection, analysis, and dissemination of drug intelligence in support of DEA, other Federal, and State and local agencies. For 1987, this activity includes additional resources in support of organized crime drug enforcement task force investigations. The measures below indicate the level of activity performed by this program.

	1985 actual	*1986 estimate*	*1987 estimate*
Intelligence reports	800	855	900
Special field intelligence programs	10	12	12
Information responses	17,000	17,000	18,000
El Paso Intelligence Center (EPIC) watch transactions	354,577	375,000	400,000

Research and engineering.—This activity encompasses research programs directly related to the DEA law enforcement and intelligence functions.

Support operations.—This activity encompasses laboratory analysis of evidence and expert testimony in support of investigation and prosecution of drug traffickers; training programs for all levels of DEA operational personnel; a technical equipment program; and provision of ADP and record communications support.

	1985 actual	*1986 estimate*	*1987 estimate*
Laboratory exhibits analyzed	29,502	30,000	31,275
Students trained	6,859	6,431	7,376

Program direction.—This program encompasses the overall management and direction of DEA.

Reimbursable program.—In 1987, this activity includes additional chemists for drug evidence handling and analysis, and funds for secure voice capability requirements and purchase of FM digital voice privacy radios. Resources are also included to initiate full encryption and TEMPEST-rating of telecommunications and teleprocessing systems to allow operations in a secure environment.

The primary reimbursements to DEA are for the training of foreign drug law enforcement officials by DEA (funded by the Department of State), and for the expenses incurred in managing seized assets and for other purposes as authorized by Public Law 98–473 to be funded from the Department of Justice Assets Forefeiture Fund.

The Immigration and Naturalization Service is responsible for administering laws relating to the admission, exclusion, deportation, and naturalization of aliens. Specifically, the Service inspects aliens to determine their admissibility into the United States; adjudicates requests of aliens for benefits under the law; prevents illegal entry into the United States; investigates, apprehends, and removes aliens in this country in violation of the law; and examines alien applicants wishing to become citizens.

Enforcement.—This activity contains most of the resources needed for preventing illegal entry into the United States and facilitating the entry of qualified persons. This includes inspection of applicants for admission, patrol of the border, and the location of illegal aliens who are in the United States following illegal entry or violation of status after legal entry. Apprehensions are made through the inspection of farms and ranches, by the investigation of information about the location of undocumented aliens, and through investigative case work. Also included are the resources for the Service's nationwide anti-smuggling program and for the detention and deportation of illegal aliens.

Most reimbursements received by the Service are for overtime work performed by immigration inspectors at air and sea ports of entry, as required by statute. The Airport and Airways Development Act requires that the carriers reimburse the Service for inspections performed outside normal duty hours at the convenience of the carrier.

This appropriation will provide for the custody and care of an average of 37,812 offenders and for the maintenance and operation of 47 penal institutions, 5 regional offices, and a central office located in Washington, D.C.

The appropriation also finances the boarding of sentenced Federal prisoners in State and local jails and therapeutic, community residential and other facilities for short periods of time. An average of 4,503 sentenced prisoners will be in contract facilities in 1987.

The Bureau receives reimbursements for daily care and maintenance of State and local offenders, for utilities produced by Federal Prison Industries, Inc., and for meals provided to Bureau staff at institutions.

Inmate care, custody, and programs.—This activity covers the cost of all food, medical supplies, clothing, welfare services and release clothing, transportation and gratuities, staff salaries, including salaries of Health Resources and Services Administration commissioned officers, and operational costs of functions directly related to providing inmate care. This activity also finances the costs of institution security; academic, social and occupational education courses; religious programs, and psychological services. In 1987, resources are requested to activate new housing units at existing institutions and to provide for an anticipated increase in the average daily population.

Institution administration and maintenance.—This activity covers all costs associated with the general operation and maintenance of facilities. Included are functions of the warden's office, personnel, financial management, safety, staff training, mechanical services, motor pool operations, powerhouse operations, and other administrative functions. In 1987, resources are requested to activate new housing units at existing institutions and to provide for an anticipated increase in the average daily population.

Contract confinement.—This activity provides for the confinement of sentenced Federal offenders in contract State and local facilities and for the care of Federal prisoners in contract community residential centers. During 1987, major programs will operate at current levels.

Program direction.—This activity covers the costs of regional and central office executive direction and management support functions such as research and evaluation, systems support, financial management, personnel, and legal counsel. During 1987, resources are requested to provide increased use of the Justice Data Center and to replace obsolete SENTRY equipment.

The National Institute of Corrections (NIC) was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide leadership in improving correctional programs and practices, especially in State and local organizations. The NIC awards contracts and grants to provide technical assistance to requesting correctional organizations; to maintain an information service to provide information on the latest developments, research results, et cetera, in the field of corrections; to provide training to the correctional community to improve systems and skills; and to conduct limited research and evaluation of correctional activities.

The NIC Jail Center will continue to improve the knowledge and skills of sheriffs and jail administrators, enabling them to upgrade services and practices within their jail operations.

The National Corrections Academy will offer training to local correctional personnel working in prisons, community corrections, and jails. In 1987, the Academy will train approximately 2,000 students in the areas of management theory, current issues affecting jails, institutions, probation and parole, standards implementation, inmate services and programs, and the use of volunteers and community resources. In 1987, State and local governments will be charged for the cost of food, lodging and travel associated with NIC programs.

The dissemination of relevant correctional policies, programs, practices and resource documents will continue through the clearinghouse activity of NIC.

Planning and site acquisition.—This activity reflects the costs of efforts to obtain suitable sites for approved construction projects, including site purchase and development and facility design.

New construction.—This activity represents costs associated with the construction of new facilities in order to reduce overcrowding and provide a safe and humane environment for staff and inmates. In 1987, resources are requested to construct medium security prisons in the Northeast, Northwest and in the Southeast.

Modernization and repair of existing facilities.—This activity includes rehabilitation and renovation of buildings, necessary modifications to accommodate new correctional programs, rehabilitation or replacement of utilities systems, and repair projects at existing facilities. In 1987, $6.9 million is requested to increase capac-

Federal Prison Industries, Inc. (FPI), was created by Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified program providing products and services to other Federal agencies. These operations are conducted in such a manner as to offer a minimum of competition to private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

The Corporation has been expanding its operations to provide additional industrial employment opportunities at existing and planned institutions.

Budget program.—Federal Prison Industries, Inc., is entirely self-sustaining. No appropriations are required. The amounts used by the Corporation for the administrative expenses and vocational training expenses are subject to a congressional limitation. Information regarding this limitation is provided separately following this account.

Financing program.—Revenues are derived entirely from the sale of products and services to other Federal agencies. Operating expenses are applied against these revenues, resulting in operating income or loss. Earnings surplus to the needs of the manufacturing operations, capital improvements and cash reserves are used to pay vocational training expenses, meritorious service awards, and accident compensation.

Operating results.—To date, Federal Prison Industries, Inc., has returned to the Treasury a total of $82 million of retained income excess to the Corporation's needs. No contributions from budget authority have been made to offset deficits for non-revenue producing outlays since the inception of the fund.

Budget program.—The commissary fund consists of the operation of commissaries for the inmates as an earned privilege.

Financing.—Profits are derived from the sale of goods to inmates. Sales for 1987 are estimated to be $24.2 million. Adequate working capital is assured from retained earnings.

Operating results.—Profits received are used for general welfare and recreational items for all inmates.

The Office of Justice Programs provides staff support and coordinates the activities of the Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, the Public Safety Officers' Benefits program, the Regional Intelligence Sharing System, and the Bureau of Justice Assistance, which administers the State and local assistance programs.

Research, evaluation, and demonstration programs.—Funds provide for and encourage the development of basic and applied research for the improvement of Federal, State, and local criminal, civil, and juvenile justice systems; new methods for the prevention and reduction of crime and the detection, apprehension, and rehabilitation of criminals; and the dissemination of the results of such research efforts.

Criminal justice statistical programs.—Funds provide for the collection and analysis of statistical information concerning crime, victims, offenders, criminal justice processes, juvenile delinquency, and civil disputes in support of public and private policy and decisionmaking about society's response to crime; planning, coordination, implementation and provision of technical assistance to States to initiate innovative applications of communications and information systems technology for State and local criminal justice systems; and assurance of conformance with privacy and security regulations. An increase of $3 million is requested in 1987 to implement the recommendations of the Uniform Crime Reports study.

State and local assistance.—This program is broken into two parts; a block grant program which receives 80 percent of the funds and a discretionary grant program which receives the remaining 20 percent.

The first appropriation for this activity was 1984. No new budget authority is requested for 1987.

General and special funds—Continued

JUSTICE ASSISTANCE—Continued

Emergency assistance.—Funds are used to provide emergency assistance to a State or locality after the Attorney General has determined that a law enforcement emergency exists. A law enforcement emergency is a situation where the capacity of local resources has been exceeded.

Juvenile justice programs.—Funds under this activity assist States and localities in the development of more effective education, training, research, prevention, treatment, and rehabilitation programs in the area of juvenile delinquency. No new budget authority will be requested in 1987 since the major thrusts of the grant program—deinstitutionalization of status offenders and the separation of juvenile and adult offenders—have been achieved to the extent practicable.

Missing children.—Funds for this program will be used to reduce the incidence of crimes against children, particulary kidnapping and sexual exploitation, by assisting families, citizen groups, law enforcement agencies and government institutions in a national effort to insure the safety and protection of children.

Public safety officers' benefits program.—Funds are used to pay $50,000 in death benefits to eligible survivors of public safety officers who die in the line of duty.

Mariel Cubans.—This is a reimbursement to certain States for part of the cost of incarcerating Mariel Cubans who had originally been paroled by the Federal Government. No new budget authority is requested in 1987.

Crime control programs.—This activity provides for expenditures from past Law Enforcement Assistance Administration programs which were not continued under the Justice System Improvement Act of 1979.

Regional information sharing system.—This is a program to aid State and local law enforcement agencies in the exchange of intelligence information.

No new budget authority is requested in 1987.

Management and administration.—Funds provide for executive direction and control, program operation, and administrative support of the above activities.

The planned distribution of budget authority by fiscal year is as follows (in thousands of dollars):

Under the Victims of Crime Act of 1984 (Public Law 98–473) a special fund was established in the Treasury entitled "The Crime Victims Fund." This fund will be credited with criminal fines that are collected from persons convicted of offenses against the United States. Annual grants will be made to eligible crime victims compensation and assistance programs. An obligation limitation of $65M is proposed for 1986, and an obligation limitation of $35M is proposed for 1987.

This revolving fund is used to finance antifencing operations conducted by local law enforcement agencies. Such operations are designed to disrupt commerce in stolen goods. Income derived from the sale or use of stolen goods recovered, but not claimed by the lawful owners, will be paid into this fund. No further proceeds from sales are expected after 1986.

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

Sec. 201. A total of not to exceed $75,000 from funds appropriated to the Department of Justice in this title shall be available for official reception and representation expenses in accordance with distributions, procedures, and regulations established by the Attorney General.

Sec. 202. Notwithstanding any other provision of law or this Act, materials produced by convict labor may be used in the construction of any highways or portion of highways located on Federal-aid systems, as described in section 103 of title 23, United States Code.

Sec. 203. Appropriations for "Salaries and expenses, General Administration", "Salaries and expenses, United States Marshals Service", "Salaries and expenses, Federal Bureau of Investigation", "*Salaries and expenses, Drug Enforcement Administration*", "Salaries and expenses, Immigration and Naturalization Service", and "Salaries and expenses, Federal Prison System", shall be available for uniforms and allowances therefor as authorized by law (5 U.S.C. 5901–5902).

[Sec. 204. (a) Subject to subsection (b) of this section, authorities contained in Public Law 96–132, "The Department of Justice Appropriation Authorization Act, Fiscal Year 1980", shall remain in effect until the termination date of this Act or until the effective date of a Department of Justice Appropriation Authorization Act, whichever is earlier.]

[(b)(1) With respect to any undercover investigative operation of the Federal Bureau of Investigation or the Drug Enforcement Administration which is necessary for the detection and prosecution of crimes against the United States or for the collection of foreign intelligence or counterintelligence—

(A) sums authorized to be appropriated for the Federal Bureau of Investigation and for the Drug Enforcement Administration, for fiscal year 1986, may be used for purchasing property, buildings, and other facilities, and for leasing space, within the United States, the District of Columbia, and the territories and possessions of the United States, without regard to section 1341 of title 31 of the United States Code, section 3732(a) of the Revised Statutes (41 U.S.C. 11(a)), Section 305 of the Act of June 30, 1949 (63 Stat. 396; 41 U.S.C. 255), the third undesignated paragraph under the heading "Miscellaneous" of the Act of March 3, 1877 (19 Stat. 370; 40 U.S.C. 34), section 3324 of title 31 of the United States Code, section 3741 of the Revised Statutes (41 U.S.C. 22), and subsections (a) and (c) of section 304 of the Federal Property and Administrative Service Act of 1949 (63 Stat. 395; 41 U.S.C. 254 (a) and (c)),

(B) sums authorized to be appropriated for the Federal Bureau of Investigation and for the Drug Enforcement Administration, for fiscal year 1986, may be used to establish or to acquire proprietary corporations or business entities as part of an undercover investigative operation, and to operate such corporations or business entities on a commercial basis, without regard to section 9102 of title 31 of the United States Code,

(C) sums authorized to be appropriated for the Federal Bureau of Investigation and for the Drug Enforcement Administration, for fiscal year 1986, and the proceeds from such undercover operation, may be deposited in banks or other financial institutions, without regard to section 648 of title 18 of the United States Code and section 3302 of title 31 of the United States Code, and

(D) proceeds from such undercover operation may be used to offset necessary and reasonable expenses incurred in such operation, without regard to section 3302 of title 31 of the United States Code,

only, in operations designed to detect and prosecute crimes against the United States, upon the written certification of the Director of the Federal Bureau of Investigation (or, if designated by the Director, a member of the Undercover Operations Review Committee established by the Attorney General in the Attorney General's Guidelines on Federal Bureau of Investigation Undercover Operations, as in effect on July 1, 1983) or the Administrator of the Drug Enforcement Administration, as the case may be, and the Attorney General (or, with respect to Federal Bureau of Investigation undercover operations, if designated by the Attorney General, a member of such Review Committee), that any action authorized by subparagraph (A), (B), (C), or (D) is necessary for the conduct of such undercover operation. If the undercover operation is designed to collect foreign intelligence or counterintelligence, the certification that any action authorized by subparagraph (A), (B), (C), or (D) is necessary for the conduct of such undercover operation shall be by the Director of the Federal Bureau of Investigation (or, if designated by the Director, the Assistant Director, Intelligence Division) and the Attorney General (or, if designated by the Attorney General, the Counsel for Intelligence Policy). Such certification shall continue in effect for the duration of such undercover operation, without regard to fiscal years.]

[(2) As soon as the proceeds from an undercover investigative operation with respect to which an action is authorized and carried out under subparagraphs (C) and (D) of subsection (a) are no longer necessary for the conduct of such operation, such proceeds or the balance of such proceeds remaining at the time shall be deposited in the Treasury of the United States as miscellaneous receipts.]

[(3) If a corporation or business entity established or acquired as part of an undercover operation under subparagraph (B) of paragraph (1) with a net value of over $50,000 is to be liquidated, sold, or otherwise disposed of, the Federal Bureau of Investigation or the Drug Enforcement Administration, as much in advance as the Director or the Administrator, or the designee of the Director or the Administrator, determines is practicable, shall report the circumstances to the Attorney General and the Comptroller General. The proceeds of the liquidation, sale, or other disposition, after obligations are met, shall be deposited in the Treasury of the United States as miscellaneous receipts.]

[(4)(A) The Federal Bureau of Investigation or the Drug Enforcement Administration, as the case may be, shall conduct a detailed financial audit of each undercover investigative operation which is closed in fiscal year 1986—

(i) submit the results of such audit in writing to the Attorney General, and

(ii) not later than 180 days after such undercover operation is closed, submit a report to the Congress concerning such audit.]

[(B) The Federal Bureau of Investigation and the Drug Enforcement Administration shall each also submit a report annually to the Congress specifying as to their respective undercover investigative operations—

(i) the number, by programs, of undercover investigative operations pending as of the end of the one-year period for which such report is submitted,

(ii) the number, by programs, of undercover investigative operations commenced in the one-year period preceding the period for which such report is submitted, and

(iii) the number, by programs, of undercover investigative operations closed in the one-year period preceding the period for which such report is submitted and, with respect to each such closed undercover operation, the results obtained. With respect to each such closed undercover operation which involves any of the sensitive circumstances specified in the Attorney General's Guidelines on Federal Bureau of Investigation Undercover Operations, such report shall contain a detailed description of the operation and related matters, including information pertaining to—

(I) the results,

(II) any civil claims, and

(III) indentification of such sensitive circumstances involved, that arose at any time during the course of such undercover operation.]

[(5) For purposes of paragraph (4)—

(A) the term "closed" refers to the earliest point in time at which—

(I) all criminal proceedings (other than appeals) are concluded, or

(II) covert activities are concluded, whichever, occurs later,

(B) the term "employees" means employees, as defined in section 2105 of title 5 of the United States Code, of the Federal Bureau of Investigation, and

(C) the terms "undercover investigative operation" and "undercover operation" means any undercover investigative operation of the Federal Bureau of Investigation or the Drug Enforcement Administration (other than a foreign counterintelligence undercover investigative operation)—

(i) in which—

(I) the gross receipts (excluding interest earned) exceed $50,000, or

(II) expenditures (other than expenditures for salaries of employees) exceed $150,000, and

(ii) which is exempt from section 3302 or 9102 of title 31 of the United States Code,

except that clauses (i) and (ii) shall not apply with respect to the report required under subparagraph (B) of such paragraph.] *(Department of Justice Appropriation Act, 1986.)*

Job training programs.—Provides leadership, policy direction, and administration for a decentralized system of block grants to States for job training, the summer youth training program, and the dislocated worker program; the Job Corps; and services to special target groups. Staffing levels are lower since the Job Corps program is being reduced in 1987.

Employment security.—Provides policy direction and management for the administration of the nationwide public employment service system and the unemployment insurance services in each State; for the settlement of trade adjustment petitions; and for a system of collecting and analyzing labor market information. Staffing levels are reduced during 1987 due to the expiration of the trade adjustment assistance program in 1986 and the elimination of the WIN program.

Financial control and management systems.—Provides for the formulation and execution of the budget, fiscal accounting and management, audit control, debt collection, internal control, contracting services, statistical and data processing management systems, personnel direction, facilities and space management, and contractor and grantee property management.

Executive direction and administration.—Provides general management and administrative functions, including: research and evaluation, performance standards, and publications development.

Regional operations.—Provides for administration and management of ETA programs in the regions. The 1987 request includes savings to be realized by reductions in the Job Corps, the expiration of the trade adjustment assistance program, and the elimination of the WIN program.

Apprenticeship services.—Promotes apprenticeship as a method of skill acquisition across a broad range of occupations and industries through a Federal-State apprenticeship administrative structure.

This account provides for a flexible and decentralized system of Federal and local programs of training and other services for economically disadvantaged persons designed to lead to permanent gains in employment. Such programs are authorized by the Job Training Partnership Act. The account is forward funded on a July to June cycle.

Grants to States.—Includes block grants to provide financial assistance to States and territories to design and operate training programs to meet their training and employment needs, grants to operate a summer youth employment and training program, and grants for programs to meet the needs of workers displaced from their jobs due to technological advances, increased imports, and other changes in the economy. Seventy percent of block grant funding will be used for training, including remedial education and basic skills, institutional training, and on-the-job training. A 1986 rescission proposal is included for the summer youth employment and training program for savings which are possible as a result of proposed changes which will direct resources to areas with the most severe unemployment problems. A 1986 supplemental is proposed for the dislocated worker assistance program providing the Secretary of Labor with additional resources and maximum flexibility for dealing with the most severe dislocated worker unemployment problems.

Federally administered programs.—Provides program support for Job Training Partnership Act activities and training assistance through nationally administered programs for special segments of the population that have particular disadvantages in the labor market. Among groups to be served are Indians and other native Americans, migrant and seasonal farmworkers, and veterans. Also included is the Job Corps which is a national network of residential centers designed to provide training in literacy, arithmetic, and vocational skills for youth aged 14-21 who have severe educational and economic disadvantages. In 1986, a rescission of Job Corps funding, in conjunction with reductions mandated by the Balanced Budget and Emergency Deficit Control Act of 1985, would reduce the Job Corps capacity from 40,500 to 22,000 slots between May 1986, and January 1, 1987, retaining the most effective and efficient centers. In addition, a rescission of other national program funding is proposed to eliminate unnecessary set-aside funding for rural concentrated employment programs and to reduce native American, migrant and seasonal farmworker, and veterans programs to statutorily required levels.

State Unemployment Insurance and Employment Service Operations—Continued

Unemployment compensation. — State operations amounts provide administrative grants to State agencies which pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and paid trade adjustment assistance to eligible individuals until such benefits expired in December, 1985. Grants are also provided to upgrade State automated systems for benefit payments and collection of taxes. State integrity activities provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through the establishment of a quality control program and the continuation of related activities designed to assess and reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies. Contingency funds are available only to meet increases in the costs of administration resulting from changes in State law, increases in the number of claims filed and claims paid, or increased salary costs caused by changes in State compensation plans and to provide for amortization payments for States which had independent retirement plans prior to 1980 in their State employment service agencies.

Employment service.—The public employment service is a nationwide system providing no-fee employment services to individuals who are seeking employment and employers who are seeking workers. State employment service activities are financed by allotment to States distributed under a demographically based funding formula established under the Wagner-Peyser Act, as amended. Employment service allotments are funded on a program year basis running from July 1 through June 30 of the following year.

Employment service activities serving national needs including interstate job listings, labor certification of aliens, and the Targeted Jobs Tax Credit Program which expired December 31, 1985, are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended.

This account provides advances to several other accounts for the purpose of paying unemployment compensation to eligible individuals under various Federal and State unemployment compensation laws whenever the balances in the funds prove insufficient. Advances made to the Federal employees compensation account in the Unemployment trust fund, advances made to the extended unemployment account in the Unemployment trust fund to finance the Federal supplemental compensation program, which expired in 1985, and advances made to the Federal unemployment benefits and allowances appropriation account are nonrepayable. All other advances made to the Federal unemployment account and to the Extended unemployment compensation account (both in the Unemployment trust fund) are repaid, without interest, to the general fund of the Treasury.

This account also provides advances, which are repayable with interest, to the Black Lung Disability Trust Fund for making payments from that fund whenever its balances prove insufficient.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund. All State and Federal unemployment tax receipts are deposited in the trust fund and invested in Government securities until needed for benefit payments or administrative costs. States may receive repayable advances from the fund when their balances in the fund are insufficient to pay benefits. The fund may receive repayable advances from the general fund when it has insufficient balances to make advances to States or to pay the Federal share of extended benefits.

State payroll taxes pay for all regular State benefits. During periods of high State unemployment, extended benefits, financed one-half by State payroll taxes and one-half by the Federal unemployment payroll tax, are also paid. Temporary Federal Supplemental Compensation benefits were financed with Federal general revenues. This program expired in 1985. The Federal tax pays the costs of Federal and State administration of unemployment insurance and veterans employment services, and 97% of the costs of the employment service.

The Federal employees compensation account provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers.

Benefits paid are reimbursed to the Federal Employees Compensation account by the various Federal agencies. Any additional resources necessary to assure that the account can make the required payments to States will be provided from the Advances to the Unemployment Trust Fund and Other funds account.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the unemployment trust fund and receipts from the tax on railroad payrolls are deposited in the fund to meet expenses.

This proposal would extend coverage under the Federal-State unemployment insurance program to railroad employees. Under a special Federal transitional program, railroad workers who become unemployed after September 30, 1986, would have their claims processed by State unemployment insurance agencies and receive the same benefits as comparable nonrailroad employees in their State. Benefit amounts would be reimbursed to the State agency by the employing railroad. Following enactment of necessary State legislation, the transition program would conclude, and rail employees and employers would be treated like all other private sector employees and employers.

Labor-management relations and cooperative programs.—Promotes labor-management cooperation. Certifies labor protection provisions in applications for Department of Transportation grants. Decides worker claims of violations of these provisions. Reviews California and Labor Department determinations of eligibility for worker benefits under the Redwood National Park Act of 1978. The decrease in the Redwood workload results from the expiration on September 30, 1984, of the period of protection under the Act for all but older workers.

Reports received	64,691	65,000	65,780
Investigations, field audits, and elections	2,733	9,650	10,037

Pension and welfare benefit programs.—Investigates activities of pension and welfare plans to assure compliance with statutory fiduciary standards. Issues interpretive rules, regulations and exemptions under the statutory fiduciary standards and issues advisory opinions to assist compliance. Conducts research to assist in developing national economic and retirement income policy. Collects and discloses private pension plan descriptions and financial reports. In 1987, the program will resume work on the longitudinal data base of pension statistics. A contingency amount is included in the 1987 estimate for a new data base.

[1] Amortization of reserve for losses.

This wholly owned government corporation administers programs of mandatory termination insurance to prevent loss of pension benefits under covered private, defined-benefit pension plans if plans terminate or if multiemployer plans are unable to pay benefits. Terminated plans are taken over by the Corporation. The Corporation assumes control of their assets, administers them in a trust fund held in a private bank, and takes responsibility for paying benefits. The Corporation also provides repayable assistance to insolvent multiemployer plans when necessary to pay benefits and to forestall termination and subsequent Corporation responsibility to pay benefits.

Regulations issued	13	12	15

Administration.—Provides case processing, benefits administration, resource management, legal support, executive direction and other support functions.

Benefit payments.—Checks are issued when due to pay status participants and other beneficiaries in plans which have terminated.

	1985 actual	1986 estimate	1987 estimate
Payees in government trusteeships receiving monthly benefits from the corporation	74,800	88,000	100,000
Checks issued	479,500	540,000	1,131,600

Financial assistance.—If multiemployer-sponsored plans become insolvent the Corporation gives repayable loans to enable the plans to continue paying benefits. Financial assistance to an insolvent plan is made only after the plan takes a series of prescribed steps to place the plan on a sound financial basis.

Financing.—Sources of financing are per capita annual premiums from ongoing covered plans, assets from terminated plans, investment income, and amounts due the Corporation from the sponsors of terminating plans. Also, the Corporation is authorized to borrow up to $100 million from the U.S. Treasury. No borrowing is anticipated for the budget year. Terminations of single employer plans have exceeded expectations. The budget assumes that an $8.10 premium will be enacted by Congress, retroactive to January 1, 1986.

Operating results.—The following tables show the status of the Corporation's trust funds and the Corporation's operating results, and do not reflect the effect of the 1986 reduction in administrative expenses pursuant to Public Law 99-177.

Enforcement of wage and hour standards.—The Wage and Hour Division works to obtain compliance with the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act, Migrant and Seasonal Agricultural Worker Protection Act, and the wage garnishment provisions in title III of the Consumer Credit Protection Act. Prevailing wages are determined and employment standards enforced under various Government contract wage standards. In 1987, approximately 372,300 persons are expected to be aided under the Fair Labor Standards Act, through assessing employers for underpayments and securing agreements to pay the workers. Through the special minimum wage program, 400,000 persons will be aided by certificates issued and employment authorized. In Government contract compliance actions, over 42,300 persons will be aided through assessing employers for underpayments and securing agreements to pay the workers. Under the Migrant and Seasonal Agricultural Worker Protection Act program, approximately 134,000 persons will be aided through enforcement of employment standards for migrant and seasonal agricultural workers.

Federal contractor EEO standards enforcement.—The Office of Federal Contract Compliance Programs (OFCCP) works to ensure nondiscrimination in employment on Federal contracts. It is responsible for conducting compliance activities to assure that Federal contractors take affirmative action in the hiring and promotion of minorities and women under the authority of Executive Orders 11246 and 11375. Administration of affirmative action provisions of the Rehabilitation Act of 1973, relating to the hiring and promotion of physically and mentally handicapped individuals, is included in this activity. Also included is the administration of the Vietnam Era Veterans Readjustment Assistance Act providing for affirmative action by Federal contractors to employ and advance in employment disabled veterans and veterans of the Vietnam era. In 1987, about 5,850 compliance reviews, 995 complaint investigations, and 5,490 other compliance actions will be taken with respect to contractor employment practices.

Federal programs for workers' compensation.—Under this income maintenance activity the Employment Standards Administration administers the Federal Employees' Compensation Act, the Longshore and Harbor Workers' Compensation Act, and the benefit provisions of the Federal Mine Safety and Health Act of 1977. These programs insure that eligible disabled and injured workers or their survivors receive compensation and medical benefits and a range of services including rehabilitation, supervision of medical care, and technical and advisory counseling to which they are entitled. Technical assistance is provided to the States to upgrade their workers' compensation laws.

Executive direction and support services.—This activity includes planning, personnel management, financial management, research and Federal/State liaison programs, management systems implementation, and data processing operations. Major goals in 1987 will include implementing financial management initiatives; continued efforts to eliminate internal fraud, waste, and mismanagement; the improvement of management information, automated data processing, and program and fiscal accountability; and legislative and regulatory improvements.

Federal Employees' Compensation Act benefits.—Currently, approximately 48,200 claimants are receiving long-term compensation benefits for job-related injuries, diseases, or deaths, as specified in the Federal Employees' Compensation Act (FECA) and its extensions. Pertinent medical bills are paid for compensable injuries. Compensation benefits are paid when the injury causes loss of job time. Workers suffering noncontroverted, traumatic injuries continue in full pay status for a period not to exceed 45 days, paid by the employing agency rather than through this account. All medical costs associated with these continuation-of-pay claims are examined and paid by the FECA program. In addition, the FECA program is responsible for claims extending beyond 45 days, all nontraumatic injuries and controverted claims, medical costs associated with the above, and the review of the agency-paid continuation-of-pay claims. Costs to this account are subsequently charged back to the employing agency.

The trust fund consists of all moneys collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, in the form of an excise tax on mined coal tonnage. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition the fund pays all administrative costs incurred in the operation of the black lung program. The fund is administered jointly by the Secretaries of Labor, the Treasury, and Health and Human Services. The Benefits Revenue Act provides for repayable advances to the fund in the event fund resources will not be adequate to meet program obligations. Such advances are to be repaid with interest. Advances outstanding at the end of the year are: 1981, $1,510 million; 1982, $1,793 million; 1983, $2,151 million; 1984, $2,497 million; 1985, $2,833 million; 1986, $3,246 million and 1987, $3,694 million.

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and pursuant to an annual assessment of the industry, for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act, as amended.

These trust funds are available for payments of additional compensation for second injuries. When a second injury, when combined with a previous disability, results in increased permanent partial disability, permanent total disability, or death, the employer provides compensation only for the disability caused by the subsequent injury; compensation to supplement the employer's payment is provided from this fund. In addition, the fund pays one-half of the increased benefits provided under the Longshore and Harbor Workers' Compensation Act, as amended, for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

Safety and health standards.—New and revised standards are proposed and promulgated to protect the safety and health of workers. All new standards, except emergency temporary standards, are promulgated under procedures providing opportunity for public comment. Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious employee injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically sound; and (4) the standard is cost-effective when compared with alternative regulatory proposals providing equal levels of protection.

Enforcement.—The Occupational Safety and Health Act of 1970 provides for enforcement of Federal standards in States declining to assert jurisdiction and for grants to assist States in administering and enforcing State standards. Compliance with occupational safety and health standards is gained in part by the physical inspection of plants and facilities and by encouraging the voluntary protection efforts of employers and employees. Programs are targeted to the investigation of claims of imminent danger and employee complaints, the investigation of fatal and catastrophic accidents, programmed inspections of firms with injury-illness rates that are above the national average, and inspections for serious health and safety hazards.

Technical support.—Technical assistance is provided on all aspects of standards setting, variances, compliance assistance, and enforcement programs. Laboratory support is provided to compliance officers. Comprehensive scientific and technical information services are made available. The economic and environmental impacts of proposed standards are analyzed.

Compliance assistance.—This activity contributes to the balanced use of the authority provided by the Act through a variety of employer and employee assistance activities. Under cooperative agreements, State agencies are reimbursed for 90 percent of the costs of providing free onsite consultation to employers upon request. Grants are awarded to assist organizations to develop their capacity to provide occupational safety and health training for workers and employers. Employers are encouraged to establish voluntary labor-management and self-inspection protection programs. This activity also provides leadership and assists agencies in implementing job safety and health programs to protect Federal workers. Professional training for compliance personnel and others with related workplace safety and health responsibilities is conducted at the OSHA Training Institute.

Safety and health statistics.—Statistics on occupational fatalities, injuries, and illnesses are collected directly or through grants to States and published annually to aid in the identification of occupational safety and health problems and to facilitate administration.

Executive direction and administration.—These activities include executive direction, planning and evaluation, management support, legislative liaison, interagency affairs, and administrative services.

Enforcement.—Enforcement of the Federal Mine Safety and Health Act of 1977 includes inspection of mines, the development and promulgation of health and safety standards, assistance in mine rescue operations, investigations of serious accidents in mines, recommendations to reduce working hazards, and on-site education and training assistance. The estimates will support all inspections specified in the Act of mines expected to be operating throughout 1986 and 1987. In addition to these regular health and safety inspections the program statistics below include additional inspections and investigations that are conducted as needed to ensure the safety and health of miners.

Assessments.—This activity assesses civil monetary penalties for violations of safety and health standards.

Educational policy and development.—This activity develops and coordinates MSHA's mine safety and health education and training policies and provides classroom instruction at the National Academy for MSHA personnel, other Government personnel, and the mining industry. States are encouraged to develop training programs through grants and technical assistance.

Technical support.—This activity provides technical services and advice to field managers, mine inspectors, State program employees, and industry management to assist enforcement or improve mining practices. It also collects and analyzes data relative to the cause, frequency, and circumstances of accidents.

Program administration.—This activity provides for general administrative functions and collection of civil monetary penalties.

Executive direction.—Provides policy direction for all programs and functions assigned to the Department. Provides guidance for the development and implementation of governmental policy to protect and promote the interests of the American worker—toward achieving better employment and earnings, promotion of labor standards, safeguarding of pension rights, promotion of affirmative action in employment, and collection and analysis of statistics on the labor force.

Legal services.—Includes enforcement of Federal labor statutes and legal advisory, legislative, and litigation services related to the statutes administered by the Department.

International labor affairs.—Integrates all international labor programs and foreign economic policy within the Department; gives Departmental guidance to the U.S. participation in international organizations concerned with labor and employment and training problems; and provides for labor and employment and training technical services to other Government and international agencies.

Administration and management.—Exercises leadership in all DOL administration and management programs and services. Provides policy guidance on matters of budget and resource and personnel management. Assures equal employment opportunity to all DOL employees and applicants for employment and provides for consistent and constructive internal labor-management relations throughout the Department.

Adjudication.—Conducts formal hearings and renders timely decisions on claims filed under (a) the Longshore and Harbor Workers' Compensation Act and its extensions, (b) the Black Lung Benefits Reform Act of 1977, (c) the Federal Employees' Compensation Act, and (d) other acts involving health and safety regulations, unfair labor practices, and other labor-related areas.

Promoting employment of the handicapped.—The President's Committee on Employment of the Handicapped seeks to identify and eliminate barriers standing in the way of full social and vocational opportunities for physically and mentally handicapped persons.

Women's bureau.—Promotes the welfare and seeks to improve the economic status of working women; seeks to increase the utilization of women in the Nation's economy; and encourages the advancement of women workers.

Civil rights.—Ensures full compliance with title VI of the Civil Rights Act of 1964 and other regulatory nondiscrimination provisions in programs receiving financial assistance from the Department of Labor and promotes equal opportunity in these programs and activities.

State administration.—The Disabled Veterans Outreach Program (DVOP) provides intensive employability development services to secure permanent employment for veterans with service-connected disabilities and the most disadvantaged Vietnam-era veterans. Local Veterans Employment Representatives (LVER's) provide job development, placement, and supportive services directly to veterans and act as functional supervisors of the services provided veterans by other local office staff to ensure compliance with the performance standards for services to veterans.

Administration.—Identifies policies and programs to serve and meet employment and training needs of veterans. Assures the adequacy of counseling, testing, job training, and job placement services for veterans through monitoring, evaluating, and providing technical assistance and training to the delivery systems providing these services. Provides information and processes complaints to help veterans, reservists, and members of the National Guard obtain employment rights provided by law.

Allocations Received From Other Accounts

Note.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

U.S. Information Agency, "Salaries and expenses."

GENERAL PROVISIONS

Sec. 101. Appropriations in this Act available for salaries and expenses shall be available for supplies, services, and rental of conference space within the District of Columbia, as the Secretary of Labor shall deem necessary for settlement of labor-management disputes.

Sec. 102. None of the funds appropriated under this Act shall be used to grant variances, interim orders or letters of clarification to employers which will allow exposure of workers to chemicals or other workplace hazards in excess of existing Occupational Safety and Health Administration standards for the purpose of conducting experiments on workers' health or safety. *(Department of Labor Appropriation Act, 1986.)*

TITLE V—GENERAL PROVISIONS

Sec. 501. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

Sec. 502. No part of any appropriation contained in this Act shall be expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.), pursuant to any obligation for services by contract, unless such executive agency has awarded and entered into such contract in full compliance with such Act and regulations promulgated thereunder.

Sec. 503. Appropriations contained in this Act, available for salaries and expenses, shall be available for services as authorized by 5 U.S.C. 3109 but at rates for individuals not to exceed the per diem rate equivalent to the rate for GS-18.

Sec. 504. Appropriations contained in this Act, available for salaries and expenses, shall be available for uniforms or allowances therefor as authorized by law (5 U.S.C. 5901-5902).

Sec. 505. Appropriations contained in this Act, available for salaries and expenses, shall be available for expenses of attendance at meetings which are concerned with the functions or activities for which the appropriation is made or which will contribute to improved conduct, supervision, or management of those functions or activities.

Sec. 506. No part of the funds appropriated under this Act shall be used to provide a loan, guarantee of a loan, a grant, the salary of or any remuneration whatever to any individual applying for admission, attending, employed by, teaching at, or doing research at an institution of higher education who has engaged in conduct on or after August 1, 1969, which involves the use of (or the assistance to others in the use of) force or the threat of force or the seizure of property under the control of an institution of higher education, to require or prevent the availability of certain curricula, or to prevent the faculty, administrative officials, or students in such institution from engaging in their duties or pursuing their studies at such institution.

Sec. 507. The Secretaries of Labor, Health and Human Services, and Education are authorized to transfer unexpended balances of prior appropriations to accounts corresponding to current appropriations provided in this Act: *Provided*, That such transferred balances are used for the same purpose, and for the same periods of time, for which they were originally appropriated.

Sec. 508. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

Sec. 509. No part of any appropriation contained in this Act shall be used, other than for normal and recognized executive-legislative relationships, for publicity or propaganda purposes, for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, radio, television, or film presentation designed to support or defeat legislation pending before the Congress, except in presentation to the Congress itself.

No part of any appropriation contained in this Act shall be used to pay the salary or expenses of any grant or contract recipient, or agent acting for such recipient, related to any activity designed to influence legislation or appropriations pending before the Congress.

Sec. 510. The Secretaries of Labor, Health and Human Services, and Education are each authorized to make available not to exceed $7,500 from funds available for salaries and expenses under titles I, II, and III, respectively, for official reception and representation expenses; the Director of the Federal Mediation and Conciliation Service is authorized to make available for official reception and representation expenses not to exceed $2,500 from the funds available for "Salaries and expenses, Federal Mediation and Conciliation Service"; and the Chairman of the National Mediation Board is authorized to make available for official reception and representation expenses not to exceed $2,500 from funds available for "Salaries and expenses, National Mediation Board".

Sec. 511. None of the funds appropriated by this Act shall be used to pay for any research program or project or any program, project, or course which is of an experimental nature, or any other activity involving human participants, which is determined by the Secretary or a court of competent jurisdiction to present a danger to the physical, mental, or emotional well-being of a participant or subject of such program, project, or course, without the written, informed consent of each participant or subject, or a participant's parents or legal guardian, if such participant or subject is under eighteen years of age. The Secretary shall adopt appropriate regulations respecting this section.

Sec. 512. None of the funds provided in this Act to any department or agency may be expended for the transportation of any officer or employee of such department or agency between his domicile and his place of employment, with the exception of the Secretaries of Labor, Health and Human Services, and Education, and medical officers and other health personnel on out-patient medical service who are exempted from such limitations under 31 U.S.C. 1344.

[Sec. 513. Notwithstanding any other provision of this Act, no funds appropriated by this Act may be used to execute or carry out any contract with a non-governmental entity to administer or manage a Civilian Conservation center of the Job Corps which was not under such a contract as of September 1, 1984.]

Sec. [514] *513.* Upon the enactment of the Compact of Free Association *for Palau*, amounts appropriated by this Act for Federal financial assistance to [the Trust Territory of the Pacific Islands shall be available only for the Republic of] Palau *shall not be available* [but only in amounts that such Republic would have received had the Compact not been enacted]. *(Departments of Labor, Health and Human Services, and Education and Related Agencies Appropriation Act, 1986.)*

The program described below is financed by this appropriation and by reimbursements from other agencies. Those agencies are provided with most of their administrative services overseas by the Department of State.

Executive direction and policy formulation.—The Secretary is assisted in the formulation of policy and direction of the Department's activities by appropriate staff officers, specialized offices, and functional and regional bureaus of the Department. Public affairs, congressional affairs, and inspection, audit, and investigation activities are included.

Diplomatic relations with foreign countries.—This includes representation of the United States and its citizens abroad, primarily for political and economic negotiations and for reporting and analysis.

Diplomatic relations through international organizations.—In collaboration with other Government agencies, U.S. policy is developed and coordinated on political and security issues and in such specialized fields as world health, education, and labor activities. Included are resources to support U.S. missions to international organizations abroad, as well as domestically-located missions to the United Nations and the Organization of American States.

Conduct of consular affairs.—Activities included are overseas and domestic visa and American citizen services. Visa services involve the issuance, denial, and adjudication of immigrant and non-immigrant visas; refugee processing; and visa fraud detection and investigation. American citizen services include the issuance of passports, emergency assistance to American citizens abroad, and passport fraud detection and investigation.

General and special funds—Continued

Salaries and Expenses—Continued

Technical support programs.—These encompass data processing efforts, personnel and physical security, training and development programs, worldwide telecommunications and courier services, and medical services.

Administrative and staff activities.—These include normal domestic and overseas administrative services such as personnel, budgeting, accounting, and procurement.

The Foreign Service buildings program provides consolidated office space for the Foreign Service and other Government agencies abroad and living quarters for American employees. This program reflects the restructuring in 1986 of the FBO Salaries and expenses allotted funds to regional bureaus for building operating expenses and replacement furnishings, and the transfer of short-term lease costs and living quarters allowances from FBO Salaries and Expenses to the FBO regular appropriation. As a result of the Indian rupee no longer declared in excess, funds for minor improvements and building maintenance formerly funded from FBO Special Foreign Currency program were included in the FBO regular appropriation beginning in 1986.

The current appropriation finances, by 30 equal annual installments, any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. In addition, the current appropriation finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions.

The permanent appropriation provides payments to the fund for the interest on the unfunded liability and disbursements attributable to military and naval services—a full 100 percent in each year.

These funds are used for payment of the United States' share of the expenses of 12 international fisheries commissions, one international sea council, and the expenses of the respective commissioners. The commissions either conduct or plan and coordinate studies to determine measures necessary for the preservation and expansion of the productivity of fishery stocks. In addition, the Great Lakes Fishery Commission carries on a program of lamprey eradication and control; and all the commissions are authorized to recommend conservation measures to the member governments. The sea council proposes and organizes fishery and oceanographic investigations and disseminates the results to the member governments. The newly established U.S.-Canada Pacific Salmon Commission is assuming the responsibilities of the International Pacific Salmon Fisheries Commission.

DEPARTMENT OF TRANSPORTATION

FEDERAL HIGHWAY ADMINISTRATION

Title 23 U.S.C. ("Highways") and other supporting legislation provide authority for the various programs of the Federal Highway Administration designed to improve highways throughout the Nation. Proposed legislation will provide authorizations from 1987 through 1990 in general, and make several significant changes to the Federal-aid highways program.

In summary, the 1987 budget contemplates $12,811.5 million in budget authority and $13,384.5 million in outlays. The following table compares 1987 program level (obligations) with those of prior years.

The motor carrier safety mission is to reduce the risk of accidents in truck and bus highway transportation by regulation of motor carriers engaged in interstate commerce through safety management audits and roadside examinations. The program also seeks to simplify the Federal Motor Carrier Safety Regulations, increase regulatory compliance, and support commercial motor vehicle related safety research. It is proposed that the motor carrier safety program be financed from the Highway Trust Fund starting in 1987.

This program provides for congressionally-mandated projects in 18 cities. The 1986 appropriations act provided a total of $16.6 million ($5.3 million general funds and $10.7 million trust funds) for this program. It is anticipated that these funds and unobligated balances will be obligated during 1986 and 1987. Trust fund amounts for railroad-highway crossings demonstration projects are included in the account, "Trust Fund Share of Other Highway Programs".

No additional appropriation is requested for this program.

MISCELLANEOUS APPROPRIATIONS

[HIGHWAY BEAUTIFICATION]

[Funds appropriated and obligated to carry out sections 131 and 136 of title 23, United States Code, which have been deobligated subsequent to enactment of this Act shall remain available until expended.]

[AIRPORT-HIGHWAY DEMONSTRATION PROJECT]

[(TRANSFER OF FUNDS)]

[For necessary expenses to carry out a highway project to depress a highway in Shawnee, Oklahoma, that demonstrates methods of improving air service to a small community by extension of a runway over a depressed road, to remain available until expended, $1,350,000 to be derived from unobligated balances of "Research, training, and human resources".]

[RAIL LINE CONSOLIDATION PROJECT]

[(TRANSFER OF FUNDS)]

[For necessary expenses to carry out a project to consolidate two rail lines on a common alignment in the vicinity of Orange, Texas, that demonstrates methods by which a rail line consolidation project will reduce motor vehicle traffic congestion and increase employment, to remain available until expended, $4,000,000 to be derived from unobligated balances of "Research, training, and human resources".]

Grants are made available to States under the following programs for construction and improvements on the National System of Interstate and Defense Highways and for urban and rural transportation programs. To avoid the proliferation of programs exempt from routine funding controls, a Federal-aid highways obligation limitation of $12.420 billion, covering all Federal-aid programs except emergency relief and minimum allocation is proposed.

Interstate construction.—Interstate construction funds are incorporated into the Interstate/primary program in 1987. States will decide whether to use the funds for construction or preservation of the existing network. States can be expected to construct high priority Interstate segments, not yet built, especially gaps between major urbanized areas.

Interstate/Primary.—Preserves the Nation's investment in the Interstate highway system through a program of resurfacing, restoring, rehabilitation, and reconstruction. Also provides grants to States for highway construction, reconstruction and related planning for the primary highway system.

Interstate substitutions.—Provides grants to States and localities which withdraw previously approved Interstate segments and apply authorized funds to substitute projects.

Secondary/Urban.—Provides grants to States for highway construction, rehabilitation, reconstruction, and related planning and research on the secondary and urban systems in rural and small urban areas. In addition, funds can be used for capital expenditures for buses and other public transportation facilities. These programs are incorporated into the Block Grant program in 1987.

Bridge program.—Provides grants to States to replace or rehabilitate bridges on the primary system with defi-

FEDERAL-AID HIGHWAYS (LIQUIDATION OF CONTRACT AUTHORIZATION) (TRUST FUND)—Continued

ciencies that are hazardous to the safety of motorists. Funds for bridges off the primary system are included in the block grant.

Safety Construction programs.—Provides grants to States for safety improvements to the highway systems, including hazard elimination, pavement marking, and rail highway crossings.

Motor Carrier Safety Grants.—These grants are used to enforce Federal and compatible State standards applicable to commercial motor vehicle safety. For 1987 and thereafter, it is proposed that $50 million be set aside for this purpose prior to making apportionments. States will also have authority to set-aside additional apportioned funds to meet their respective needs.

Block Grant.—Provides grants to States for any improvements now eligible under Title 23 on any public road and for mass transportation capital grant projects. This program is proposed to be authorized in lieu of the current secondary, urban, nonprimary and bridge programs.

Administration and research.—Provides for executive and general administrative and research expenses of Federal-aid highways. These funds are expended under the limitation on general operating expenses.

Other.—Provides for emergency relief, minimum apportionment, Federal lands, and other miscellaneous programs.

The improvements in the Federal-aid highway program highlighted above are designed to focus Federal involvement and funding generally on the programs of highest Federal interest (e.g., Interstate and primary), and to increase flexibility to the States to use Federal-aid program funds to address their particular needs and priorities.

This limitation provides for the salaries and expenses of the Federal Highway Administration. Resources are allocated from the following programs: Federal-aid highways, highway-related safety grants, and highway safety research and development.

Program direction and coordination.—Provides overall direction and coordination of the highway transportation program, including program review of agency operations; provides legal services for all programs; plans and directs public affairs programs; and develops and recommends policies and standards, and ensures compliance with the civil rights and equal opportunity procedures by the Federal Highway Administration and by recipients of grants-in-aid administered by the Federal Highway Administration.

General program support.—Formulates policy, multiyear and long-range plans and goals for highway programs, and data and analyses for current and long-range programming; conducts direct and contract research and development relating to traffic operations, new construction techniques, and the social and environmental aspects of highways; provides administrative support services for all elements of the Federal Highway Administration; and provides on-the-job training for employees of the Federal Highway Administration and training opportunities for other highway-related personnel. As part of an Administration initiative to shift Federal activities to the private sector, it is proposed that operation of the Turner-Fairbank Highway Research Center be carried out by contract with a non-Federal entity.

Highway programs.—Provides engineering guidance to Federal and State agencies and to foreign governments, and conducts a program to encourage use of modern traffic engineering procedures to increase the vehicle-carrying capacity of existing highways and urban streets; assists States, other Federal agencies, and certain foreign countries in right-of-way acquisition and develops procedures for highway location selection and consideration of environmental impacts; and finances construction skill training programs for disadvantaged workers hired by contractors on federally aided highway projects.

Field operations.—Provides staff advisory and support services in field offices of the Federal Highway Administration; and provides program and engineering supervision of the several highway programs through 9 regional and 52 division offices.

The Highway Safety Act of 1970 authorized grants to States and communities for implementing and maintaining highway-related safety standards.

The 1982 Surface Transportation Assistance Act provided a $10 million program level for 1986, which the budget proposes to continue in 1987.

This appropriation seeks to identify, correct, and evaluate those critical elements that contribute to loss of life, disabling injuries, and property damage on American highways. The emphasis of research is to provide workable and timely solutions to a set of critical safety problems. This program attempts to meet the increasing demands for solutions to urgent safety problems, such as traffic management in construction and maintenance zones and new longer range initiatives in safety hardware, driver aids, and system performance measurement.

Funds appropriated for this account are transferred to the general operating expenses limitation, where the program is administered in conjunction with other research and development programs of the Federal Highway Administration.

The Motor Carrier Safety Grant program, authorized by the 1982 Surface Transportation Assistance Act, provides grants to States to enforce Federal and compatible State standards applicable to commercial motor vehicle safety. States become eligible for funds by adopting Federal truck safety standards and maintaining minimum levels of program funding. Uniform safety standards both enhance the coordination of enforcement activities and simplify the safety requirements of interstate trucking parties.

Federal grants for enforcement of commercial motor vehicle safety standards may not be used to maintain efforts already undertaken by State governments. The purpose of the grant program is to raise the level of enforcement, not to substitute Federal for State and local dollars. It is proposed that separate program funding be eliminated for this program and that the motor carrier safety grants program be merged with the Federal-aid Highways program starting in fiscal year 1987, funded as a $50 million set-aside prior to apportionments. States will have authority to set aside additional apportioned funds to meet their respective needs.

The motor carrier safety mission is to reduce the risk of accidents in truck and bus highway transportation by regulation of motor carriers engaged in interstate commerce through safety management audits and roadside examinations. The program also seeks to simplify the Federal Motor Carrier Safety Regulations, increase regulatory compliance and support commercial motor vehicle related safety research. By the end of 1987, the Department plans to double the number of motor carrier safety specialists and to focus their efforts on motor carrier audits, and education and monitoring of problem carriers. States will continue to have the primary responsibility for roadside inspection, with increased support from Federal motor carrier safety grants. It is proposed that the motor carrier safety program be financed from the Highway Trust Fund starting in fiscal year 1987.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General fund to the Highway trust fund of revenue from the motor fuel tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be so transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs specified by law. In 1987, the Budget proposes to repeal the highway user fee exemptions for gasohol use and public and private bus operations.

The status of the fund is as follows:

Miscellaneous Trust Funds contains the following programs financed out of the highway trust fund and reimbursed by the requesting parties.

Cooperative work, forest highways.—Contributions are received from States and counties in connection with cooperative engineering, survey, maintenance, and construction projects for forest highways.

Technical assistance, U.S. dollars advanced from foreign governments.—The Federal Highway Administration renders technical assistance and acts as agent for the purchase of equipment and materials for carrying out highway programs in foreign countries. Currently, these services are being rendered in Costa Rica, Saudi Arabia, and Kuwait.

Contributions for highway research programs.—In association with the General Services Administration and the Department of Defense, tests of highway equipment are conducted for the purpose of establishing performance standards upon which to base specifications for use by the Government in purchasing such equipment.

Advances from State cooperating agencies.—Funds are contributed by the State highway departments or local subdivisions thereof for construction and/or maintenance of roads or bridges. The work is performed under the supervision of the Federal Highway Administration.

The Federal-Aid Highway Act of 1968 authorized $300 million for the establishment of a right-of-way revolving fund. This fund is utilized to make cash advances to the States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from significantly increasing construction costs. Although the loans are currently interest-free, an interest charge will be proposed in the reauthorization of the Surface Transportation Assistance Act.

The initial legislation for this program required the States to construct the highway and reimburse the revolving fund within seven years from the date of the advance. The 1973 Highway Act extended the required time limit on construction to 10 years and the 1976 Highway Act extended the time limit indefinitely, if deemed necessary by the Secretary.

In 1987, gross obligations will be limited to $50 million, consistent with prior years' practice.

Operations and research programs are frozen to near the 1986 level except for an expansion in the National Occupant Protection Program.

Rulemaking programs.—Covers rulemaking activity relative to the promulgation of Federal motor vehicle safety standards for new and used motor vehicles, tires, and equipment; automotive fuel economy standards required by the Energy Policy and Conservation Act; international harmonization of standards; theft prevention; regulatory reform; and information on motor vehicle safety required by the Motor Vehicle Information and Cost Savings Act.

Enforcement programs.—Provides for the enforcement of programs described under the rulemaking activity, including manufacturer compliance with motor vehicle safety and automotive fuel economy standards, investigation of safety-related motor vehicle defects, and surveillance of odometer tampering.

Highway safety programs.—Provides for technical assistance to the States in the conduct of their highway safety programs; demonstration programs emphasizing alcohol countermeasures, safety belt and child safety seat usage, improved traffic law enforcement, emergency medical services, and enhanced traffic records systems to reduce highway fatalities and injuries; and operation and improvement of the national driver register. A National Occupant Protection Program will be underway in 1986 and 1987 to implement the Secretary of Transportation's decision on Federal Motor Vehicle Safety Standard 208, occupant protection. The program will promote the usage of safety belts and automatic protection.

Research and analysis.—Provides motor vehicle safety and highway safety research and development in support of all NHTSA programs, including the collection and analysis of data to identify safety problems, develop alternative solutions, and assess costs, benefits, and effectiveness. Research will continue to concentrate on improving vehicle crashworthiness, accident avoidance characteristics of cars, trucks and motorcycles, safety belt usage and alcohol countermeasures. The budget includes funds to continue a national accident data collection program to improve problem identification, regulatory reform, and program evaluation activities.

Office of the Administrator.—Provides for the overall executive direction, coordination and implementation of agency programs. Includes legal, public affairs, civil rights and executive secretariat support for programs of this administration.

General administration.—Provides for the planning, program evaluation, and basic administrative and supporting services for programs of this administration.

This account represents the portion of the operations and research appropriation authorized under 23 U.S.C. 403 and financed from the Highway Trust Fund for the following activities:

Highway safety programs.—Provides for headquarters and field staff to assist the States in the conduct of their highway safety and demonstration programs, and to develop and implement a National Occupant Protection Program.

Research and analysis.—Provides for highway safety research in support of NHTSA programs, including the collection and analysis of data to determine the relationship between driver performance characteristics and crashes causing death or personal injury. Research is also undertaken to identify ways to improve safety belt usage and alcohol control. The 1987 budget includes funds to continue a national accident data collection program to improve problem identification, regulatory reform, and program evaluation activities.

Office of the Administrator.—Provides for the pro rata contribution to the cost of executive direction, coordination and implementation of agency programs. Includes legal, public affairs, civil rights and executive secretariat support for programs of this administration.

General administration.—Provides for the pro rata contribution to the cost of planning, program evaluation, and basic administrative and supporting services for programs of this administration.

Safety formula grants.—Grant allocations are determined on the basis of a statutory formula established under 23 U.S.C. 402. Individual States use this funding in areas which have the greatest potential for achieving safety improvements and reducing traffic crashes and fatalities. Activities are centered predominantly on efforts to control the drinking driver; stimulate activities to improve child passenger safety and increase safety belt usage; improve traffic law enforcement; improve the quality of emergency medical services; improve the collection and analysis of traffic accident data; and establish and maintain a computerized traffic recordkeeping system.

Safety formula grant administration.—Under 23 U.S.C. 402, up to 5 percent of amounts authorized for safety formula grants are permitted to be used for reimbursement to the operations and research account for grant administration. Funds of $4.9 million are required to cover the expenses of administering Federal grant activity in 1987.

Alcohol safety incentive grants.—Grant allocations will be made under 23 U.S.C. 408, to those States which adopt and implement effective programs to reduce traffic safety problems resulting from persons driving while under the influence of alcohol. These grants will be made in accordance with established criteria and will only be used to implement and enforce such programs. Public Law 97-364 establishes a two-tier grant system. The first tier, i.e., basic grant, amounts to 30 percent of each State's apportionment under the safety formula grant program (section 402 program) if the State meets specified minimum criteria. The second tier is a supplemental grant of up to 20 percent of the State's apportionment if it qualifies for the base grant and implements additional specified alcohol traffic safety measures. Public Law 98-363 established a third tier to encourage States to enact stiffer penalties for drunk driving.

The 1987 budget includes funds previously appropriated under the Rail Service Assistance account.

Salaries and expenses.—Provides for salaries and related expenses for the Office of the Administrator and his immediate staff, Chief Counsel, Civil Rights, Public Affairs, Office of Administration, Office of Policy and the Office of Passenger and Freight Services. Together these offices resolve national problems confronting the railroad industry and provide top level support to the Federal Railroad Administrator. In 1987, unobligated balances are transferred in from Conrail Labor Protection to cover administrative costs.

Contract support.—The Office of Policy uses contractual support to develop positions regarding various proposed structural changes in the railroad industry such as mergers and the sale of Conrail to the private sector. Contractual support is also used to conduct internal studies dealing with traffic, economic forecasting, financial condition, and other factors that contribute to an efficient national freight railroad network. In 1985 and 1986 this program also provided contractual support to Federal assistance programs, labor-management activities, railroad rehabilitation and improvement financing funds, grants to the National Railroad Passenger Corporation and the Conrail labor protection program.

Loan guarantee defaults.—Interest due to the Department of Treasury on rollover of promissory notes issued in prior years was paid off in a 1985 supplemental request.

Washington Union Station.—The Department of Transportation assumed responsibility for leasing Washington Union Station in 1984. In 1987 funds will be used for rental, maintenance, operation and security services of that facility, as in 1986.

Local rail service assistance.—This program provides discretionary and formula grants to all States for rail planning and for track rehabilitation of light density lines. No funds are requested in 1987.

Reimbursable program.—In 1985, the National Highway Traffic Safety Administration shared the expense of enhancing certain accounting systems. In addition, the Maritime Administration and the Office of the Secretary shared the expense of contracting a grain transportation study with the University of Illinois. Any future activities will be of this same nature.

The 1987 budget includes funds previously appropriated under the Railroad Research and Development account.

Federal enforcement.—This program provides salaries and related expenses for safety field operations designed to reduce the number of railroad related accidents/incidents. Federal inspectors monitor railroads for compliance with Federal laws with specific emphasis on passenger and hazardous material routes. In addition, this staff provides training to Federal, State and railroad industry personnel on related safety enforcement activities, including programs dealing with the problem of alcohol and drug abuse. Budgeted field positions for 1987 will increase from the 1986 level of 379 to 385.

Automated track inspection program.—One set of FRA's automated track inspection vehicles has been transferred to Guilford Industries under a licensing agreement. The license requires Guilford to make the data from automated inspections available to FRA track inspectors upon request. Another set of vehicles completed a system survey of Amtrak routes on November 30, 1984, and is stored in Philadelphia pending disposition. The final car, self-propelled T-10, is operating under the supervision and planning of FRA's Office of Safety and will survey approximately 25,000 miles of track in 1987.

Safety regulation and program administration.—This program funds the salaries and related expenses of safety headquarters personnel, data gathering and dis-

semination, planning and evaluation activities and administration of the State grants-in-aid program. The ongoing responsibility of this program is to issue new or revised standards, procedures, and regulations to provide a safer railroad environment. This program also administers technical training and management of rail-highway grade crossings.

Grants-in-aid for railroad safety.—This program assists States in paying salaries and expenses incurred for State safety inspectors on a 50-percent cost-sharing basis. No funds are requested in 1987.

Research and development.—This program provides for the conduct of safety research and development including the salaries and related expenses of the research project management staff. The research conducted encompasses all aspects of existing railroad operations and maintenance as well as new industry developments and trends. The scope of work undertaken ensures the safe performance (1) of equipment, including critical components; (2) of the track structure, its components and other elements of the right-of-way; (3) of the railroad system operating as a whole, including the dynamic interaction between rail vehicles and the track structure on which they travel; (4) of the transport of hazardous materials; and, (5) of the operating practices employed in running the Nation's railroads. In addition, other Government agencies provide reimbursements for the conduct of research, development, testing, evaluation and analyses unique to the technical expertise and research capability of this program.

Conrail labor protection.—Section 701—$165 million has been appropriated under Section 701 of the Regional Rail Reorganization Act of 1973, as amended, to provide protection to Conrail employees deprived of employment because of actions taken under the 3R Act as amended by the Northeast Rail Service Act of 1981. In 1986, $28.5 million is transferred to grants to the National Railroad Passenger Corporation. The remaining unobligated balances are to be transferred to the Office of the Administrator appropriation to offset 1987 operating costs. No funds are requested in 1987 because it is expected that Conrail will be returned to the private sector by then and labor protection will be a corporate, rather than Federal, responsibility.

Conrail title V labor benefits.—The Northeast Rail Service Act of 1981 terminated labor protection benefits under title V of the Regional Rail Reorganization Act and authorized a new Conrail labor protection program, on October 1, 1981, the effective date of the repeal of title.

Milwaukee Railroad labor assistance.—This program provided funds for Milwaukee Railroad employee benefits under Section 509 of the Regional Rail Reorganization Act, as amended.

In 1981, the Government began valuation settlements with railroads for properties transferred to Conrail in 1976. Total settlements made through October 1985, amount to $2.8 billion. The obligations shown in 1985 reflect the financing of interest payments which DOT owed to Treasury on previous borrowings.

[NORTHEAST CORRIDOR IMPROVEMENT PROGRAM]—Continued

Construction.—No funds are requested for this program in 1987. At the end of 1985, responsibility for any additional construction on the Northeast Corridor was transferred to the National Railroad Passenger Corporation (Amtrak). However, outlays will continue from prior year obligations.

Reimbursable program.—Collections are made from Federal and non-Federal agencies for cost-shared improvement projects, such as stations.

System engineering/program management and administration.—In 1986 the primary effort will be to complete and audit a number of projects being closed out. At the end of 1985 all Northeast Corridor Improvement Program work scope and responsibility was transferred to Amtrak.

Public grade crossing elimination.—No funds are requested for this program in 1987; however, obligations and outlays will continue on projects which were included in prior year appropriations.

The National Railroad Passenger Corporation (Amtrak) is a private corporation. Federal assistance is provided through the Department of Transportation in the following manner:

Operating grants and State assisted routes.—No funds are requested in 1987, because Amtrak's performance to date has failed to justify continued massive federal subsidies of interstate, commuter, and state-assisted rail passenger service.

Labor protection and capital grants.—No funds are requested in 1987. Outlays are anticipated from prior year obligations. Labor protection payments, insofar as they exist, are a responsibility of the corporation.

RAILROAD REHABILITATION AND IMPROVEMENT FINANCING FUND, FFB DIRECT LOANS—Continued

This program provides direct loans that are disbursed by the Federal Financing Bank to private freight railroad companies that are guaranteed by the Federal Railroad Administration, as authorized by section 511-513 of Public Law 94-210. The budget authority for this account reflects draw downs by the railroads on the direct loans.

URBAN MASS TRANSPORTATION ADMINISTRATION

The underlying policy principle in the development of the 1987 budget is that greater funding at the local level and greater participation by the private sector can and will reduce public costs in providing for the mass transportation needs of American citizens. Greater private sector participation in capital infrastructure development through direct private investment or public/private joint ventures in new rail systems, rail extensions, and station modernization will greatly reduce reliance on Federal capital assistance. Also, the introduction of greater competition through competitive bidding of service and maintenance will significantly reduce operating costs and the need for Federal subsidies.

The following tables depict budget authority and program levels for all Urban Mass Transportation programs for which more detail is furnished in the budget schedules (amounts include proposed rescissions):

Through 1986, this appropriation finances, with general revenues from the Treasury, personnel and other support costs associated with managing and directing

UMTA program responsibilities including executive direction, policy, budget, financial management, civil rights, public affairs, legal, grants delivery and management, technical assistance, and research and demonstration support. No appropriation is requested from general funds in 1987 to fund this program. Rather in 1987, it is proposed that funds from the Mass Transit Account of the Highway Trust Fund be made available to finance this program. This proposal is further explained under the account heading Transportation Block Grants—Transit (Trust Fund).

Through 1986 this appropriation finances, with general revenues from the Treasury, grants and contracts for the purpose of developing, testing, and demonstrating techniques and methods (analytical, operational, and managerial); improving the cost effectiveness and efficiency of mass transportation services; grants to public bodies to provide for advanced training for personnel in the mass transportation field; and grants to public and private nonprofit institutions to assist in establishing or continuing programs which combine professional training and research in the field of mass transportation. In addition, grants are provided to enhance the effective utilization of human resources and to ensure the participation of minority business enterprises in the transit industry. In 1987, it is proposed that funds from the Mass Transit Account of the Highway Trust Fund be made available to finance this program. It will be subject to the obligation limitation for the New Transportation Block Grant—Transit Program.

Grants under this activity are authorized by the Federal-Aid Highway Act of 1973 as amended (23 U.S.C. 103(e)(4)) whereby States and localities may withdraw previously approved segments of the Interstate System and substitute transit or other highway capital projects. Through 1986, this appropriation provided funding for substituted transit projects while funding for substituted highway projects was included in the budget of the Federal Highway Administration. Beginning in 1987, no funding is requested under this account. Eligible substituted transit project commitments are proposed to be funded through the Interstate Transfer program under the Federal-Aid Highways Account (Trust Fund), administered by the Federal Highway Administration.

The National Capital Transportation Amendments of 1979 authorized $1.7 billion in Federal funds for the construction of the Washington Metrorail system. It is the Administration's position that the Washington Metrorail system should be treated as other "New Start" projects. Since all other "New Start" funding is proposed to be terminated, it would be inequitable to continue funding the Washington Metrorail System. Therefore, no appropriation is requested for 1987. The Washington Metropolitan Area Transit Authority needs to initiate a dedicated source of local funding to become independent of Federal funding.

Through 1986, this program provided grants on the basis of statutory formulas to State and local agencies for mass transportation capital and operating expenses. Capital expenses included construction, acquisition, modernization, and improvement of existing transit facilities and equipment, employment of new technology, and technical planning assistance. Operating assistance expenses included administration, maintenance and operation of transit systems.

No appropriations are requested under this heading in 1987. Rather, it is proposed that formula grants be funded from the Mass Transit Account of the Highway Trust Fund. This proposal is further explained below under the account heading Transportation Block Grants—Transit (Trust Fund).

For 1987, legislation is being proposed to amend Section 21 of the Urban Mass Transportation Act of 1964 to provide that funds available in the Mass Transit Account be allocated on the basis of legislative formulas to State and local agencies for mass transit capital investments rather than on a discretionary basis. In this new Transportation Block Grant program, State and local agencies will, for the first time, be able to use transit capital assistance for eligible highway projects.

Since benefits derived from mass transit accrue primarily to localities, and in light of the mounting pressure on the Federal deficit, it is appropriate to reduce the Federal role to one of managing and allocating the penny gas tax for transit. Since this penny gas tax for transit is collected nationally, it is also appropriate that it be allocated nationally so that, to the greatest degree possible, all payers of this tax may receive benefits from it.

An obligation limitation of $1.22 billion, consistent with annual receipts from the one penny per gallon motor fuel tax for mass transit, is proposed for 1987.

Large urban areas formula grants.—Funding is proposed to be allocated on the basis of legislative formulas to State and local agencies for mass transportation capital activities in urbanized areas with populations of 200 thousand or more.

Small urban area formula grants.—Funding is proposed to be allocated to States by a legislative formula for mass transportation capital and operating activities in small urban areas, defined as areas with populations over 50 thousand but below 200 thousand.

Rural formula grants.—Funding is proposed to be allocated to States by a legislative formula for mass transportation capital and operating activities in nonurbanized areas with populations below 50 thousand.

Operating assistance.—Futhermore, the legislative proposal will provide that only small cities and rural areas may use these funds for operating assistance. These areas claim to be most dependent upon Federal operating assistance.

Elderly and handicapped.—The Urban Mass Transportation Act of 1964, as amended, requires that special efforts be made in planning and design of mass transportation facilities and services so that elderly and handicapped persons are assured of mass transportation services that they can effectively utilize. This request for $35 million is consistent with last year's level and will provide equipment and facilities needed to enhance transit mobility for elderly and handicapped persons through private, non-profit providers. The 16(b)(2) program is administered at the State level by designated State agencies.

Planning.—This program provides the funding to finance transit planning and technical studies. In 1987, UMTA will provide Section 8 grants to State and local officials largely on the basis of a 1980 census population-based distribution. These funds are available for planning, engineering, and evaluating public transportation projects and for implementing other specialized technical studies.

Research, training and human resources.—It is also requested that up to $19.5 million in funds from the Mass Transit Account be made available to fund the Research, Training and Human Resources program. Prior to 1987, funding for the Research, Training and Human Resources program was derived from general revenues. Any new budget authority will be included within the obligation limitation of the new Transportation Block Grant—Transit program and will be available for two years. Any unobligated balances from the general funded Research, Training and Human Resources program, that existed prior to 1987, will not be subject to the obligation limitation for 1987. Areas of emphasis in 1987 will include private sector transit alternatives, transit safety and security, operations and management practices, alternative fuels, project management oversight, maintenance, and human resources.

Administrative expenses.—It is also requested in 1987 that up to $26.8 million in funds from the Mass Transit Account be made available to fund the necessary expenses for the administration and operation of the UMTA program. Any new budget authority for the Administrative Expenses program will also be included within the obligation limitation for the new Transportation Block Grant—Transit program. This appropriation will finance personnel and other support costs associated with managing and directing UMTA program responsibilities. Prior to 1987, funding for the Administrative Expenses program was derived from general revenues. The reduction in Administrative Expenses from 1986 to 1987 results primarily from a planned 21 percent reduction in FTE workyears, consistent with termination of selected mass transit programs.

In 1983, the first year of the Mass Transit Account, authorized funding was apportioned for capital mass transit projects in this account in urban and non-urban areas in accordance with legislative formulas. The formula funding made available to urbanized areas will remain available through 1986. The non-urban formula funding was available through 1985. Funding in this account authorized for 1984, 1985, and 1986 was allocated for capital mass transit projects under Discretionary Grants which provided additional financial assistance over and above the Section 9 and 18 Formula Grants programs.

Urban formula grants.—For 1983, funding was allocated on the basis of legislative formulas to State and local agencies for mass transportation capital activities in urbanized areas with populations of 50 thousand or more.

Discretionary grants.—For 1984, 1985, and 1986, funding has provided financial assistance at the discretion of the Secretary (though often directed by Congress) for planning and capital investments in mass transportation. The Discretionary Grants program has been used to fund selected bus projects, rail modernization projects, and new fixed guideway systems. In addition, a small amount of discretionary funds were used for selected grants to support planning, innovative techniques, and special elderly and handicapped transportation services. In 1987, no funding is requested for discretionary allocation. Rather, a separate formula grant program under the heading Transportation Block Grant—Transit is proposed to ensure that resources from the nationally derived motor fuel tax will be more fairly allocated on the basis of legislative formulas.

Continued Federal funding under the Discretionary Grants account for major new fixed guideway investments, or new starts, can result in the development of many inefficient, expensive transit systems that will cost more to operate than other available transportation alternatives. It is proposed that this program be terminated immediately, in order to avoid any post-1986 costs of new projects. Therefore, it is proposed that most available "new start" resources in 1986 be rescinded. (See part II.)

Operation of traffic control system.—This activity covers the operation of a national system of air traffic management in the United States, its territories and possessions on a 24-hour basis. With the aid of radar, communications, and other facilities, traffic management personnel at 24 centers monitor and control en route flights of civil and military aircraft conducted under instrument conditions to assure safety and to expedite the flow of traffic. Terminal control facilities are operated at major civil airports to guide traffic movements at and in the vicinity of the airports. A system of flight service stations provides weather and aeronautical information to pilots, processes flight plans and provides inflight advisory and emergency services.

Installation and materiel services.—This activity covers procurement, contracting and materiel management programs; administrative communications services provided through the Federal Telecommunications System (FTS); supply support for the National Airspace System (NAS) and agency aircraft, except for aircraft related to the research and development program; leased space for which payment is made to General Services Administration (GSA); and other logistics support functions.

Maintenance of traffic control system.—This activity covers direction and engineering services related to the maintenance, improvement, and modification of facilities and equipment in the traffic control system; operational leased communications; and technical operation and maintenance of a national network of air navigation aids and traffic control facilities in the United States, and its territories and possessions.

Administration of aviation standards program.—This activity exists to promote flight safety of civil aviation by assuring: the airworthiness of aircraft; the competence of pilots, aviators and aviator technicians; the adequacy of flight procedures and air operations; the evaluation of inflight facility performance for compliance with prescribed standards. In addition, this activity covers the safe operation and the effective development, utilization, and maintenance of the FAA's aircraft fleet. Resources are also included under this activity for the conduct of the Federal Government's civil aviation security program, and to ensure the medical fitness of personnel in the national airspace system.

Development direction.—This activity covers the planning, direction, and evaluation of the engineering and development program, the direct project costs of which are financed under the Research, engineering and development appropriation.

Administration of airports program.—This activity includes the following work programs: (1) administration of an airport grant program for airport planning and development; (2) maintenance of the national plan of integrated airport systems; (3) development and application of airport engineering and safety standards; (4) collection, processing, and dissemination of airport data; (5) safety certification of airports serving air carriers utilizing aircraft with a seating capacity of more than 30 passengers; and (6) airport capacity enhancements.

Direction, staff and supporting services.—This activity covers administrative and housekeeping functions such as administrative supplies, communications, and payrolls at Oklahoma City, Atlantic City, and regional offices. Included also for these locations are activities for direction and management, public affairs, plans, international aviation, legal, accounting, budget, civil rights, communication control, data systems, and management systems. Also included are centrally managed items, such as certain data processing and Information Resources Management Plan requirements.

Human resource management (HRM).—This activity directly supports the other FAA activities. The most important goal of the HRM activity is to provide the highly skilled, competent, and motivated workforce necessary to accomplish FAA's objectives in improving air safety while promoting the Administration's goals in aviation-related activities. The HRM activity includes administration of FAA employee recruitment, development, compensation (including Federal Employees' Compensation Program payments and unemployment compensation), training, and labor-management relations programs. Key activities funded within the HRM are: conduct and administration of FAA's technical and management training programs; recruitment and placement of technical and administrative personnel; initiation of labor relations activities with the goal of increased employee participation in work-related decisions and increased productivity; human relations improvement activities resulting from reviews of internal surveys and external recommendations; and administration of an Airway Science Grant program intended to foster and encourage industry participation in aviation education.

Headquarters administration.—This activity was funded as a separate appropriation in 1986 but is being proposed as an activity within this appropriation in 1987. It provides administrative services at the Washington Headquarters location of the Federal Aviation Administration. The subactivities financed by this activity are: direction and management, communications control, public affairs, legal, aviation policy and plans, accounting, budget, civil rights, international aviation, management systems and data systems.

This appropriation finances maintenance, operations, management, and capital investment costs for equipment and minor facility projects at the federally owned Washington National and Washington Dulles International Airports, which serve the Metropolitan Washington area.

The operation of the airports is conducted on a commercial basis with revenues derived from landing fees, concession activity, and lease arrangements being deposited as receipts in the general fund of the Treasury. The direct operating costs and capital investment are financed by direct appropriation.

In 1987, Washington National is expected to produce an operating profit of $18.4 million and Washington Dulles International an operating profit of $4.6 million, resulting in a combined operating profit of $23.0 million. The deduction of $8.7 million in depreciation and interest for the two airports results in a net profit of $14.3 million.

The rate structures and concession arrangements are established so as to assure the recovery of operating costs, interest expenses, and an appropriate return on the Government's investment during the useful life of the airports.

The following table reflects activity at the airports:

This appropriation finances construction of major improvements and expansion of facilities at Washington National Airport and Washington Dulles International Airport. Projects are undertaken whenever necessary to ensure the capability of these airports to adequately, safely, and efficiently meet air travel needs of the public.

At Washington National Airport, funds are requested to rehabilitate airfield facilities and utility systems.

At Washington Dulles International Airport, funds are included to rehabilitate airfield facilities and utility systems.
